A Better United Nations for the New Millennium Kamil Idris, Michael Bartolo, 2021-10-18 **The Americas in the Modern Age** Lester D. Langley, 2003-01-01 In this wide ranging book historian Lester D Langley offers a fresh interpretation of the history of the modern Western hemisphere since the mid nineteenth century He evaluates the dynamics of hemispheric history commencing with the articulation of the two Americas Theodore Roosevelt s America and the contrasting America described by Cuban revolutionary essayist and poet Jos Mart and culminating with recent controversial efforts to forge a united hemisphere Tracing the interactions and influences among the nations of South Central and North America including Canada Langley departs from other accounts of the past 150 years He argues that the seedtime for today s Americas was not the Cold War but the late nineteenth and early twentieth centuries He also contends that it is not what the countries and people of the Americas have in common that binds them instead their cultural political and economic conflicts tie them together Comprehensive and balanced this history of the nations of the Americas offers new insights into both the past and the future of inter American relations **The Jews of the Middle East and North Africa in Modern Times** Reeva S. Simon, Michael M. Laskier, Sara Reguer, 2003 Filling an important gap in the literature this volume documents the variety and diversity of Jewish life in the Middle East and North Africa over the last two hundred years It explains the changes that affected the communities under Islamic rule during its golden age and describes the processes of modernization that enabled the Jews of the Middle East and North Africa to play a pivotal role in their respective countries in the nineteenth and twentieth centuries **South Africa in Contemporary Times** Godfrey Mwakikagile, 2008 This work looks at South Africa in contemporary times since the end of apartheid It is also a short history of South Africa since the arrival of the first Dutch settlers at the Cape more than 300 years ago The author also look at some of the main events in the struggle against apartheid which were important milestones in the transformation of South Africa from a white dominated country to a multiracial democratic society Other subjects covered include structural reforms and institutional accountability in the post apartheid era and the problems of immigration with South Africa being the main destination for immigrants from other African countries The influx of immigrants from other parts of Africa into South Africa is a contentious subject within South Africa and has caused tensions between many South Africans and these immigrants The author has addressed the subject from both perspectives shedding some light on the strains and constraints Africans are bound to face when they deal with each other even in the context of Pan African solidarity The work is also an excellent introduction for students and others including those who are going to South Africa for the first time It can also be used as a supplementary text in college in the study of post apartheid South Africa under the new dispensation and how the country is coping with some of the main challenges it faces in the 21st century not only as a nation but also as the continent s most developed and most powerful country destined to influence the course of events across Africa for many years to come South Africa and United Nations

Peacekeeping Offensive Operations Antonio Garcia, 2018-08-17 The creation of the Force Intervention Brigade FIB as the sharp tactical edge of the United Nations Stabilisation Mission in the Democratic Republic of the Congo MONUSCO tasked with the neutralising of armed groups was a watershed moment in the history of modern peace missions What was more significant was that sub Saharan national leaders were instrumental in the creation of the FIB South Africa Tanzania and Malawi but lacked the resources to deploy such a force and consequently the brigade was deployed under the banner of the UN With the legacy of an African Renaissance and its role in the conception of the FIB South Africa remains a critical player in international peace and security in sub Saharan Africa and therefore holds a key strategic role in achieving the FIBs objectives This comes at a critical time where blue helmets are increasingly exposed to complex and challenging security contexts The aim of this work is to provide a conceptual model for South African military future operations and UN offensive peacekeeping operations In this undertaking a layer of military and Clausewitzian theory is added to offensive peacekeeping operations Furthermore there are sections on operational constructs capstone and operating concepts doctrine and structural elements as well a section on mine action This book contributes towards an understanding of the nature of modern strategy through the lens of UN offensive peacekeeping operations and provides insights into operational challenges **The Routledge Economic History of War** Jari Eloranta, Jeremy Land, Elina Kuorelahti, Price Fishback, 2025-05-30 The Routledge Economic History of War presents a broad overview of the latest research on the long lasting changes and effects that collapsing security in international relations has had on the world s economies and societies Arranged around five key themes Fiscal and Military Capacity Military Spending Economic Effects of War War and Institutions and Business and War this handbook features contributions from an international range of scholars on varying methodological approaches theories and geographical arenas Encompassing a range of disciplinary approaches the main focus is on how economic history can provide insights into the societal impact of war addressing issues such as how war preparations and arms races affect government spending the direct economic effects of war and how societies adjust to the economic realities of rearmament and recovery This volume also explores whether wars change or alter institutions such as governments religion and democracy It also looks at what lessons we can learn from the past about military spending state capacity and the effects of war on both individual societies and global cooperation Ultimately this book provides a broad overview of the methodological geographical and multidisciplinary range of the economic history of war and demonstrates how war economics institutions and society are inextricably linked throughout history A Cultural History of Democracy in the Modern Age Eugenio Biagini, Gary Gerstle, 2022-12-15 This volume explores democracy in the 20th century examining the triumph crises recovery and resilience of democracy and its associated cultures in this period From 1920 democracy became the hegemonic discourse in political cultures to the extent that even its enemies claimed its legacy The end of empires ushered in an unprecedented globalization of democratic aspirations Barriers of gender and race were gradually removed and greater

equality gave new meaning to citizenship Yet already in 1922 democracy was on its back foot with the rise of fascism Even after the latter s defeat in 1945 liberal democracy died wherever communist democracy triumphed The situation changed again from 1989 but democratic hubris was then checked by the rise of a new enemy populism The paradox is that the century of democracy s triumph was also that of its near final defeat while the peace and stability that everybody desired and many expected as the outcome of the extension of democracy were at best intermittent and geographically limited Each chapter takes a different theme as its focus sovereignty liberty and the rule of law the common good economic and social democracy religion and the principles of political obligation citizenship and gender ethnicity race and nationalism democratic crises revolutions and civil resistance international relations and democratic politics beyond the polis These ten different approaches to democracy since 1920 offer a global synoptic and probing exploration of the subject

Adapting the United Nations to a Post-Modern Era W. Knight,2001-03-28 This volume addresses the central theme of adjusting the United Nations system in light of firstly the broadening definition of security secondly a perceived shift from modernity to post modernity and finally the contemporary debate about reform adaptation and institutional learning in multilateral institutions during transnational periods The UN has not been successful in learning appropriate lessons that could facilitate requisite changes to its structure and operations Thus the authors in this study focus on the lessons learned from the organizations recent performance in collective security preventative diplomacy preventative deployment peacekeeping peacemaking peace maintenance and international legal environmental and trade regulation

Law School in the United Kingdom **The UN and the Global South, 1945 and 2015** Thomas G. Weiss, Pallavi Roy, 2018-04-19 There is a woeful neglect of the current United Nations in the academic and policy literatures and so it is unsurprising that an examination of that multilateral structure before 1945 shows an even more egregious absence of analytical attention Such ignorance conveniently ignores the forgotten genius of 1942 1945 namely in the wide substantive and geographic relevance of multilateralism during the World War II and in the foundations for the contemporary world order The wartime and immediate post war United Nations was not simply dictated by the US State Department Whitehall and the foreign ministries of the West even a generation before decolonisation had proceeded apace and two thirds of UN member states moved into the limelight as erstwhile colonies These essays interrogate the extent to which anti colonialists and other nationalists resisting imperial rule embraced the promise of a rule based world order as a normatively and operationally valuable projection in 1945 They critically review the worlds of 1945 and 2015 of then and now to determine the role of continuity and change of the continuing bases for compromise and for the clashes between the Global South and North This book was previously published as a special issue of Third World Quarterly **Dictionary of Politics** Walter John Raymond, 1992 Congressional Record United States. Congress, 1965 *Law, Power, and the Sovereign State* Michael Ross Fowler, Julie Marie Bunc, 2010-11-01 In the wake of the collapse of the Soviet bloc it is timely to ask what continuing role if any the concept of sovereignty can and should play in the emerging new world order The aim of *Law Power and the Sovereign State* is both to counter the argument that the end of the sovereign state is close at hand and to bring scholarship on sovereignty into the post Cold War era The study assesses sovereignty as status and as power and examines the issue of what precisely constitutes a sovereign state In determining how a political entity gains sovereignty the authors introduce the requirements of de facto independence and de jure independence and explore the ambiguities inherent in each They also examine the political process by which the international community formally confers sovereign status Fowler and Bunc trace the continuing tension of the chunk and basket theories of sovereignty through the history of international sovereignty disputes and conclude by considering the usefulness of sovereignty as a concept in the future study and conduct of international affairs They find that despite frequent predictions of its imminent demise the concept of sovereignty is alive and well as the twentieth century draws to a close **Middle Power Statecraft** Jonathan H. Ping, 2017-11-30 Jonathan Ping's volume establishes a unifying theory for the concept of middle power MP MPs are states which have an innate form of statecraft and perceived power as a result of their size The book presents hybridization theory as a basis for analysis policy development and prediction of MP statecraft and perceived power A prerequisite to the founding of hybridization theory is the new statistical method of definition which identifies sixteen MPs of Asia and the Pacific The volume takes a comparative focus on Indonesia and Malaysia to inform and test hybridization theory as well as to provide a historical analysis of Southeast Asia from a statecraft and perceived power perspective It offers researchers and scholars of international relations

and international political economy a theory that can be applied to the practical study of all middle sized states while middle sized states can apply the same theory to enhance their own ability to re create their state *A Catalogue of the Law Collection at New York University* Julius J.
