## **The Limits Of Technocratic Politics:**

The Limits of Technocratic Politics Jeffrey D. Straussman, *Technocratic Politics* Francesco Antonelli, 2022-11-30 This book considers the role of experts and expertise in contemporary politics and the ways in which digitalisation and the use of technique are transforming practices of governance Asking whether the Covid 19 crisis is likely to further advance or weaken these processes it examines their impact on the future of democracy and urges rejection of the idea of technocracy as an alternative to politics An examination of the relationship between social elites and technique this volume highlights the threat posed to representative democracy of this fundamental mechanism of governance in the global world and reflects upon new forms of the political economic regime It is important reading for scholars of sociology and politics with interests in questions of power governance and representation

**Political Implications of China's Technocracy in the Reform Era** Gang Chen, 2023-05-27 This book focuses on the evolution of technocracy in contemporary Chinese politics and its implications in China's elite politics and policymaking The rise of technocracy in contemporary Chinese politics is not only attributed to the meritocratic tradition based on civil service exams in ancient China but also tied to the current authoritarian political system that relies on the top down cadre promotion approach instead of public elections Leaders with technocratic backgrounds have brought changes to China's political landscape since technocrats tend to solve governance issues using technical solutions in an industrialized society as compared to pure politicians and revolutionaries who are inclined to resort to political and sometimes populist options This book examines the specific tech areas from which top technocrats have been emerging in Chinese politics which include military and aerospace industry public health engineering and science economics and finance as well as information technology It is a unique research monograph based on research on China's evolving technocracy and its political economic and international implications that provides a detailed and thorough study of the country's industrial policies being reshaped by these technocrats and their likelihood of joining the Chinese Communist Party's top echelon in the next five to ten years

**The New Technocracy** Anders Esmark, 2020-04-08 Setting a new benchmark for studies of technocracy this book shows that a solution to the challenge of populism will depend as much on a technocratic retreat as democratic innovation Esmark examines the development since the 1980s of a new post industrial technocratic regime and its complicity in the populist backlash against politics and political elites that is visible today The new technocracy a combination of network governance risk management and performance management has the author argues abandoned the overtly anti democratic sentiments of its industrial predecessor and proclaimed a new partnership with democracy The rise of populism however is a clear sign that the inherent problems of this partnership have been exposed and that technocracy posing as democracy will only serve to exacerbate existing problems

**The Technocratic Challenge to Democracy** Eri Bertsou, Daniele Caramani, 2020-03-09 This book represents the first comprehensive study of how technocracy currently challenges representative democracy and asks how technocratic politics undermines democratic

legitimacy How strong is its challenge to democratic institutions The book offers a solid theory and conceptualization of technocratic politics and the technocratic challenge is analyzed empirically at all levels of the national and supra national institutions and actors such as cabinets parties the EU independent bodies central banks and direct democratic campaigns in a comparative and policy perspective It takes an in depth analysis addressing elitism meritocracy de politicization efficiency neutrality reliance on science and distrust toward party politics and ideologies and their impact when pitched against democratic responsiveness accountability citizens input and pluralist competition In the current crisis of democracy this book assesses the effects of the technocratic critique against representative institutions which are perceived to be unable to deal with complex and global problems It analyzes demands for competent and responsible policy making in combination with the simultaneous populist resistance to experts The book will be of key interest to scholars and students of comparative politics political theory policy analysis multi level governance as well as practitioners working in bureaucracies media think tanks and policy making

**EU Executive Discretion and the Limits of Law** Joana Mendes, 2019-05-02 The increase in the European Union's executive powers in the areas of economic and financial governance has thrown into sharp relief the challenges of EU law in constituting framing and constraining the decision making processes and political choices that have hitherto supported European integration The constitutional implications of crisis induced transformations have been much debated but have largely overlooked the tension between law and discretion that the post 2010 reforms have brought to the fore This book focuses on this tension and explores the ways in which legal norms may or may not constrain and structure the discretion of the EU executive The developments in the EU's post crisis financial and economic governance act as a reference point from which to analyze the normative problems pertaining to the law's relationship to the exercise of discretion Structured in three parts the book starts by analyzing the challenges to the maxim that the law both grounds and constrains EU executive and administrative discretion setting out the concepts problems and approaches to the relation between law and discretion both in general public law and in EU law It progresses to analyze how these problems and approaches have unfolded in EU's financial economic and monetary governance Finally it moves on from these specific developments to assess how existing legal principles and means of judicial review contribute to ensuring the rationality and legality of EU's discretionary powers

*Technocracy and the Politics of Expertise* Frank Fischer, 1990 This book describes the role of technological experts and expertise in a democratic society It places decision making strategies studied in organization theory and policy studies into a political context Fischer brings theory to bear on the practical technocratic concerns of these disciplines and hopes to facilitate the development of nontechnocratic discourse within these fields The book adopts a critical perspective and addresses the restructuring of the policy sciences

**Technocracy and the Epistemology of Human Behavior** Paul Gunn, 2022-11-10 In Power Without Knowledge A Critique of Technocracy 2019 Jeffrey Friedman presented a sweeping reinterpretation of modern politics and government as technocratic even in many of

its democratic dimensions Building on a new definition of technocracy as governance aimed at solving social and economic problems Friedman showed that the epistemic demands that such governance places on political elites and ordinary people alike may be overwhelming if technocrats fail to attend to the ideational heterogeneity of the human beings whose control is the object of technocratic power Yet a recognition of ideational heterogeneity considerably complicates the task of predicting behavior which is essential to technocratic control as Friedman demonstrated with pathbreaking critiques of the homogenizing strategies of neoclassical economics positivist social science behavioral economics and populist democratic politics In *Technocracy and the Epistemology of Human Behavior* thirteen political theorists including Friedman himself debate the implications of Power Without Knowledge for social science modern governance the politics of expertise post structuralism anarchism and democratic theory and Friedman responds to his critics with an expansive defense of his vision of contemporary politics and his political epistemology of ideationally diverse human beings This book was originally published as a special issue of the *Critical Review*

*The Technocratic Dividend* Alfred So, 2025-06-14 Are you tired of endless debate political gridlock and government promises that never deliver What if there was a proven path to real progress one that any nation rich or poor could take right now Across the world modern democracies are stuck In the US UK Japan Canada and Europe voters see soaring costs and sluggish reforms Meanwhile millions in Africa Asia and Latin America crave the leapfrogging growth and opportunity that old systems can't deliver This book is your blueprint for breaking free Discover how nations everywhere no matter their history or income can accelerate economic growth build trust and create governments that truly work for their people Inside you'll find Radical new frameworks for policy change government reform and democratic renewal Real world case studies from Singapore to Rwanda Estonia to Botswana showing what works and what doesn't Practical step by step solutions for overcoming bureaucracy corruption and short term thinking Tools for leaders citizens and reformers in both developed and developing countries so everyone can drive change Strategies to adapt global best practices to local realities turning every obstacle into an advantage If you're a policymaker entrepreneur activist or simply a citizen hungry for a better future this book will show you how to help your country leap ahead no matter where you live Join the movement for a new era of government Because when nations dare to reform the world rises together Ready to be part of the transformation Start reading and help your country claim the technocratic dividend

*Bulletin of the Atomic Scientists*, 1979-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

*Technocratic Ministers and Political Leadership in European Democracies* António Costa Pinto, Maurizio Cotta, Pedro Tavares de Almeida, 2017-09-12 This book provides an in depth analysis of the technocratic shift in ministerial recruitment measuring its extent and variations over time in fourteen European countries It addresses the question who governs in European democratic regimes Just a few decades ago the answer would have been straightforward

party men and fewer party women More recently however and in varying degrees across Europe a greater proportion of non politicians or experts have been recruited to government as exemplified by the 2017 election of Emmanuel Macron to the French Presidency These experts frequently labelled technocrats increasingly occupy key executive positions and have emerged as powerful actors in the decision making process This edited collection explores the contemporary debates surrounding the relationship between technocracy democracy and political leadership and will appeal to scholars and advanced students interested in these fields

The Invisible Hand of Planning Guy Alchon, 2014-07-14 Guy Alchon examines the mutually supportive efforts of social scientists business managers and government officials to create America's first peacetime system of macroeconomic management Originally published in 1985 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Limits of Scientific Reason John McIntyre, 2021-09-27 Critically and comprehensively examining the works of Habermas and Foucault two giants of 20th century continental philosophy this book illuminates the effects of scientific reason as it migrates from its specialized institutions into society It explores how science permeates shared human consciousness to produce effects that ripple through the entire social body to restructure relations between persons discourses institutions and power in ways which we are barely conscious of The book shows how science through its entwinement with power discourses and practices presents certain social arrangements as natural and certain courses of action as beyond question By arguing for a non reductive liberal scientific naturalism that sees science as one form of rationality amongst others it opens possibilities for thought and action beyond scientific knowledge Examining the shifting relations between science and other social institutions discourses and power the book addresses the narrowing of freedom by the instrumental modes of thinking that accompany scientific and technological change McIntyre simultaneously raises the question of the good life and the question of a philosophical critique both directed towards science and at the same time shaped by and responsive to it By analysing the works of Foucault and Habermas in terms of their social political and historical contexts it reveals the two thinkers as linked by a commitment to the Enlightenment tradition and its emancipatory telos The significant differences between the two are seen to result from Foucault's radicalization of this tradition a radicalization which is at the same time implicit within the Enlightenment project itself

Power Without Knowledge Jeffrey Friedman, 2019 Do leading social scientific experts or technocrats know what they are doing In Power without Knowledge Jeffrey Friedman maintains that they do not Friedman shows that people are too heterogeneous to act as predictably as technocracy requires of them Technocratic reason then entails a drastically oversimplified understanding of human decision making in modern society

**Critical Policy Inquiry**

Frank Fischer, 2024-10-03 Presenting a critical approach to the study of public policy and policy analysis this book presents a postpositivist foundation that challenges empiricist and technocratic approaches to policy studies Frank Fischer advances deliberative policy argumentation and the logic of practical reason exploring how this approach can be used as a framework for interpreting the interaction of normative and empirical arguments in policy politics *Technocracy in the European Union* Claudio M. Radaelli, 2017-09-29 One of the most common and strongest criticisms of the EU is that power is held by a select few who are unaccountable technocrats sitting in Brussels who without consultation formulate policies A fresh and innovative new series written by leading authorities providing students and researchers with a concise analysis of key topics relating to the state of the European Union and its future development Combining insights from the theoretical literature with brief institutional descriptions each book in the series focuses on the key questions Where does power lie What are the likely scenarios for development thereby enabling the reader to gain a better sense of the dynamic processes of politics at EU level The Politics of Economic Adjustment Stephan Haggard, Robert R. Kaufman, 2018-06-05 In the 1980s some developing countries adopted orthodox market oriented policies in response to international economic crises others experimented with alternative programs and still others failed to develop coherent adjustment strategies of any sort Building on the case studies in Economic Crisis and Policy Choice these essays offer comparative analysis of these divergent experiences with macroeconomic stabilization and structural adjustment Barbara Stallings and Miles Kahler explore the external pressures on governments Peter Evans and John Waterbury examine the role of the state in the adjustment process Evans through the lens of earlier historical experience with economic restructuring Waterbury by focusing on the politics of privatization Joan Nelson analyzes the politics of income distribution in the adjustment process and Haggard and Kaufman investigate the political correlates of inflation and stabilization A final essay assesses the prospects for combining market oriented reforms with political democratization Technocracy and Democracy in Latin America Eduardo Dargent, 2015 Praised by some as islands of efficiency in a sea of unprofessional politicized and corrupt states and criticized by others for removing wide areas of policy making from the democratic arena technocrats have become prominent and controversial actors in Latin American politics Through an in depth analysis of economic and health policy in Colombia from 1958 to 2011 and in Peru from 1980 to 2011 Technocracy and Democracy in Latin America explains the source of these experts power as well as the leverage they have across state policy sectors in Latin America Bulletin of the Atomic Scientists, 1979-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Soviet Bloc In The Imf And The Ibrd** Valerie J Assetto, 2019-07-11 In this book the author surveys performance of the Soviet Bloc states in the International Monetary Fund IMF and the International Bank for Reconstruction and Development IBRD for evidence of unusual levels of assistance using aggregate data obtained from IMF and IBRD
