On a Grand Scale Lisa Jardine, 2002

The figure of Sir Christopher Wren looms large in English national consciousness. The bold imposing beauty of St Paul's Cathedral stands forever for the nation's achievement; its undamaged dome towering above the rubble of the Blitz in the Second World War a symbol of London's indomitable fighting spirit. The man behind the work was as remarkable as the monuments he has left us. Lisa Jardine takes us deep into Wren's multi-faceted imagination and discovers the unique exacting nature of his mind. Through the prism of Wren's intellect she unfolds the vibrant extraordinary emerging new world of late seventeenth century science and ideas. **BOOK JACKET Title Summary** field provided by Blackwell North America Inc. Sir Christopher Wren was one of the greatest and most versatile Englishmen of his age. Most famous today for the redesign and rebuilding of St Paul's Cathedral, he was also Professor of Astronomy at Oxford and a founding and active member of the Royal Society. Following a childhood in which he was continuously designing and building contraptions, his talents were so exceptional that he was recognized as a genius while still an Oxford undergraduate. While Professor of Astronomy he designed some of Oxford's earliest Classical buildings, but it was the Great Fire of London that changed Wren's life. As principal architect among the commissioners appointed to rebuild the city, he led a team that included his old friend Professor of Geometry Robert Hooke and his brilliant young assistant Nicholas Hawksmoor, who joined him in 1679. Together they enriched London with the cathedral and churches which 300 years later are still amongst its greatest architectural treasures.

Sir Christopher Wren 1632-1723 is now mostly remembered as a genius of architecture, but he was also an accomplished polymath who only came to architecture quite late in life. Most famous as the mastermind behind the rebuilding of St Paul's Cathedral and more than fifty parish churches after the Great Fire of London, among his countless other projects Wren also designed the Royal Hospital at Chelsea, the Royal Naval Hospital at Greenwich, and much of Hampton Court Palace. Replete with colourful images of his buildings, this concise biography tells the story of a man whose creations are still popular tourist attractions to this day, but also casts light on Wren's credentials as an intellectual and a founding member of the Royal Society.
