**Great Expectations** Commission on the Social Sciences, 2017-10-19 The social sciences in the United Kingdom are extensive diverse and influential At any one time more than four million students study the social sciences in schools and about a half million students study social science in universities Total university income from the social sciences is at the four billion dollar level Beyond that many social scientists hold key positions in government business the media civil service and the voluntary sector Great Expectations reviews the status of the social sciences in Great Britain at the beginning of the twenty first century While making clear that work opportunities for social scientists are substantial and that levels of intellectual performance equal that of graduates in physics it provides a hard hitting empirically grounded examination of a near crisis situation The report goes far beyond what one conventionally expects in commissioned reports arguing that the academic treadmill driven by excessive accountability burdens reduces the originality and quality of much academic research The report emphasizes the ideological and parochial nature of much British social research As a result there is little applicability internationally even less interdisciplinary work and at times an outright bias against the market economy as such The Commission Report is even handed tough minded and frank in discussing how it is that social science and new social and technical forces do not always mesh The optimism exuded is measured but genuine Great Expectations offers policy recommendations and scientific goals that can be serviceable not only in the United Kingdom but in all advanced societies in

**Computational Social Psychology** Robin R. Vallacher, Stephen J. Read, Andrzej Nowak, 2017-05-25 Computational Social Psychology showcases a new approach to social psychology that enables theorists and researchers to specify social psychological processes in terms of formal rules that can be implemented and tested using the power of high speed computing technology and sophisticated software This approach allows for previously infeasible investigations of the multi dimensional nature of human experience as it unfolds in

accordance with different temporal patterns on different timescales In effect the computational approach represents a rediscovery of the themes and ambitions that launched the field over a century ago The book brings together social psychologists with varying topical interests who are taking the lead in this redirection of the field Many present formal models that are implemented in computer simulations to test basic assumptions and investigate the emergence of higher order properties others develop models to fit the real time evolution of people s inner states overt behavior and social interactions Collectively the contributions illustrate how the methods and tools of the computational approach can investigate and transform the diverse landscape of social psychology

**Philosophy and the Social Sciences** Vernon Pratt, 2003-09-02 Published in the year 2004 Philosophy and the Social Sciences is a valuable contribution to the field of Sociology Social Studies of Science and Technology: Looking Back, Ahead B. Joerges, H. Nowotny, 2012-12-06 BERNW ARD JOERGES AND HELGA NOWOTNY YET ANOTHER TURN The thing that doesn t fit is the thing that s most interesting Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters
