Whitely,1977-04-30 **The Social Production of Scientific Knowledge** Everett Mendelsohn,Peter Weingart,Richard Whitley,1977 *The Social Production of Scientific Knowledge* E. Mendelsohn,P. Weingart,R.D. Whitely,2012-03-01 *The Social Construction of Technological Systems, anniversary edition* Wiebe E. Bijker,Thomas Parke Hughes,Trevor Pinch,2012-05-18 An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science technology and society This pioneering book first published in 1987 launched the new field of social studies of technology It introduced a method of inquiry social construction of technology or SCOT that became a key part of the wider discipline of science and technology studies The book helped the MIT Press shape its STS list and inspired the Inside Technology series The thirteen essays in the book tell stories about such varied technologies as thirteenth century galleys eighteenth century cooking stoves and twentieth century missile systems Taken together they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical social economic and political questions and they demonstrate the illuminating effects of the integration of empirics and theory The approaches in this volume collectively called SCOT after the volume s title have since broadened their scope and twenty five years after the publication of this book it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way *The Social Production of Scientific Knowledge* Everett MENDELSON,1977 *Handbook of Social Theory* George Ritzer,Barry Smart,2003-07-26 The Handbook of Social Theory presents an authoritative and panoramic critical survey of the development achievement and prospects of social theory **International Scientific Relations** Francisco Del Canto Viterale,2021-08-17 International Scientific Relations offers a holistic analysis of the role and impact of science technology and innovation in the international system of the twenty first century *Profiles in Contemporary Social Theory* Anthony Elliott,Bryan S Turner,2001-07-23 This comprehensive book provides an indispensable introduction to the most significant figures in contemporary social theory Grounded strongly in the European tradition the profiles include Michel Foucault J um urgen Habermas Roland Barthes Jean Baudrillard Pierre Bourdieu Zygmunt Bauman Martin Heidegger Frederic Jameson Richard Rorty Nancy Chodorow Anthony Giddens Stuart Hall Luce Irigaray and Donna Haraway In guiding students through the key figures in an accessible and authoritative fashion the book provides detailed accounts of the development of the work of major social theorists and charts the relationship between different traditions of social cultural and political thought **The Social Construction of Disease** Kiheung Kim,2006-11-22 A historical exploration of scientific disputes on the causation of so called prion diseases this fascinating book covers diseases including Scrapie Creutzfeldt Jakob Disease CJD and Bovine Spongiform Encephalopathy BSE Firstly tracing the twentieth century history of disease research and biomedicine the text then focuses

on the relations between scientific practice and wider social transformations before finally building upon the sociologically informed methodological framework. Incisive and thought provoking *The Social Construction of Disease* provides a valuable contribution to that well established tradition of social history of science which refers primarily to the theoretical works of the sociology of scientific knowledge. **The Feminist Standpoint Theory Reader** Sandra G. Harding, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company. **The Manufacture of Knowledge** K.D. Knorr-Cetina, 2013-10-22 The anthropological approach is the central focus of this study. Laboratories are looked upon with the innocent eye of the traveller in exotic lands and the societies found in these places are observed with the objective yet compassionate eye of the visitor from a quite other cultural milieu. There are many surprises that await us if we enter a laboratory in this frame of mind. This study is a realistic enterprise an attempt to truly represent the social order of life in laboratories and institutes of research just as they are. By bringing the philosophical issues to the surface as matters not of prejudgement but as matters of concern Karin Knorr Cetina has developed the first really positive challenge to the philosophy of science since the days of paradigms and internal definitions of meanings. Governing and Managing Knowledge in Asia Thomas Menkhoff, Hans-Dieter Evers, Yue Wah Chay, 2005 The spread of knowledge is a significant consequence of the process of globalization. Knowledge is used to tackle very diverse issues such as development challenges in emerging markets or the perplexity of corporate decision makers in the business world. The creation and proper governance of actionable knowledge and intellectual capital have become key preconditions for sustained societal and corporate competitiveness in an era of rapid globalization presenting new opportunities and challenges for policy makers, business leaders, managers and employees in both public and private sector organisations. This helpful book analyzes both the theoretical and practical aspects of effective knowledge governance and knowledge management in the context of an increasingly competitive globalized marketplace. Several case studies of Asian countries and organizations are presented aimed at analyzing factors impacting the governance of knowledge and exemplifying practices that policy makers and business leaders adopted to manage knowledge resources and knowledge processes to their fullest potential. *Scientific Knowledge* Barry Barnes, David Bloor, John Henry, 1996-07-15 Although science was once seen as the product of individual great men working in isolation we now realize that like any other creative activity science is a highly social enterprise influenced in subtle as well as obvious ways by the wider culture and values of its time. *Scientific Knowledge* is the first introduction to social studies of scientific knowledge. The authors all noted for their contributions to science studies have organized this book so that each chapter examines a key step in the process of doing science. Using case studies from cognitive science, physics and biology to illustrate their descriptions and applications of the social study of science they show how this approach provides a crucial perspective on how science is actually done. *Scientific Knowledge* will be of interest not only to those engaged in science studies but also to anyone interested in the practice of science. **Science and the**

Sociology of Knowledge (RLE Social Theory) Michael Mulkay, 2014-08-07 How far is scientific knowledge a product of social life In addressing this question the major contributors to the sociology of knowledge have agreed that the conclusions of science are dependent on social action only in a very special and limited sense In Science and the Sociology of Knowledge Michael Mulkay's first aim is to identify the philosophical assumptions which have led to this view of science as special and to present a systematic critique of the standard philosophical account of science showing that there are no valid epistemological grounds for excluding scientific knowledge from the scope of sociological analysis The rest of the book is devoted to developing a preliminary interpretation of the social creation of scientific knowledge The processes of knowledge creation are delineated through a close examination of recent case studies of scientific developments Dr Mulkay argues that knowledge is produced by means of negotiation the outcome of which depends on the participants use of social as well as technical resources The analysis also shows how cultural resources are taken over from the broader social milieu and incorporated into the body of certified knowledge and how in the political context of society at large scientists technical as well as social claims are conditioned and affected by their social position

An Invitation to Social Construction
