Classical Indian Philosophy of Induction Kisor Kumar Chakrabarti, 2010-05-06 Induction is a basic method of scientific and philosophical inquiry The work seeks to show against the skeptical tide that the method is secure and reliable The problem of induction has been a hotly debated issue in modern and contemporary philosophy since David Hume However long before the modern era Indian philosophers have addressed this problem for about two thousand years This work examines some major Indian viewpoints including those of Jayarasi 7th century Dharmakirti 7th century Prabhakara 8th century Udayana 11th century and Prabhacandra 14th century It also discusses some influential contemporary positions including those of Russell Strawson Popper Reichenbach Carnap Goodman and Quine The main focus is on the Nyaya view developed by Gangesa 13th century A substantial part of the work is devoted to annotated translation of selected chapters from Gangesa s work dealing with the problem of induction with copious references to the later Nyaya philosophers including Raghunatha 15th century Mathuranatha 16th century Jagadisa 17th century and Gadadhara 17th century An annotated translation of selections from Sriharsa 12th century of the Vedanta school Prabhacandra of the Jaina school and Dharmakirti of the Buddhist school is also included A solution is presented to the classical problem of induction and the Grue paradox based on the Nyaya perspective The solution includes an argument from counterfactual reasoning arguments in defense of causality analyses of circularity and logical economy arguments for objective universals and an argument from belief behavior contradiction

Classical Indian Metaphysics: Refutations of Realism and the Emergence of New Logic Stephen H. Phillips, 1998-01-01 Our knowledge of the most ancient times in India rests mainly on

tradition The Puranas the Mahabharata and in a minor degree of Ramayana profess to give accounts from tradition about the earliest occurrences The Rgveda contains historical allusions of which some record contemporary persons and events but more refer to bygone times and persons and are obviously based on tradition Almost all the information therefore comes from tradition The results obtained from an examination of Puranic and epic tradition as well as of the Rgveda and Vedic literature are set forth in the present book which happens to be a pioneering work in the area by an important orientalist of the nineteenth century

The Limits of Liberalism Mark T. Mitchell, 2018-11-30 In *The Limits of Liberalism* Mark T. Mitchell argues that a rejection of tradition is both philosophically incoherent and politically harmful *The Limits of Liberalism* identifies why most modern thinkers have denied the essential role of tradition and explains how tradition can be restored to its proper place Mitchell demonstrates that the rejection of tradition as an epistemic necessity has produced a false conception of the human person the liberal self which in turn has produced a false conception of freedom Together these false conceptions have facilitated both liberal cosmopolitanism and identity politics Mitchell uses the philosophies of Michael Oakeshott Alasdair MacIntyre and Michael Polanyi to construct a compelling argument for a reconstructed view of tradition and as a result a reconstructed view of freedom *The Limits of Liberalism* reveals that only by finding an alternative to the liberal self can we escape the incoherencies and pathologies inherent therein

Lacan and the Limits of Language Charles Shepherdson, 2009-08-25 This book weaves together three themes at the intersection of Jacques Lacan and the philosophical tradition The first is the question of time and memory How do these problems call for a revision of Lacan's purported ahistoricism and how does the temporality of the subject in Lacan intersect with the questions of temporality initiated by Heidegger and then developed by contemporary French philosophy The second question concerns the status of the body in Lacanian theory especially in connection with emotion and affect

which Lacanian theory is commonly thought to ignore but which the concept of jouissance was developed to address Finally it aims to explore beyond the strict limits of Lacanian theory possible points of intersection between psychoanalysis and other domains including questions of race biology and evolutionary theory By stressing the question of affect the book shows how Lacan's position cannot be reduced to the structuralist models he nevertheless draws upon and thus how the problem of the body may be understood as a formation that marks the limits of language Exploring the anthropological category of race within a broadly evolutionary perspective it shows how Lacan's elaboration of the imaginary and the symbolic might allow us to explain human physiological diversity without reducing it to a cultural or linguistic construction or allowing race to remain as a traditional biological category Here again the questions of history and temporality are paramount and open the possibility for a genuine dialogue between psychoanalysis and biology Finally the book engages literary texts Antigone Ovid's Metamorphoses Hamlet and even Wordsworth become the muses who oblige psychoanalysis and philosophy to listen once again to the provocations of poetry which always disrupts our familiar notions of time and memory of history and bodily or affective experience and of subjectivity itself
