## **Social History Of Knowledge From Gutenberg To Diderot:**

Social History of Knowledge Peter Burke, 2013-06-06 In this book Peter Burke adopts a socio cultural approach to examine the changes in the organization of knowledge in Europe from the invention of printing to the publication of the French Encyclopédie. The book opens with an assessment of different sociologies of knowledge from Mannheim to Foucault and beyond and goes on to discuss intellectuals as a social group and the social institutions especially universities and academies which encouraged or discouraged intellectual innovation. Then in a series of separate chapters Burke explores the geography anthropology politics and economics of knowledge focusing on the role of cities academies states and markets in the process of gathering classifying spreading and sometimes concealing information. The final chapters deal with knowledge from the point of view of the individual reader listener viewer or consumer including the problem of the reliability of knowledge discussed so vigorously in the seventeenth century. One of the most original features of this book is its discussion of knowledges in the plural. It centres on printed knowledge especially academic knowledge but it treats the history of the knowledge explosion which followed the invention of printing and the discovery of the world beyond Europe as a process of exchange or negotiation between different knowledges such as male and female theoretical and practical high status and low status and European and non European. Although written primarily as a contribution to social or socio cultural history this book will also be of interest to historians of science sociologists anthropologists geographers and others in another age of information explosion.

Peter Burke, A Social History of Knowledge: from

Gutenberg to Diderot, 2002      **A social history of knowledge : from Gutenberg to Diderot ; based on the first series of Vonhoff Lectures given at the University of Groningen (Netherlands)** Peter Burke, 2000      *A Social History of*

*Knowledge II* Peter Burke, 2013-04-17 Peter Burke follows up his magisterial *Social History of Knowledge* picking up where the first volume left off around 1750 at the publication of the French *Encyclopédie* and following the story through to Wikipedia. Like the previous volume it offers a social history or a retrospective sociology of knowledge in the sense that it focuses not on individuals but on groups, institutions, collective practices and general trends. The book is divided into 3 parts. The first argues that activities which appear to be timeless gathering knowledge, analysing, disseminating and employing it are in fact time bound and take different forms in different periods and places. The second part tries to counter the tendency to write a triumphalist history of the growth of knowledge by discussing losses of knowledge and the price of specialization. The third part offers geographical, sociological and chronological overviews contrasting the experience of centres and peripheries and arguing that each of the main trends of the period: professionalization, secularization, nationalization, democratization etc. coexisted and interacted with its opposite. As ever Peter Burke presents a breath taking range of scholarship in prose of exemplary clarity and accessibility. This highly anticipated second volume will be essential reading across the humanities and social sciences.      **The History of Knowledge** Johan Östling, David Larsson

Heidenblad, 2024-01-18 This Element provides a pedagogical overview of the history of knowledge including its main currents, distinguishing ideas and key concepts. However, it is not primarily a state of the art overview but rather an argumentative contribution that seeks to push the field in a certain direction towards studying knowledge in society and knowledge in people's lives. Hence the history of knowledge envisioned by the authors is not a rebranding of the history of science and intellectual history but rather a reinvigoration of social and cultural history. This implies that many different forms of knowledge should be objects of study. By drawing on ongoing research from all across the world dealing with different time periods and problems, the authors demonstrate that the history of knowledge can enrich our understanding of past societies. This title is also available as Open Access on Cambridge Core.      *Histories of Knowledge in Postwar Scandinavia* Johan Östling, Niklas Olsen, David Larsson Heidenblad, 2020-06-04 *Histories of Knowledge in Postwar Scandinavia* uses case studies to explore how knowledge circulated in the different public arenas that shaped politics, economics and cultural life in and across postwar Scandinavia, particularly in the 1960s and 1970s. This book focuses on a period when the term knowledge society was coined and rapidly found traction. In Scandinavia, society's relationship to rational forms of knowledge became vital to the self-understanding and political ambitions of the era. Taking advantage of contemporary discussions about the circulation, arenas, forms, applications and actors of knowledge, contributors examine various forms of knowledge: economic, environmental, humanistic, religious, political and sexual, that provide insight into the making and functioning of postwar Scandinavian societies and offer innovative studies that contribute to the development of the history of knowledge at large.

The concentration on knowledge rather than the welfare state the Cold War or the new social and political movements which to date have attracted the lion's share of scholarly attention ensures the book makes a historiographical intervention in postwar Scandinavian historiography. Offering a stimulating point of departure for those interested in the history of knowledge and the circulation of knowledge this is a vital resource for students and scholars of postwar Scandinavia that provides fresh perspectives and new methodologies for exploration. *Exiles and Expatriates in the History of Knowledge, 1500-2000* Peter Burke, 2017-03-07 In this wide ranging consideration of intellectual diasporas historian Peter Burke questions what distinctive contribution to knowledge exiles and expatriates have made. The answer may be summed up in one word: deprovincialization. Historically the encounter between scholars from different cultures was an education for both parties exposing them to research opportunities and alternative ways of thinking. Deprovincialization was in part the result of mediation as many migrants informed people in their hostland about the culture of the native land and vice versa. The detachment of the exiles who sometimes viewed both homeland and hostland through foreign eyes allowed them to notice what scholars in both countries had missed. Yet at the same time the engagement between two styles of thought one associated with the exiles and the other with their hosts sometimes resulted in creative hybridization for example between German theory and Anglo American empiricism. This timely appraisal is brimming with anecdotes and fascinating findings about the intellectual assets that exiles and immigrants bring to their new country even in the shadow of personal loss.

Knowledge and Culture in the Early Dutch Republic Klaas Berkel, Albert Clement, Arjan Dixhoorn, 2025-10-01 The Dutch Republic around 1600 was a laboratory of the Scientific Revolution of the seventeenth century. Here conditions were favourable for the development of new ways of knowing nature and the natural philosopher Isaac Beeckman who was born in Middelburg in 1588 was a seminal figure in this context. He laid the groundwork for the strictly mechanical philosophy that is at the heart of the new science. Descartes and others could build on what they learned directly or indirectly from Beeckman. As previous studies have mainly dealt with the scientific content of Beeckman's thinking this volume also explores the wider social scientific and cultural context of his work. Beeckman was both a craftsman and a scholar and fruitfully combined artisanal ways of knowing with international scholarly traditions. Beeckman's extensive private notebook offers a unique perspective on the cultures of knowledge that emerged in this crucial period in intellectual history. *What is the History of Knowledge?* Peter Burke, 2015-12-29 What is the history of knowledge? This engaging and accessible introduction explains what is distinctive about the new field of the history of knowledge or as some scholars say knowledges in the plural and how it differs from the history of science intellectual history the sociology of knowledge or from cultural history. Leading cultural historian Peter Burke draws upon examples of this new kind of history from different periods and from the history of India East Asia and the Islamic world as well as from Europe and the Americas. He discusses some of the main concepts used by scholars working in the field among them order of knowledge situated knowledge and knowledge society. This book tells the

story of the transformation of relatively raw information into knowledge via processes of classification verification and so on the dissemination of this knowledge and finally its employment for different purposes by governments corporations or private individuals A concluding chapter identifies central problems in the history of knowledge from triumphalism to relativism together with attempts to solve them The only book of its kind yet to be published What is the History of Knowledge will be essential reading for all students of history and the humanities in general as well as the interested general reader *The Evolution of Knowledge* Jürgen Renn, 2022-05-03 A fundamentally new approach to the history of science and technology This book presents a new way of thinking about the history of science and technology one that offers a grand narrative of human history in which knowledge serves as a critical factor of cultural evolution J rgen Renn examines the role of knowledge in global transformations going back to the dawn of civilization while providing vital perspectives on the complex challenges confronting us today in the Anthropocene this new geological epoch shaped by humankind Renn reframes the history of science and technology within a much broader history of knowledge analyzing key episodes such as the evolution of writing the emergence of science in the ancient world the Scientific Revolution of early modernity the globalization of knowledge industrialization and the profound transformations wrought by modern science He investigates the evolution of knowledge using an array of disciplines and methods from cognitive science and experimental psychology to earth science and evolutionary biology The result is an entirely new framework for understanding structural changes in systems of knowledge and a bold new approach to the history and philosophy of science Written by one of today s preeminent historians of science The Evolution of Knowledge features discussions of historiographical themes a glossary of key terms and practical insights on global issues ranging from climate change to digital capitalism This incisive book also serves as an invaluable introduction to the history of knowledge

**Routledge Handbook of Academic Knowledge Circulation** Wiebke Keim, Leandro Rodriguez Medina, Rigas Arvanitis, Natacha Bacolla, Chandni Basu, Stéphane Dufoix, Stefan Klein, Mauricio Nieto Olarte, Barbara Riedel, Clara Ruvituso, Gernot Saalman, Tobias Schlechtriemen, Hebe Vessuri, 2023-06-30 Knowledge is a result of never ending processes of circulation This accessible volume is the first comprehensive multidisciplinary work to explore these processes through the perspective of scholars working outside of Anglo American paradigms Through a variety of literature reviews examples of recent research and in depth case studies the chapters demonstrate that the analysis of knowledge circulation requires a series of ontological and epistemic commitments that impact its conceptualisation and methodologies Bringing diverse viewpoints from across the globe and from a range of disciplines including anthropology economics history political science sociology and Science ii spaces and actors of circulation iii academic media and knowledge circulation iv the political economy of academic knowledge circulation v the geographies geopolitics and historical legacies of the global circulation of academic knowledge vi the relationships between academic and extra academic knowledges and vii methodological approaches to studying the circulation of academic knowledge This handbook will be

essential reading for academics researchers and postgraduate researchers in the humanities and social sciences interested in the circulation of knowledge     Scholars in Action (2 vols) ,2013-04-15 In *Scholars in Action* an international group of 40 authors open up new perspectives on the eighteenth century culture of knowledge with a particular focus on scholars and their various practices     *Knowledge and Democracy* Nico Stehr,2017-09-08 The relationship of knowledge and liberties in modern societies presents a multitude of fascinating issues that deserve to be explored more systematically The production of knowledge is dynamic and the conditions and practice of freedom is undergoing transformation These changes ensure that the linkages between liberty and knowledge are always subject to changes In the past the connection between scientific knowledge democracy and emancipation seemed self evident More recently the close linkage between democracy and knowledge has been viewed with skepticism This volume explores the relationship between knowledge and democracy Do they support each other do they mutually depend on each other or are they perhaps even in conflict with each other Does knowledge increase the freedom to act If additional knowledge contributes to individual and social well being does it also enhance freedoms *Knowledge and Democracy* focuses on the interpenetration of knowledge freedom and democracy and does so from various perspectives theoretical as well as practical Modern societies are transforming themselves into knowledge societies This has a fundamental impact on political systems and the relationship of citizens to large social institutions The contributors to this book systemically explore whether and in what ways these modern day changes and developments are connected to expansion of the capacities of individual citizens to act They focus on the interrelation of democracy and knowledge and the role of democratic institutions as well as on the knowledge and social conduct of actors within democratic institutions In the process of investigation they arrive at a new platform for future research and theory one that is sensitive to present day societal conflicts cleavages and transformations generated by new knowledge In this way this volume will attract the interest of political scientists sociologists economists and students within various disciplines

Knowledge Exchanges Between Portugal and Europe Nuno Luís Vila-Santa Braga Campos,2025-10-01 Following recent historiographical appeals on the need to study knowledge exchanges between European maritime rivals and their impact on overseas expansionist processes this book makes this study for the Portuguese overseas empire between the fifteenth and seventeenth centuries As the first European maritime power to systematically launch long distance voyages Portugal became a model worth emulation when Spain France England and the Dutch Republic started their own overseas enterprises In different chapters that each adopt a case study relation Portugal Spain Portugal England Portugal France and Portugal Dutch Republic this book documents how Portuguese maritime knowledge was outsourced by its maritime rivals The impact that Portuguese nautical knowledge had is evaluated resorting particularly to a wide range of diplomatic and espionage documents Finally the book discusses the alleged Iberian secrecy policies regarding maritime knowledge explaining why there is no serious reason to consider their success     **English Literature and the Disciplines of Knowledge, Early**

*Knowledge and Text Production in an Age of Print: China, 900-1400*, 2011-02-17 The essays in this volume seek to flesh out the diversity of Chinese textual production during the period spanning the tenth and fourteenth centuries when printing became a widely used technology By exploring the social and political relations that shaped the production and reproduction of printed texts the impact of intellectual and religious formations on book production the interaction between print and other media readership and the growth of collections the contributors offer the first comprehensive examination of the cultural history of book production in the first 500 years of the history of printing In an afterword historian of the early modern European book Ann Blair reflects on the volume s implications for the comparative study of the impact of printing

*Knowledge* Marian Adolf, Nico Stehr, 2016-09-22 As we move through our modern world the phenomenon we call knowledge is always involved Whether we talk of know how technology innovation politics or education it is the concept of knowledge that ties them all together But despite its ubiquity as a modern trope we seldom encounter knowledge in itself How is it produced where does it reside and who owns it Is knowledge always beneficial will we know all there is to know at some point in the future and does knowledge really equal power This book pursues an original approach to this concept that seems to define so many aspects of modern societies It explores the topic from a distinctly sociological perspective and traces the many ways that knowledge is woven into the very fabric of modern society

*The Dutch Trading Companies as Knowledge Networks*, 2010-08-18 For more than a century from about 1600 until the early eighteenth century the Dutch dominated world trade Via the Netherlands the far reaches of the world both in the Atlantic and in the East were connected Dutch ships carried goods but they also opened up opportunities for the exchange of knowledge The commercial networks of the Dutch trading companies provided an infrastructure which was accessible to people with a scholarly interest in the exotic world The present collection of essays brings together a number of studies about knowledge construction that depended on the Dutch trading networks Contributors include Paul Arblaster Hans den Besten Frans Blom Britt Dams Adrien Delmas Alette Fleischer Antje Fl chter Michiel van Groesen Henk de Groot Julie Berger
