**Social Orders and Social Classes in Europe Since 1500** M. L. Bush, 1992 Evaluates the notions of orders and class by conceptual analysis and also by examining their application to the societies of Eastern and Western Europe in the period 1500 onwards The book aims to study the nobility clergy middle classes peasantry the proletariat and the poor This pioneering survey evaluates the notions of class and order throughout European history since 1500 After a general theoretical section on the concept of orders and class the book provides discussions and case studies of the nobility the clergy the middle classes and the rural and urban proletariat The studies are drawn from all over Europe from early modern Castile to late Tsarist Russia Contributors include Peter Burke Stuart Woolf A A Thompson and Joseph Bergin *Early Modern History and the Social Sciences* John A. Marino, 2002-07-01 This collection of eleven essays furthers the dialogue between early modern history and the social sciences through an analysis of Fernand Braudel's *The Mediterranean and the Mediterranean World of Philip II* The contributors review various historiographical traditions to arrive at conclusions on contemporary theory and practice in the exchange between history and the disciplines of geography economics sociology anthropology politics diplomatic history and the study of revolutions psychology law religion and area studies China and the Americas Contributors Peter Burke Emmanuel College University of Cambridge Jan de Vries University of California Berkeley Mark Elvin Australian National University Canberra Jack A Goldstone University of California Davis Antonio Manuel Hespanha Universidade Nova de Lisboa Henry Kamen Consejo Superior de Investigaciones Científicas Institución Mil i Fontanals Barcelona John A Marino University of California San Diego Ottavia Niccoli Università degli Studi di Trento Anthony Pagden University of California Los Angeles M J Rodríguez Salgado London School of Economics Bartolomé Yun Casalilla Universidad Pablo de Olavide de Sevilla Sartorial Practices and Social Order in Eighteenth-Century Sweden Mikael Alm, 2021-07-26 The interplay between clothes and social order in early modern societies is well known Differences in dress and hierarchies of appearances coincided with and structured social hierarchies and notions of difference However clothes did not merely reproduce set social patterns They were agents of change actively used by individuals and groups to make claims and transgress formal boundaries This was not least the case for the revolutionary decades of the late eighteenth century the period in focus of this book Unlike previous studies on sumptuary laws and other legal actions taken by governments and formal power holders this book offers a broader and more everyday perspective on late eighteenth century sartorial discourse In 1773 there was a publicly announced prize competition on the advantages and disadvantages of a national dress in Sweden Departing from the submitted replies the study opens a window onto the sartorial world Several fields of cultural history are brought together social culture in terms of order hierarchies and notions of difference sartorial culture with contemporary views on dress and moral aspects of sartorial practices and visual culture in terms of sartorial means of making a difference and the emphasis on the necessity of a legible social order **The Art of Solidarity in the**

**Middle Ages** Gervase Rosser, 2015-03-19 Guilds and fraternities voluntary associations of men and women proliferated in medieval Europe The Art of Solidarity in the Middle Ages explores the motives and experiences of the many thousands of men and women who joined together in these family like societies Rarely confined to a single craft the diversity of guild membership was of its essence Setting the English evidence in a European context this study is not an institutional history but instead is concerned with the material and non material aims of the brothers and sisters of the guilds Gervase Rosser addresses the subject of medieval guilds in the context of contemporary debates surrounding the identity and fulfilment of the individual and the problematic question of his or her relationship to a larger society Unlike previous studies The Art of Solidarity in the Middle Ages does not focus on the guilds as institutions but on the social and moral processes which were catalysed by participation These bodies founded schools built bridges managed almshouses governed small towns shaped religious ritual and commemorated the dead perceiving that association with a fraternity would be a potential catalyst of personal change Participants cultivated the formation of new friendships between individuals predicated on the understanding that human fulfilment depended upon a mutually transformative engagement with others The peasants artisans and professionals who joined the guilds sought to change both their society and themselves The study sheds light on the conception and construction of society in the Middle Ages and suggests further that this evidence has implications for how we see ourselves

**Provincial Power and Absolute Monarchy** Julian Swann, 2003-08-21 This is the first book in English to study the history of the Estates General of Burgundy during the classic period of absolute monarchy Although not a representative institution in any modern sense the Estates were constantly engaged in a process of bargaining with the French crown and this book examines that relationship under the Ancien Régime Julian Swann analyses the organization membership and powers of the Estates and explores their administration their struggles for power with rival institutions and their relationship with the crown and with the Burgundian people The Estates proved remarkably resilient when confronted by the challenges posed by the Bourbon monarchy and by the reign of Louis XVI they were seemingly more powerful than ever However the desire to protect their privileges and to extend their authority had not been accompanied by an attempt to forge a meaningful relationship with the people they claimed to serve

**Middle Class Culture in the Nineteenth Century** L. Young, 2002-12-19 Drawing on expressive and material culture Young shows that money was not enough to make the genteel middle class It required exquisite self control and the right cultural capital to perform ritual etiquette and present oneself confidently yet modestly She argues that genteel culture was not merely derivative but a re working of aristocratic standards in the context of the middle class necessity to work Visible throughout the English speaking world in the 1780s 1830s and onward genteel culture reveals continuities often obscured by studies based entirely on national frameworks

essential enabling essays from an earlier period have been included They not only chart the directions taken by Shakespeare studies in the recent past but they serve to indicate the enormous and continuing vitality of the enterprise and the extent to which Shakespeare has become a metonym for literary and artistic endeavor generally
