Haupt,2016-07-01 First published in 1984 Shopkeepers and master artisans had a striking presence in the history of nineteenth century Europe not only in the development of industrial and urban economies but also the fabric of social life and the politics of protest The experience of 1848 the differing pace of various forms of nationalism and liberalism and at the end of the century the shift towards right wing nationalist or Catholic political movements reflected a developing crisis in the petite bourgeoisie The essays examine the nature of this crisis and ask critical questions about the social relations of the petite bourgeoisie with the developing working classes This book as a whole provides a fresh and integrated approach to the world of these shopkeepers and master artisans and illuminates much else besides in the social history of nineteenth century Europe "The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the Present " MatthewC.

Potter,2017-07-05 A novel investigation into art pedagogy and constructions of national identities in Britain and Ireland this collection explores the student master relationship in case studies ranging chronologically from 1770 to 2013 and geographically over the national art schools of England Ireland Scotland and Wales Essays explore the manner in which the Old Masters were deployed in education fuelled the individual creativity of art teachers and students were used as a rhetorical tool for promoting cultural projects in the core and periphery of the British Isles and united as well as divided opinions in response to changing expectations in discourse on art and education Case studies examined in this book include the sophisticated tradition of academic inquiry of establishment figures like Joshua Reynolds and Frederic Leighton as well as examples of radical reform undertaken by key individuals in the history of art education such as Edward Poynter and William

Coldstream The role of Modern Masters like William Orpen Augustus John Gwen John and Jeff Wall is also discussed along with the need for students and teachers to master the realm of art theory in their studio based learning environments and the ultimate pedagogical repercussions of postmodern assaults on the academic bastions of the Old Masters *The Wise Master Builder* Nigel Hiscock,2018-05-08 This title was first published in 2000 Did the plan of medieval churches have any underlying symbolic meaning This work re opens the debate about the importance of geometry and symbolism in medieval architectural design and argues the case for attributing an intellectual meaning to the planning of abbeys and cathedrals In challenging prevailing claims for the use of arithmetical ratios in architectural design notably those based on the square root of two Dr Hiscock advances a perspective consisting of proportions derived from the figures of Platonic geometry the square the equilateral triangle and the pentagon and provides evidence for the symbolic interpretation of these figures The investigation further reveals whole series of geometric relationships between some of England s most celebrated Norman cathedrals such as Norwich or Durham together with a wide sample from the Continent from Old St Peter s in Rome to Chartres Cathedral and sets out a comprehensive design method in each case Hiscock first demonstrates the proposition that the ideas of Christian Platonism including number and geometry remained current and were employed in the thought of the early Middle Ages In particular he argues that they can be associated with the leading persons in the 10th century revival of monasticism and that they found expression in the white mantle of churches that spread across Western Europe at the end of the first millennium AD The book then provides a detailed analysis of the geometric proportions of church plans between the 9th and 12th centuries in Germany France and in England This research seeks to demonstrate that a coherent sequence of geometric forms can be seen in these plans forms which correspond to the key figures of Platonic geometry as understood in the context of Christian Platonist thought In conclusion the author shows how the system of design proposed could be set out on site using the known working methods of medieval masons [Race and Class Distinctions Within Black Communities](#) Paul Camy Mocombe,Carol Tomlin,Cecile Wright,2013-12-17 This book offers both a philosophical and sociological model for understanding the constitution of identity in general and black social identity in particular without reverting to either a social or racial deterministic view of identity construction Using a variant of structuration theory phenomenological structuralism this work against contemporary postmodern and post structural theories seeks to offer a dialectical understanding of the constitution of black American and British life within the class division and social relations of production of the global capitalist world system while accounting for black social agency [Transforming Undergraduate Education](#) Donald W.
