Social Transformation And Private Education In China:

Social Transformation and Private Education in China Jing Lin, 1999-10-30 Private schools resurfaced in China after 1978 when the Chinese government embarked on an economic reform for modernization This book offers a comprehensive review of the development characteristics issues and problems of private schools at primary secondary and university levels especially elite private schools for children of very wealthy families Based on fieldwork at about 40 private and public schools in China this study also critically examines social response and government reactions to private education development and ends with reflections on its significance and future prospects touching on issues concerning social equality efficiency public school reform and democratization in China

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country's flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country's existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes

Gridlock and Solutions Shui Bing, **Education and Social Change in China: Inequality in a Market Economy** Gerard A. Postiglione, 2015-01-28 Market reform financial decentralization and economic globalization have greatly accentuated China's social and regional inequalities Education is expected to address these inequalities in a context of rapid social change including the rise of an urban middle class changed status of women resurgence of ethnic identities growing rural to urban migration and lingering poverty in remote areas But some argue that state policies have not sufficiently addressed inequitable practices and that schools actually perpetuate and reproduce

inequities giving rise to a new system of social stratification driven more by market forces than socialist principles Featuring all original previously unpublished material this volume examines this argument through analysis of selected aspects of educational stratification in China during the reform era Chapters focus on the new urban middle class poor rural residents the migrant population in urban areas rural girls and ethnic minorities The contributors are established scholars in the field and they build a conceptual framework for assessing the degree to which China's educational reforms are inclusive equitable and integrative across social categories and groups

John Dewey, Liang Shuming, and China's Education Reform

Huajun Zhang, 2013-04-19 This book explores the central question of how to cultivate a continued sense of self in the radically changing Chinese society a question that is highly related to the current ongoing educational reform If education cannot respond to the problem of students disconnection from the changing society learning cannot truly happen in school and the reform will fail Zhang suggests a philosophy of education that highlights the cultivation of students' unique but inclusive individuality so that students learn how to nurture their own mind in this profoundly changing society rather than becoming empty and lost The discussion of this proposed question is inspired by the thoughts of the American pragmatist John Dewey and Chinese Confucian scholar Liang Shuming It is not the author's intention to have a pure philosophical discussion but rather to refer to their philosophies to help answer the practical question of cultivating individuality in an educational setting during this period of China's modern transition

Education and Reform in China Emily Hannum, Albert Park, 2012-11-12 Transformative market reforms in China since the late 1970s have improved living standards dramatically but have also led to unprecedented economic inequality During this period China's educational system was restructured to support economic development with educational reforms occurring at a startling pace Today the educational system has diversified in structure finance and content it has become more market oriented and it is serving an increasingly diverse student population These changes carry significant consequences for China's social mobility and inequality and future economic prospects In Education and Reform in China leading scholars in the fields of education sociology demography and economics investigate the evolution of educational access and attainment educational quality and the economic consequences of being educated Education and Reform in China shows that economic advancement is increasingly tied to education in China even as educational services are increasingly marketized The volume investigates the varying impact of change for different social ethnic economic and geographic groups Offering interdisciplinary views on the changing role of education in Chinese society and on China's educational achievements and policy challenges this book will be an important resource for those interested in education public policy and development issues in China
