Andrle, Janet R. Carroll, 1988 This generously illustrated easy to use reference gives instant information on 238 birds that are native to New York State The core of the atlas is a series of accounts of each species each

account including a distribution map with possible probable or confirmed breeding Facing each map is an explanatory page of text that covers a number of topics abundance historical and current distribution habitat and nest description and location On the same page is an illustration of the bird often with its nest and young

Moral Entanglements Stefan Bargheer, 2018-04-05 At the center of Stefan Bargheer's account of bird watching field ornithology and nature conservation in Britain and Germany stands the question of how values change over time and how individuals develop moral commitments Using life history data derived from written narratives and oral histories *Moral Entanglements* follows the development of conservation from the point in time at which the greatest declines in bird life took place to the current efforts in large scale biodiversity conservation and environmental policy within the European Union While often depicted as the outcome of an environmental revolution that has taken place since the 1960s Bargheer demonstrates to the contrary that the relevant practices and institutions that shape contemporary conservation have evolved gradually since the early nineteenth century *Moral Entanglements* further shows that the practices and institutions in which bird conservation is entangled differ between the two countries In Britain birds derived their meaning in the context of the game of bird watching as a leisure activity Here birds are now as then the most popular and best protected taxonomic group of wildlife due to their particularly suitable status as toys in a collecting game turning nature into a playground In Germany by contrast birds were initially part of the world of work They were protected as useful economic tools rendering services of ecological pest control in a system of agricultural production modeled after the factory shop floor Based on this extensive analysis Bargheer formulates a sociology of morality informed by a pragmatist theory of value

Birds in Trouble Lynn E. Barber, 2016-04-01 As oil was washing up on the shores of Louisiana covering shorebirds and their nests and eggs after the Deepwater Horizon disaster Lynn Barber decided to write this book to heighten awareness not only of the plight of bird species that are declining in numbers every year but also of the ways in which the birds we see every day may also face the same fate First explaining the idea of birds in trouble and what that means in terms of population conservation status and national and international designations the book then turns to the habitats that are important to birds how they are affected by changes in these habitats and what ordinary people can do to help counter those negative effects Barber then profiles forty two species that are in trouble in the United States discussing the likely reasons why and what if anything we can do to improve their situations Illustrated throughout with the author's signature bird art the book closes with a reminder about what we can do to ensure that the birds we see every day in our yards parks and communities will remain with us

Ten Thousand Birds Tim Birkhead, Jo Wimpenny, Bob Montgomerie, 2014-03-01 *Ten Thousand Birds* provides a thoroughly engaging and authoritative history of modern ornithology tracing how the study of birds has been shaped by a

succession of visionary and often controversial personalities and by the unique social and scientific contexts in which these extraordinary individuals worked This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum based discipline focused almost exclusively on the anatomy taxonomy and classification of dead birds It describes how in the early 1900s pioneering individuals such as Erwin Stresemann Ernst Mayr and Julian Huxley recognized the importance of studying live birds in the field and how this shift thrust ornithology into the mainstream of the biological sciences The book tells the stories of eccentrics like Colonel Richard Meinertzhagen a pathological liar who stole specimens from museums and quite likely murdered his wife and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack Niko Tinbergen Robert MacArthur and others who through their studies of birds transformed entire fields of biology Ten Thousand Birds brings this history vividly to life through the work and achievements of those who advanced the field Drawing on a wealth of archival material and in depth interviews this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any other group of organisms

West Virginia Wild Life; Official Monthly Publication of the Wild Life League of West Virginia ,1929 *The Spirit of System* Richard Wellington Burkhardt,1995 Jean Baptiste Lamarck was a biological Janus at once a highly competent taxonomist in a traditional mold and a bold almost visionary philosopher of nature who aspired to contrive an all embracing physics of the earth by sheer force of intellect Lamarck is generally remembered only for his ideas about the inheritance of acquired characters ideas he did not originate or take special credit for ideas that were only one part of his broad theory of evolution In this the first modern book length study of Lamarck Richard Burkhardt examines the origin and development of Lamarck s theory of organic evolution the major theory prior to Darwin The Roller Canary Journal and Bird World ,1928
