Brad Wray, 2011-09-29 Kuhn's Structure of Scientific Revolutions 1962 has been enduringly influential in philosophy of science challenging many common presuppositions about the nature of science and the growth of scientific knowledge However philosophers have misunderstood Kuhn's view treating him as a relativist or social constructionist In this book Brad Wray argues that Kuhn provides a useful framework for developing an epistemology of science that takes account of the constructive role that social factors play in scientific inquiry He examines the core concepts of Structure and explains the main characteristics of both Kuhn's evolutionary epistemology and his social epistemology relating Structure to Kuhn's developed view presented in his later writings The discussion includes analyses of the Copernican revolution in astronomy and the plate tectonics revolution in geology The book will be useful for scholars working in science studies sociologists and historians of science as well as philosophers of science

Socializing Epistemology Frederick F. Schmitt, 1994 In this wide ranging collection of never before published essays distinguished scholars in the fields of philosophy and economics examine such questions as whether testimony is a basic source of knowledge the degree to which notions of a good argument are determined by speakers and their audiences the role of individual biases in the development of science and the social aspects of group belief and group justification The collection ends with the first comprehensive bibliography of social epistemology

Social Epistemology Steve Fuller, 2002 This is the book that launched the research program of social epistemology which has fuelled imaginations and provoked debates across many disciplines around the world Its opening question remains as pressing as ever How should knowledge production be organised The second edition contains a substantial new introduction in which Fuller reflects on social epistemology's place in the history of analytic and continental epistemology and discusses the inspiration he has drawn from a wide variety of fields in the humanities and social sciences It also includes a spirited attack on alternative philosophical groundings for social epistemology and a detailed response to the standard criticism that social epistemology has received from realist philosophers and natural scientists during the Science Wars In Social Epistemology Fuller seeks to reconcile normative philosophy of science and empirical sociology of knowledge He reinterprets key problems in the philosophy of science such as realism the nature of objectivity the demarcation of science from other disciplines and the nature of our knowledge of other times and places In the course of this reinterpretation which draws on concepts and arguments from

many branches of the humanities and social sciences Fuller considers such philosophically neglected questions as How is the burden of proof determined in science On what basis is the historian licensed to say that a consensus has been reached on a scientific claim What implications do our patently imperfect means of linguistic transmission have for the notion that science retains and accumulates knowledge Finally Fuller proposes a course of Knowledge Policy Studies designed to make the theory of knowledge a branch of political theory and thereby to hasten the evolution of the epistemologist into a knowledge policy maker In its new edition the book remains a provocative contribution to the debate on the production dissemination and interpretation of knowledge in the sciences

Social Epistemology Adrian Haddock, Duncan Pritchard, 2010 Recent epistemology has reflected a growing interest in the social dimension of the subject This volume presents new work by leading philosophers on a wide range of topics in social epistemology such as the nature of testimony the epistemology of disagreement and the social genealogy of the concept of knowledge

Social Epistemology Alvin Goldman, Dennis Whitcomb, 2011-02-11 What if anything justifies us in believing the testimony of others How should we react to disagreement between ourselves and our peers and to disagreement among the experts when we ourselves are novices Can beliefs be held by groups of people in addition to the people composing those groups And if so how should groups go about forming their beliefs How should we design social systems such as legal juries and scientific research sharing schemes to promote knowledge among the people who engage in them When different groups of people judge different beliefs to be justified how can we tell which groups are correct These questions are at the heart of the vital discipline of social epistemology The classic articles in this volume address these questions in ways that are both cutting edge and easy to understand This volume will be of great interest to scholars and students in epistemology

Reider, 2016-07-15 The field of epistemology is undergoing significant changes Primary among these changes is an ever growing appreciation for the role social influences play on one's ability to acquire and assess knowledge claims Arguably social epistemology's greatest influence on traditional epistemology is its stance on decentralizing the epistemic agent In other words its practitioners have actively sought to dispel the claim that individuals can be solely responsible for the assessment acquisition dissemination and retention of knowledge This view opposes traditional epistemology which tends to focus on the individual's capacity to form and access knowledge claims independent of his or her relationship to society Social Epistemology and Epistemic Agency is an essential resource for academics and students who ask in what manner does society engender its members with the ability to act as epistemic agents what actions constitute epistemic agency and what type of beings can be epistemic agents
