Revolution in the Social Sciences Bernard S. Phillips,David Christner,2012 Revolution in the Social Sciences centers on integrating knowledge from sociology psychology anthropology history political science and economics in order to confront increasing worldwide problems that threaten all of us That integration of knowledge of human behavior is essential for understanding those problems given their enormous complexity coupled with the highly specialized nature of the social sciences and their limited communication across specialized fields It carries further the ideas developed by the Sociological Imagination Group in the seven books it has published since its founding in 2000 www.sociologicalimagination.org Beyond Sociology s Tower of Babel Toward a Sociological Imagination The Invisible Crisis of Contemporary Society

Understanding Terrorism Armageddon or Evolution Bureaucratic Culture and Escalating World Problems and Saving Society

In addition to visible problems like war and terrorism with weapons of mass destruction that are becoming ever more threatening there are relatively invisible problems For example there is an increasing gap between what people throughout the world want including a decent standard of living and freedom from patterns of hatred like racism sexism and ageism and what they are in fact able to get There is then an increasing aspirations fulfillment gap largely produced by the revolution of rising expectations over the past five centuries Political leaders who attempt to confront problems can only make limited progress on them largely because of the failure of social scientists to integrate their knowledge and thus yield the understanding of these complex problems that is required Sociology of Sport and Social Theory Earl Smith,2010

Sociology of Sport and Social Theory presents current research perspectives from major sport scholars and leading sociologists regarding issues germane to the sociology of sport while addressing traditional and contemporary sociological theories Sociological Dilemmas Piotr Sztompka,2013-09-11 Sociological Dilemmas Toward a Dialectic Paradigm aims to build a new paradigm in sociological theory by using the method of dialectical critique patterned on the approach utilized by Karl Marx The book explores the sociological heritage with the theoretical works of Karl Marx as the primary basis of exposition and analysis Chapters are devoted to the discussion of the theoretical crisis of sociology the division of sociology between two opposing methodologies dissociation of sociology from the prescientific traditions of social thought and the conclusion reached by the author after an extensive analysis of sociological theories presented in the book The book will be of value to sociologists teachers and students of the social sciences **Beyond Sociology's Tower of Babel** Bernard S. Phillips,2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can be applied to human behavior If the arguments and alternative interpretations in this book on the problematic nature of sociology's use of scientific method prove to be credible and fruitful then the implications are profound For example the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior Our present approach assumes implicitly that the pieces of the human jigsaw puzzle can at some point be put together so as to yield a coherent picture Yet as Phillips shows if each piece is itself deficient then no coherent picture emerges when we attempt to put the pieces together Refusing to take the current fragmentation of sociology as inevitable Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the

hallmarks of any science His research draws heavily on the works of classical and contemporary theorists philosophers and historians of science as well as on postmodernist critiques and responses to postmodernism This reconstruction will be useful for courses in method in the study of the classical tradition of sociology Bernard Phillips was introduced to sociology at Columbia University by C Wright Mills A former professor of sociology at Boston University cofounder of the ASA Section on Sociological Practice and founder of the Sociological Imagination Group his publications emphasize methodology and theory
