## **Social Structure Studies Presented:**

**Social Structure** Alfred Reginald Radcliffe-Brown, 1963      **The Theory of Social Structure** S.F. Nadel, 2013-11-05

The main feature of this book is a discussion of role analysis and its relevance to social structure Arguing that the role system of a society is the matrix of its social structure the author presents a detailed theoretical analysis of the problems inherent in this approach Chapters cover The problems of role analysis Conformity and deviance The coherence of role systems Degrees of abstraction Structure time and reality Originally published in 1957      **The Essential Edmund Leach: Anthropology and society** Edmund Ronald Leach, Senior Research Fellow James Laidlaw, 2000-01-01 This volume contains a selection of Edmund Leach's writings on society taken largely though not exclusively from the early part of his career It includes such essays as Rethinking Anthropology and extracts from Political Systems of Highland Burma      *Social Structure. Leaf, 2010-10-01 In the 1930s George Herbert Mead and other leading social scientists established the modern empirical analysis of social interaction and communication enabling theories of cognitive development language acquisition interaction government law and legal processes and the social construction of the self However they could not provide a comparably empirical analysis of human organization The theory in this book fills in the missing analysis of organizations and specifies more precisely the pragmatic analysis of communication with an adaptation of information theory to ordinary unmediated communications The study also provides the theoretical basis for understanding the success of pragmatically grounded public policies from the New Deal through the postwar reconstruction of Europe and Japan to the ongoing development of the European Union in contrast to the persistent failure of positivistic and Marxist policies and programs

Middle Class African Marriage Christine Oppong, 2023-07-05 In the 1970s among peoples of the third world migration paid employment and urban living had caused changes in domestic economies in decision making in households and in the sexual division of labour and power This was particularly so in areas formerly subjected to colonial domination and therefore the influence of European mores and institutions This book previously published in 1974 as Marriage Among a Matrilineal Elite this edition in 1981 provides one of the few detailed accounts of such changes by a writer who has lived the kind of life she describes that of the urban educated Akan of Southern Ghana people who have migrated from farming and fishing villages to Accra the capital to find employment in government institutions after protracted higher education often overseas The study is

particularly interesting because it focuses upon people from an ethnic area practicing matrilineal descent and inheritance in which women and men have traditionally both worked in agriculture in which husbands and wives have customarily resided in separate houses affording both sexes considerable autonomy as spouses and in which women have held important political offices as well as sharing responsibilities for maintenance of dependent children Akan women provide an important model of responsible energetic females who have in the past and to some extent in the present avoided the domestic trap of wifely dependence But as we read the trap is open to those who forsake traditional patterns of economic endeavour or whose resources vis vis their men folk are reduced The book was also a significant contribution to the comparative sociology of the family at the time providing an exercise in methodology in which the aim has been to evolve ways of documenting and comparing two major aspects of change in conjugal family relationships On one hand the division of labour resources and power between spouses the jointness or segregation of the conjugal role relationship and on the other the extent to which the conjugal family is a functionally discrete unit in a number of domestic activity areas in popular and ambiguous terms whether the family is extended or nuclear The use of sociological concepts developed in other areas of the world gives this book a significant position in the development of a cross culturally valid sociology of the family The subject matter and conceptual frameworks used here will thus be of interest to sociologists economists and anthropologists in general and to specialists in African and Black studies Women s Studies and Sex Roles in particular as well as to the male and female feminists around the world

An Inquiry Into the Nature of the Family , **Ethnography and the Historical Imagination** John

Comaroff, Jean Comaroff, 2019-04-02 Over the years John and Jean Comaroff have broadened the study of culture and society with their reflections on power and meaning In their work on Africa and colonialism they have explored some of the fundamental questions of social science delving into the nature of history and human agency culture and consciousness ritual and representation How are human differences constructed and institutionalized transformed and sometimes effaced empowered and sometimes resisted How do local cultures articulate with global forms How is the power of some people over others built sustained eroded and negated How does the social imagination take shape in novel yet collectively meaningful ways Addressing these questions the essays in this volume several never before published work toward an imaginative sociology demonstrating the techniques by which social science may capture the contexts that human beings construct and inhabit In the introduction the authors offer their most complete statement to date on the nature of historical anthropology Standing apart from the traditional disciplines of social history and modernist social science their work is dedicated to discovering how human worlds are made and signified forgotten and remade
