Mega-sociology Adam Podgórecki, 2016-06-08 Mega sociology is the last book written by Adam Podg recki He was working on its final version when he died on August 18 1998 of heart attack The revisions he intended to make did not concern the main ideas of this book rather he planned a thorough re working of its structure to make their presentation more focused and effective After much deliberation I have decided to have the manuscript published without any editing that might have inadvertently distorted the Author s intentions The concept of megasociology is about making sociology relevant by placing it in the social context of specific societies and their values and thereby enabling a culturally appropriate organic social action It grew out of Podg recki s concern with the invasion of dilettantes in sociology led by ideologues who created abstract detached from social reality pseudo theories designed primarily for their own aggrandizement It was also a next step in his almost life long search for the best way to approach the task of helping societies to live better

The Making of Green Engineers Andrew Jamison,2022-06-01 This book discusses the ways in which engineering educators are responding to the challenges that confront their profession On the one hand there is an overarching sustainability challenge the need for engineers to relate to the problems brought to light in the debates about environmental protection resource depletion and climate change There are also a range of societal challenges that are due to the permeation of science and technology into ever more areas of our societies and everyday lives and finally there are the intrinsic scientific and technological challenges stemming from the emergence of new fields of technosciences that mix science and technology in new combinations In the book the author discusses and exemplifies three contending response strategies on the part of engineers and engineering educators a commercial strategy that links scientists and engineers into networks or systems of innovation an academic strategy that reasserts the traditional values of science and engineering and an integrative strategy that aims to combine scientific knowledge and engineering skills with cultural understanding and social responsibility by fostering what the author terms a hybrid imagination Professor Jamison combines scholarly analysis with personal reflections drawing on over forty years of experience as a humanist teaching science and engineering students about the broader social political and cultural contexts of their fields The book has been written as part of the Program of Research on Opportunities and Challenges in Engineering Education in Denmark PROCEED funded by the Danish Strategic Research Council for which Professor Jamison has served as coordinator

Crossing the Postmodern Divide Albert Borgmann,1992

Crossing the Postmodern Divide is a guide for all those perplexed by what it means to live at the edge of an era Albert Borgmann writes for everyone seeking to understand the sprawling critique of modernity that informs virtually every aspect of life at the end of the twentieth century from philosophy social theory and the arts to everyday worlds of work and family and community In this eloquent guide to the meanings of the postmodern era Borgmann charts the options before us as we seek alternatives to the joyless and artificial culture of consumption With exceptional clarity Borgmann connects the fundamental ideas driving his understanding of society's ills to every sphere of contemporary social life We have lost faith in the modern project Our society is disenchanted with a world in which science and technology have become tools for destruction where rampant individualism is a mask for privilege and greed and where the institutions of public life are emptied of meaning and purpose In offering alternatives to modernity's exhausted traditions alternatives already emerging in everyday life Borgmann moves this critique to its next stage Whether in the increasingly flexible organization of work the enabling technologies of the personal computer or the return to small scale communities more in harmony with the demands of nature he finds us beginning to reorder our social worlds Crossing the Postmodern Divide also offers a powerfully articulated vision of what a postmodern culture has in store This new era at its best would enable participation acknowledge limits and restore to human life the importance of the local the sacred and the communal The critique of modernism Borgmann portrays goes beyond the empty language of postmodern discourse It speaks to real dissatisfactions with the quality of our world and strives to provide us with a helpful view of the postmodern divide and what lies beyond it
