Social Protest And Policy Change Ecology Antinuclear And Peace Movements In Comparative Perspective:

Social Protest and Policy Change Marco Giugni, 2004-06-10 While movement activists spend much of their time and energy trying to change the world and we think that social movements often matter our theoretical and empirical knowledge in this field is still relatively poor *Social Protest and Policy Change* offers a systematic and empirically grounded analysis of the impact of three major contemporary movements on public policy Following a comparative and historical perspective the author argues that the policy impact of social movements is facilitated by the presence of favorable political opportunity structures and more precisely by the presence of institutional allies among the elites and by a favorable public opinion Furthermore the very content of the movements demands also plays a role insofar as the power holders are more willing to make concessions on certain issues than on others On the basis of a historical overview of the mobilization of ecology antinuclear and peace movements in the United States Italy and Switzerland and using a unique body of original data the book presents the results of time series analyses showing the joint effect of protest political alliances and shifts in public opinion for movements that do not address issues that pose too serious a threat to the power holders Global Justice Activism and Policy Reform in Europe Peter Utting, Mario Pianta, Annekathrin Ellersiek, 2012 Civil society activism around issues of global justice has proliferated in Europe during the past two decades Has such contestation and advocacy made a difference This book examines whether and how the organizations networks and campaigns involved have attained their policy objectives in the areas of debt relief international trade international taxation and corporate accountability The analysis also considers the relationship between national and transnational activism By comparing variations in the activism policy nexus in France Italy and the United Kingdom it seeks to understand how such interaction and policy outcomes vary in different institutional and political contexts *Handbook of Social Movements Across Disciplines* Bert Klandermans, Conny Roggeband, 2009-12-18 This book aims to revisit the interdisciplinary roots of social movement studies Each discipline raises its own questions and approaches the subject from a different angle or perspective The chapters of this handbook are written by internationally renowned scholars representing the various disciplines involved They each review the approach their sector has developed and discuss their disciplines contributions and insights to the knowledge of social movements Furthermore each chapter addresses the unanswered questions and discusses the overlaps with other fields as well as reviewing the interdisciplinary advances so far *The Politics of War Memory in Japan* Kamila Szczepanska, 2014-05-09 Since the 1990s questions of Japanese wartime conduct apologies for aggression and compensation to former victims of the country's imperial policies have been brought to the fore of national and regional politics The state is undoubtedly the most important actor in the process of memory production and along with conservative legislators and the grass root revisionist movement there has been a consistent trend towards denying or undermining the existing acknowledgments of responsibility for Japan's wartime past However to fully comprehend war memory in Japan due attention must be paid to competing

discourses that demand an alternative view and only then can the complexity of Japanese war memory and attitudes towards the legacies of the Asia Pacific war be understood The Politics of War Memory in Japan examines the involvement of five civil society actors in the struggle over remembering and addressing the wartime past in Japan today In studying progressive war memory activists it quickly becomes clear that the apologia by conservative politicians cannot be treated as representative of the opinion of the majority of the Japanese public Indeed this book seeks to remedy the disparity between studies devoted to the official level of addressing the history issue and the grass root historical revisionist movement on the one side and progressive activism on the other Furthermore it contributes to scholarly debates on the state of civil society in Japan challenging the characterisation of Japanese civil society as a depoliticised space by demonstrating a more contentious side of civil society activism Drawing important new empirical research this book will be of huge interest to students and scholars of Japanese civil society Japanese politics Japanese history and memory in Japan

The Politics of Nuclear Energy in Western Europe Wolfgang C. Müller, Paul W. Thurner, 2018-01-26 This volume investigates nuclear energy policies in Western Europe over the entire post war period but with special attention to the two most recent decades The comparative analytical perspective draws on the interplay between voters attitudes challenging movements party competition and coalition formation Spanning more than 60 years and 16 countries the researchers examine the underlying causal processes leading to the observed varieties of Western European nuclear energy policies Based on a mixed methods approach using both structured case studies as well as quantitative analyses the study shows that the nature of party competition under given institutional contexts is a key driver for as a rule tactically motivated governmental policy changes and stability respectively Part I introduces the practical and theoretical relevance of the topic It outlines the reasoning of the major scientific contributions with regard to nuclear energy policies and offers a theoretical alternative to the previous literatures that has been predominantly movements oriented Additionally it provides core economic and political indicators of the changing role of nuclear energy in the countries Part II consists of seven in depth case studies where the outlined theoretical perspective is applied Part III consists of a general summary short narratives of the countries not covered in case studies qualitative comparison and an assessment of the factors for policy change from multivariate analysis

The Oxford Handbook of Political Participation Marco Giugni, Maria Grasso, 2022-06-16 The Oxford Handbook of Political Participation provides the first comprehensive up to date treatment of political participation in all its varied forms investigates a wide range of topics in the field from both a theoretical and methodological perspective and covers the most recent developments in the area It brings together research traditions from political science and sociology bridging the gap in particular between political sociology and social movement studies contributions also draw on crucial work in psychology economics anthropology and geography Following a detailed introduction from the editors the volume is divided into nine parts that explore political participation across disciplines core theoretical perspectives methodological approaches modes of

participation contexts determinants processes outcomes and current trends and future directions The book will be a valuable reference work for anyone interested in understanding political participation and related themes **The Routledge**

Handbook of Environmental Movements Maria Grasso, Marco Giugni, 2022-01-31 This handbook provides readers with up to date knowledge on environmental movements and activism and is a reference point for international work in the field It offers an assessment of environmental movements in different regions of the world macrostructural conditions and processes underlying their mobilization the microstructural and social psychological dimensions of environmental movements and activism and current trends as well as prospects for environmental movements and social change The handbook provides critical reviews and appraisals of the current state of the art and future development of conceptual and theoretical approaches as well as empirical knowledge and understanding of environmental movements and activism It encourages dialogue across the disciplinary barriers between social movement studies and other perspectives and reflects upon the causes and consequences of citizens participation in environmental movements and activities The volume brings historical studies of environmentalism sociological analyses of the social composition of participants in and sympathizers of environmental movements investigations by political scientists on the conditions and processes underlying environmental movements and activism and other disciplinary inquiries together while keeping a clear focus within social movement theory and research as the main lines of inquiry The handbook is an essential guide and reference point not only for researchers but also for undergraduate and graduate teaching and for policymakers and activists Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY NC ND 4.0 license

Europeanizing Contention Pierre Monforte, 2014-04-01 What are the consequences of European integration on social movements Who are the winners and the losers of Europe's organized civil society This book explores the Europeanization of contention through an in depth comparative analysis of French and German pro asylum movements since the end of the 1990s Through an examination of their networks discourses and collective actions it shows that the groups composing these movements display different degrees and forms of Europeanization reflected in different fields of protest More generally it shows the multiple strategies implemented by activists to Europeanize their scope of mobilization and by doing so participate in the construction of a European public sphere **International Cooperation Against All Odds** Mai'a K. Davis

Cross, 2024 International Cooperation Against All Odds The Ultrasocial World recasts how we understand international relations through an examination of how the human evolutionary predisposition to be ultrasocial as a species impacts which political ideas succeed transform manipulate and inspire on a global scale At a time when pessimism about our current world order is at an all time high this book overturns widespread assumptions that international relations is mainly about conflict power and national self interest In the last 10-20 years scientists have discovered that as a species we are biologically hard wired soft wired and pre wired to be other regarding and cooperative Humans are an ultrasocial species and yet this

predisposition is completely ignored in governments across the world Political leaders experts and the media have cultivated a myopic vision of global conflict feeding an obsession on crises of the moment rather than recognizing frequent and significant breakthroughs in peaceful cooperation and overall trends in the decline of violence This book shows how time and time again our ultrasocial predisposition has pushed us towards big ideas that inspire and bring us together around the power of possibility Featuring original research on international cooperation in outer space exploration European Union integration nuclear weapons and climate change among other examples Mai a K Davis Cross shows ultrasociality at work in a range of contexts Tracing the path from social neuroscience and evolutionary biology among others to the power of ideas to international agreements International Cooperation Against All Odds opens up an entirely new understanding of world politics If we recognize our nature as a species and the potential we have to work together we can start to transform institutions and devise policies that take advantage of this The book ends with a roadmap to promote more international cooperation and eventually a more stable peaceful world order

The Politics of Environmental Performance Detlef Jahn, 2016-10-27 Machine generated contents note 1 Introduction Part I Approach Method and Concepts 2 Explaining environmental performance 3 Preferences in environmental politics 4 The institutional settings in 21 OECD countries Part II Environmental Performance in 21 OECD Countries 5 Measuring environmental performance 6 Aggregating environmental performance data Part III Analysis 7 Domestic politics 8 International politics 9 The nexus of domestic and international politics 10 Conclusion

The Fight for Ethical Fashion Philip Balsiger, 2016-03-16 From consumer boycotts and buycotts to social movement campaigns examples of individual and collective actors forging political struggles on markets are manifold The clothing market has been a privileged site for such contention with global clothing brands and retailers being targets of consumer mobilization for the past 20 years Labels and product lines now attest for the ethical quality of clothes which has in turn given rise to ethical fashion The Fight for Ethical Fashion unveils the actors and processes that have driven this market transformation through a detailed study of the Europe wide coordinated campaign on workers rights in the global textile industry the Clean Clothes Campaign Drawing on insights from qualitative fieldwork using a wide range of empirical sources Philip Balsiger traces the emergence of this campaign back to the rise of consumer campaigns and shows how tactics were adapted to market contexts in order to have retailers adopt and monitor codes of conduct By comparing the interactions between campaigners and their corporate targets in Switzerland and France two countries with a very different history of consumer mobilization for political issues this ground breaking book also reveals how one campaign can provoke contrasting reactions and forms of market change

Social Informatics Tie-Yan Liu, Christie Napa Scollon, Wenwu Zhu, 2015-12-01 This book constitutes the proceedings of the 7th International Conference on Social Informatics SocInfo 2015 held in Beijing China in December 2015 The 19 papers presented in this volume were carefully reviewed and selected from 42 submissions They cover topics such as user modeling opinion mining user behavior and crowd sourcing

Conventional Versus

Non-conventional Political Participation in Turkey Cristiano Bee, Ayhan Kaya, 2018-12-07 This book focuses on the emergence of different forms of civic and political activism in Turkey. It has taken into account different components of active citizenship specifically looking at the development of civic and political forms of activism that bridge the realms of conventional and non-conventional participation. Focusing on the effects of the 2013 Gezi Park protests which originated in Istanbul but spread throughout the country, this book reflects on how this experience might re-orient current civic and political participation in Turkey. Specifically focusing on the main dynamics of non-conventional forms of civic and political activism, this volume attempts to understand the impact of non-conventional forms of political participation on voting behaviour. The internal domestic conditions of the country as well as its role in the international arena have dramatically changed since 2013 and are constantly evolving due to the domestic societal and political cleavages and the regional problems in the Middle East. Yet the papers in the book reflect upon the significance of occupygezi nowadays demonstrating not only its importance in questioning the link between the patrimonial state and its citizens but also for stimulating participatory behaviours. The chapters originally published as a special issue in *Turkish Studies*. Europeanisation of the Contemporary Far Right Anita Nissen, 2022-03-03 *Europeanisation of the Contemporary Far Right* explores the role of transnational European identity in far-right mobilisation strategies. Focusing on the national members of two trans-European far-right coalitions, Generation Identity and Fortress Europe, the author explores the extent to which European far-right extra-parliamentary actors Europeanise their mobilisation. Drawing on social movement literature, the book argues that national extra-parliamentary actors' Europeanisation processes are influenced by their political and discursive opportunities and resources. Focusing on the groups' mobilisation during the refugee crisis 2015-2017, the analysis considers the groups' frames, collective action and coalition building in the period, finding that the depth of the groups' resources particularly affects their capacity to mobilise. This book will be of interest to scholars, students and civil society actors in fields related to the far-right, European studies, social movements and migration. *Introducing Comparative Politics* Stephen Orvis, Carol Ann Drogus, 2020-01-07 The graphics in the book are extremely reader-friendly. The language is clear and easy for students to follow. Instructor resources are quite helpful and a key part of my decision-making. Overall, this is the best comparative politics text for undergrads that I have found. It covers all the important topics in the field and presents them in a way that is accessible to students. Laura N. Bell, West Texas A.M. University. Organized thematically around important questions in comparative politics: who rules? what explains political behavior? where and why? *Introducing Comparative Politics*, Fifth Edition, integrates a set of extended case studies of 11 countries that vividly illustrate issues in cross-national context. Serving as touchstones, the cases are placed within the chapters where they make the most sense, not separated from the theory or in a separate volume, helping students make connections between the two earlier in the semester. The book's hybrid organization gives students a more holistic view of comparative politics. A Complete Teaching Learning Package (LMS Cartridge) formally

known as SAGE Coursepacks Import this title's instructor resources into your school's learning management system LMS and save time Don't use an LMS You can still access all of the same online resources for this title via the password protected Instructor Resource Site SAGE Edge FREE online resources for students that make learning easier SAGE course outcomes Measure Results Track Success Outlined in your text and mapped to chapter learning objectives SAGE course outcomes are crafted with specific course outcomes in mind and vetted by advisors in the field See how SAGE course outcomes tie in with this book's chapter level objectives

Contentious Agency and Natural Resource Politics Markus Kröger, 2013-11-26 The looming depletion of non renewable resources has increased the global land grab in the past decade So far however the question of how and when people can influence economic outcomes has received little attention in the study of social movements Based on in depth ethnographic field research since 2003 in the industrial forestry expansion frontiers in Brazil and elsewhere in the global South this book presents a novel theory to explain how the interaction between resistance companies and the state determines investment outcomes The promotion of contentious agency by organizing and politicizing campaigning protesting networking and engaging in state and corporate remediated politics whilst maintaining autonomy is central to explaining how impacted people influence resource flows and block or slow projects they deem harmful to their livelihoods and the environment The conflicts between globalizing paper and pulp corporations and the landless peasants indigenous communities and other parties with alternative projects for the planet's future are studied to illustrate how a great transformation can be built upon progressive counter movements This systematic comparison of several cases illustrates the broader principles and problems endemic to the global political economy *Contentious Agency and Natural Resource Politics* will be of strong interest to students and scholars of international relations international political economy environmental studies environmental politics sociology and social movement studies

Contested Water Joanna L. Robinson, 2013-03-15 An examination of anti water privatization movements in the United States and Canada that explores the interplay of the local and the global Attempts by local governments to privatize water services have met with furious opposition Activists argue that to give private companies control of the water supply is to turn water from a common resource into a marketized commodity Moreover to cede local power to a global corporation puts communities at the center of controversies over economic globalization In *Contested Water* Joanna Robinson examines local social movement organizing against water privatization looking closely at battles for control of local water services in Stockton California and Vancouver British Columbia The movements in these two communities had different trajectories used different tactics and experienced different outcomes Robinson analyzes the factors that shaped these two struggles Drawing on extensive interviews with movement actors political leaders and policymakers and detailed analysis of textual material Robinson shows that the successful campaign in Vancouver drew on tactics opportunities and narratives from the broader antiglobalization movement with activists emphasizing the threats to local democracy and accountability the less successful movement in Stockton

centered on a ballot initiative that was made meaningless by a pre-emptive city council vote Robinson finds that global forces are reshaping local movements particularly those that oppose neoliberal reforms at the municipal level She argues that anti-water privatization movements that link local and international concerns and build wide-ranging coalitions at local and global levels offer an effective way to counter economic globalization Successful challenges to globalization will not necessarily come from transnational movements but rather from movements that are connected globally but rooted in local communities

The Anti-Nuclear Power Movement and Discourses of Energy Justice Jesse P. Van Gerven, 2022-01-31 Jesse P Van Gerven critically analyzes the movement for a carbon free and nuclear free energy future in the U S using an environmental justice framework Van Gerven explores how different social and environmental justice discourses are constructed through the claims of social movement organizations This study shows how ideas of distribution recognition and representation structure the arguments made by anti nuclear groups against the production of nuclear power Through this analysis the author identifies general principals of energy justice These principles can guide future energy policy and energy system development to ensure social and environmental justice *Critical Environmental Politics* Carl Death, 2013-12-04 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions problems and research agendas in the field The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism and spanning disciplines including international relations geography sociology history philosophy anthropology and political science The 28 chapters cover a range of global and local studies illustrations and cases These range from the Cochabamba conference in Bolivia to climate camps in the UK UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands forests in Indonesia to Dutch energy governance reform indigenous communities in Namibia to oil extraction in the Niger Delta survivalist militias in the USA to Maasai tribesmen in Kenya Rather than following a regional or issue based e g water forests pollution etc structure the volume is organised in terms of key concepts in the field including those which have been central to the social sciences for a long time such as citizenship commodification consumption feminism justice movements science security the state summits and technology those which have been at the heart of environmental politics for many years including biodiversity climate change conservation eco-centrism limits localism resources sacrifice and sustainability and many which have been introduced to these literatures and debates more recently biopolitics governance governmentality hybridity posthumanism risk and vulnerability Features and benefits of the book Explains the most important concepts and theories in environmental politics Reviews the core ideas behind crucial debates in environmental politics Highlights the key thinkers both classic and contemporary for studying environmental politics Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics Each chapter is written by leading international authors in their field This exciting new volume will be essential textbook reading for all students of environmental politics as well as provocatively

presenting the field in a different light for more established researchers **Socializing Development** Leon Valentin Schettler, 2020-03-03 As Multilateral Development Banks increasingly gained influence in shaping global development transnational social movements pushed to hold them accountable for their human rights impact towards communities Leon Valentin Schettler presents a novel causal mechanism of movement advocacy towards MDBs combining disruptive and conventional tactics Systematically comparing the evolution of human rights standards and complaint mechanisms over the last three decades he reveals how the combination of 1 declining US hegemony 2 counter mobilization by China and 3 movement cooptation by the World Bank bureaucracy led to a dilution of human rights accountability in the 2010s
