The Persistence of Critical Theory Gabriel R. Ricci, 2017-07-05 The latest volume of Culture and Civilization gathers contemporary exponents of critical theory specifically those based in the Frankfurt School of social thinking Collectively this volume demonstrates the continuing intellectual viability of critical theory which challenges the limits of positivism and materialism We may question how the theoretical framework of Marxism fails to coordinate with the conditions that defined labor forces as did Max Horkheimer and Theodor Adorno or deliberate on the conditions that justify the claims we make through public discourse as did Jurgen Habermas Or like Axel Honneth we may reflect on recognition theory as a means of addressing social problems Whatever our objective the focus of critical theory continues to be the consciousness of established positive interests that without debate may sustain injustices or conditions which the public may not have chosen to impose Throughout the hardship of punitive dismissal and exile in the 1930s and 40s and the shock of the New Left in the 1960s and 70s and finally the later linguistic and pragmatic turn the Frankfurt School has sustained the idea that people escape disaffection and alienation when their knowledge of the social and political world is dialectically mediated through creative interaction This new volume in the Culture and Civilization series continues the tradition of critical thought

Media Bias? Tawnya J. Adkins Covert, Philo C. Wasburn, 2009-01-01 Media Bias addresses the question To what extent can mainstream news media be characterized as conservative or liberal The study involves a systematic comparative analysis of the coverage given to major domestic social issues from 1975 to 2000 by two mainstream newsmagazines Newsweek and Time and two explicitly partisan publications the conservative National Review and the liberal Progressive Working from the idea that some biased accounts of social issues can perform several positive functions for the maintenance and vitality of political democracy Adkins Covert and Wasburn offer a new methodology for analyzing bias empirically one that is capable of producing valid and reliable findings They begin by defining the meaning of bias and discuss possible methods of measuring media bias empirically and systematically By comparing each publication's coverage on poverty crime the environment and gender issues in which the line between the conservative and liberal

positions are clearly delineated the authors consider both the positive and negative consequences of media bias and how the bias plays out within a media conscious democratic society
