**Furniture-Makers and Consumers in England, 1754-1851** Akiko Shimbo, 2016-04-15 Covering the period from the publication of Thomas Chippendale's *The Gentleman and Cabinet Makers Director* 1754 to the Great Exhibition 1851 this book analyses the relationships between producer retailers and consumers of furniture and interior design and explores what effect dialogues surrounding these transactions had on the standardisation of furniture production during this period This was an era before mass production when domestic furniture was made both to order and from standard patterns and negotiations between producers and consumers formed a crucial part of the design and production process This study narrows in on three main areas of this process the role of pattern books and their readers the construction of taste and style through negotiation and daily interactions through showrooms and other services to reveal the complexities of English material culture in a period of industrialisation

*Louise Brigham and the Early History of Sustainable Furniture Design* Antoinette LaFarge, 2019-10-24 During the Progressive Era a time when the field of design was dominated almost entirely by men a largely forgotten activist and teacher named Louise Brigham became a pioneer of sustainable furniture design With her ingenious system for building inexpensive but sturdy box furniture out of recycled materials she aimed to bring good design to the urban working class As Antoinette LaFarge shows Brigham forged a singular career for herself that embraced working in the American and European settlement movements publishing a book of box furniture designs running carpentry workshops in New York and founding a company that offered some of the earliest ready to assemble furniture in the United States Her work was a resounding critique of capitalism's waste and an assertion of new values in design values that stand at the heart of today's open and green design movements

**A Cultural History of Furniture in the Age of Empire and Industry** Catherine L. Futter, Christina M. Anderson, 2022-02-24 The 19th century in Western culture was a time of both confidence and turbulence Industrial development produced a growing middle class as well as efficiency convenience and innovation across a range of fields from engineering to architecture Alongside these improvements the century began with the extended period of the Napoleonic Wars and was further disrupted by rebellions and revolutions both within Europe and in India South America and other parts of the world Slavery was abolished and urbanization increased dramatically These myriad developments were reflected throughout the period in the proliferation of

types of furniture along with their categorization as industrial art at the international exhibitions and world fairs and the increasingly adventurous range of materials that were sometimes used in their construction. Nonetheless a strong antiquarian historicist strand also prompted interest in the revival of past styles in areas of art and design including furniture. Drawing upon a wealth of visual and textual sources this volume of *A Cultural History of Furniture* presents essays that examine key characteristics of the furniture of the period on the themes of design and motifs, makers, making and materials, types and uses, the domestic setting, the public setting, exhibition and display, furniture and architecture, visual representations and verbal representations.

**Eighteenth-Century Furniture** Clive Edwards, 1996 The eighteenth century has been seen as a Golden Age of design and craftsmanship. This book goes well beyond these ideas and investigates the various developments in the infrastructure of the eighteenth century furniture world.

*Faulkner and Material Culture* Joseph R. Urgo, Ann J. Abadie, 2009-09-18 Photographs of lumber, airplanes, hand hewn coffins in every William Faulkner novel and short story: worldly material abounds. The essays in *Faulkner and Material Culture* provide a fresh understanding of the things Faulkner brought from the world around him to the one he created. Charles S. Aiken surveys Faulkner's representation of terrain and concludes, contrary to established criticism, that to Faulkner Yoknapatawpha was not a microcosm of the South but a very particular and quite specifically located place. Jay Watson works with literary theory, philosophy, the history of woodworking and furniture making and social and intellectual history to explore how *Light in August* is tied intimately to the region's logging and woodworking industries. Other essays in the volume include Kevin Railey's on the consumer goods that appear in *Flags in the Dust*, Miles Orvell discusses the Confederate Soldier monuments installed in small towns throughout the South and how such monuments enter Faulkner's work. Katherine Henninger analyzes Faulkner's fictional representation of photographs and the function of photography within his fiction.

Originally inspired by a progressive vision of a working environment without walls or hierarchies the open plan office has since come to be associated with some of the most dehumanizing and alienating aspects of the modern office Author Jennifer Kaufmann Buhler traces the history and evolution of the American open plan from the brightly colored office landscapes of the 1960s and 1970s to the monochromatic cubicles of the 1980s and 1990s analyzing it both as a design concept promoted by architects designers and furniture manufacturers and as a real work space inhabited by organizations and used by workers The thematically structured chapters each focus on an attribute of the open plan to highlight the ideals embedded in the original design concept and the numerous technical material spatial and social problems that emerged as it became a mainstream office design widely used in public and private organizations across the United States Kaufmann Buhler s fascinating new book weaves together a variety of voices perspectives and examples to capture the tensions embedded in the open plan concept and to unravel the assumptions expectations and inequities at its core *Consumption and the World of Goods* John Brewer, Roy Porter, 2013-06-17

The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream The history of consumption demands a wide range of skills It calls upon the methods and

techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services      *Interior Design Sourcebook* Susan A. Lewis,1998 This volume combines both scholarly and practical resources for interior architecture and design Back cover      **Wild Things** Judy Attfield,2020-08-20 What do things mean What does the life of everyday objects reveal about people and their material worlds Has the quest for the real thing become so important because the high tech world of total virtuality threatens to engulf us This pioneering book bridges design theory and anthropology to offer a new and challenging way of understanding the changing meanings of contemporary human object relations The act of consumption is only the starting point of object s lives Thereafter they are transformed and invested with new meanings and associations that reflect and assert who we are Defining designed things as things with attitude differentiates the highly visible fashionable object from ordinary aretefacts that are too easily taken for granted Through case studies ranging from reproduction furniture to fashion and textiles to clutter the author traces the connection between objects and authenticity ephemerality and self identity Beyond this she shows the materiality of the everyday in terms of space time and the body and suggests a transition with the passing of time from embodiment to disembodiment
