Developing a Social Psychology of Monkeys and Apes John Chadwick-Jones,2000-03-02 The aim of this text is to draw attention to the exciting progress of contemporary studies of the social psychology of monkeys and apes It is written with a clear style which should invite interest from a wide range of social scientists The relatedness of humans and non human primates that is usually considered in its genetic forms is followed through into the complex social tactics of monkeys and apes The focus of the book is on the latest research as it has developed out of earlier classic studies The current wave of researchers working on social topics is especially emphasised This book will be of particular interest to primatologists ethologists anthropologists zoologists social psychologists and students of social cognition and social interaction For students the appendices provide useful information on the variety of social structures of Old World and New World monkeys and apes

Centralizing Fieldwork Jeremy MacClancy,Agustín Fuentes,2010-12-01 Fieldwork is a central method of research throughout anthropology a much valued much vaunted mode of generating information But its nature and process have been seriously understudied in biological anthropology and primatology This book is the first ever comparative investigation across primatology biological anthropology and social anthropology to look critically at this key research practice It is also an innovative way to further the comparative project within a broadly conceived anthropology because it does not focus on common theory but on a common method The questions asked by contributors are what in the pursuit of fieldwork is common to all three disciplines what is unique to each how much is contingent how much necessary Can we generate well grounded cross disciplinary generalizations about this mutual research method and are there any telling differences Co edited by a social anthropologist and a primatologist the book includes a list of distinguished and well established contributors from primatology and biological anthropology

The Imperial Animal Lionel Tiger,2017-07-12 The Imperial Animal offers a compelling perspective on the controversy over humans and their biology This now classic study is about the social bonds that hold us together and the antisocial theories that drive us apart The authors divulge how the evolutionary past of the

species reflected in genetic codes determines our present and coerces our future This book gives us a direct and intimate look at how we see ourselves It offers insight into our politics our ways of learning and teaching reproducing and producing playing and fighting The authors assert that the purpose of this book is twofold to describe what is known about the evolution of human behavior and then to try to show how the consequences of this evolution affect our behavior today To do this they draw from numerous disciplines zoology biology history and primatology among others In the new introduction Tiger and Fox outline then reasons for originally writing the book as well as the process they used to do their research The Imperial Animal is a classic work that will continue to be of interest to sociologists zoologists biologists and primatologists Sociobiology Edward O. Wilson,2000-03-24 When this work was first published it started a tumultuous round in the age old nature versus nurture debate It shows how research in human genetics and neuroscience has strengthened the case for biological understanding of human nature The Origins and Nature of Sociality Robert W. Sussman,2017-07-05 Scientific developments have increasingly been transforming our understanding of the place of human beings in nature The contributors to this book focus on the current status of research on sociality and the evolution of cooperative and altruistic behaviour in non human and human primates They examine questions related to the evolution cultural viability and hormonal underpinnings of human sociality in specific detail and describe patterns of sociality that shed light on human social behaviour **An Introduction to Social Biology** Alan Dale,2013-09-11 An Introduction to Social Biology examines the application of biological principles in order to live a satisfactorily life This book contains 14 chapters that discuss certain aspects of politics theology morality and philosophy The first chapters address the properties of living things and some paleontological evidence of evolution Other chapters deal with the relationship between man and evolution behavior of man as an animal process of human and animal reproduction definition of the theory of inheritance relationship between agglutinins and agglutinogens effects of mixing a donor s blood and the receiver s serum and development of a fetus These topics are followed by discussion of the social hygiene and the history and developments in medicine An analysis of the diagnostic devices and techniques employed in the middle age is provided The last chapters explore the quality and characteristics of food and beverages as well as the social life among animals The book can provide useful information to the biologists students and researchers Personal Aggressiveness and War E F M & Bowlby Durbin,2013-10-08 This is Volume I of seven in the Social Psychology series First published in 1949 from a symposium entitled War and Democracy this essay presents an introduction to the scientific study of the causes of fighting and war It offers an attempt to describe and analyse the general psychological forces lying behind the timeless and ubiquitous urge to fight and kill **Dale's an Introduction to Social Biology** Susan Dale,2013-10-22 Dale s an Introduction to Social Biology Fourth Edition deals with the more practical context of teaching modern science in the background of human activity This book discusses life in the context of dynamic space and evolving time from Paleontological times to evidence found in blood precipitin test as well as proof from

the variability of plants and animals This text describes man as animal that needs to maintain its species through sex inheritance and reproduction This book also addresses social hygiene health and the history of medicine including diagnostics germ theory recognition of vectors of diseases new curative agents hospitals and public health measures This text describes the function of proteins carbohydrates fats and emphasizes the importance of maintaining the balance of nature This book discusses the social life of animals human population human food production and offers some reason why man has been so successful in terms of survival This book is intended to be used in general courses in the Sixth Form for students or academicians connected with psychology sociology social biology education health education or interdisciplinary fields

The Predatory Behavior of Wild Chimpanzees Geza Teleki, 1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968 Illustrated

Nature: The nature of human nature David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

A Practice of Anthropology Alex Golub, Daniel Rosenblatt, John D. Kelly, 2016-05-01 Marshall Sahlins b 1930 is an American anthropologist who played a major role in the development of anthropological theory in the second half of the twentieth century Over a sixty year career he and his colleagues synthesized trends in evolutionary Marxist and ecological anthropology moving them into mainstream thought Sahlins is considered a critic of reductive theories of human nature an exponent of culture as a key concept in anthropology and a politically engaged intellectual opposed to militarism and imperialism This collection brings together some of the world's most distinguished anthropologists to explore and advance Sahlins's legacy All of the essays are based on original research most dealing with cultural change a major theme of Sahlins's research especially in the contexts of Fijian and Hawaiian societies Like Sahlins's practice of anthropology these essays display a rigorous humanistic study of cultural forms refusing to accept comfort over accuracy not shirking from the moral implications of their analyses Contributors include the late Greg Denning one of the most eminent historians of the Pacific Martha Kaplan Patrick Kirch Webb Keane Jonathan Friedman and Joel Robbins with a preface by the late Claude Lévi-Strauss A unique volume that will complement the many books and articles by Sahlins himself *A Practice of Anthropology* is an

exciting new addition to the history of anthropological study *The Social Life of Children in a Changing Society* K. M. Borman, 2019-01-22 This book developed from a symposium in which participants examined childhood socialization from a number of perspectives and with several disciplinary lenses The major purpose of the symposium and thus of this volume is to provide an integrative multidisciplinary discussion of the social development of preschool and young elementary school aged children As a result there are contributions to this volume from anthropologists Leacock Ogbu psychologists Lippincott Mueller Ramey and Snow sociologists Borman Denzin and scholars who have self consciously adopted an interdisciplinary framework First published in 1984 Routledge is an imprint of Taylor Francis an informa company Zoology Reprints and Separata, Etc ,1918
