Rhoads, 1991 *Critical Issues in Social Theory* is an analytical survey of persistent controversies that have shaped the field of sociology It defines clarifies and proposes solutions to these critical issues through commentary on the writings of such influential social theorists as Hobbes Marx Durkheim Weber Mead Merton Parsons and Schutz Instead of being just another history or another classification of theories Rhoads's four part model allows him to focus attention on issues that remain at the core of sociological theory today First Rhoads analyzes the controversy over positivism as the proper methodological model for the study of human society Is there one science of which sociology is a branch or do the peculiarities of sociology's subject matter require a modification of the scientific method borrowed from the natural sciences Rhoads next considers the relationship of individuals to society and its structures Does society have a mode of existence distinct from its members or is it merely an abstraction derived from the characteristics of individuals Third a discussion of social order raises the question of whether social order is the consequence of rules and their underlying moral values or the product of continuous construction based on self interest Finally the relative importance of consensus and conflict in social relationships is addressed Is society better understood as a community united by beliefs values and rules or is the social dynamic of continual conflict over beliefs values and rules more fundamental In coming to grips with these issues the author in some instances takes sides and in others arrives at a synthesis of diverse perspectives In the final

chapter he points to the limitations on the possibility of rational action that come to light in the clashes over these basic issues
