Between Babasaheb and Mahatma Hulas Singh, 2024-10-16 This book is a critical comparative study of Jotirao Phule and Bhimrao Ramji Ambedkar modern India's two most prominent dalit leaders Although they were not close contemporaries they came to construct a firm structure of not only dalit ideology but also dalit methodology to emancipate the oppressed and depressed sections of society The book deals with their ideas in a new light highlighting aspects of convergence and contrast in their respective approach to philosophy religion society and culture It argues that deep down in his philosophic orientation Phule was quintessentially closer to Gandhi than to Ambedkar The author also contends that the usage of the term dalit exclusively in the caste communitarian sense is essentially a product of post independence political appropriation rather than social evolution The book specifically brings to light the dynamics of humanism and nationalism on the one hand and that of communitarianism on the other in the context of twentieth century colonial India Notably Gandhi is brought in the narrative to complete the triumvirate Comprehensive and deeply grounded in primary research this thought provoking book will be indispensable for students and researchers of modern Indian history sociology political science political thought exclusion studies dalit and subaltern studies and South Asian studies It will also appeal to those interested in the writings of Ambedkar and Phule

McMaster University, Volume 1 Charles M. Johnston, 2015-09-01 The Toronto Years is the first of three volumes relating the history of McMaster University It is not simply an institutional chronicle which lists names for the record it is a dramatic and colourful story that shows how the university grew out of earlier Baptist educational endeavours and describes its eventful first forty years spent on the Bloor Street Campus in Toronto McMaster University was established in 1887 as a trust of the Baptist constituency which helped to ensure vital and ongoing financial support but which also embroiled the school in the often bitter theological debates sweeping through the churches In the 1920s the struggle between modernism and fundamentalism threatened the university's very existence Fluctuating enrolment wartime stresses and education continually forced confrontations over the question of federation with the provincial university in Toronto

Washington,Donald Cunnigen,2002 Confronting the American Dilemma of Race consists of twelve articles written by six authors about the second generation African American sociologists who embarked on their sociological careers between 1930 and 1950 when American society was embedded in a racial caste system From the perspective of the sociology of knowledge these articles through examining the life experiences and works of these African American sociologists reveal important insights into the impact of racial segregation on the development of both black sociology and the sociology of race relations *The Cambridge Handbook of Environmental Sociology: Volume 1* Katharine Legun,Julie C. involving three sets of variables power knowledge and psychology The second is a general equilibrium approach to the study of these variables emphasizing their fundamental interdependence The third is the importance of Pareto s work Pareto is one of the few individuals whose work has had enormous influence in at least three social sciences in the twentieth century economics sociology and political science Despite Pareto s attempt in the Treatise to produce a general sociology encompassing all of these sciences as well as psychology his work has been treated almost completely from the perspectives of the individual disciplines This volume s interpretation is consonant with Pareto s intention in the Treatise namely to provide a general equilibrium model of the total socio politico economic decision making or policy process The book is directed at those who comprehend these as processes whose structure conduct and performance are a function of complex decision making Social scientists and policy analysts have moved beyond models that solve problems in the abstract without working them out through policy making in the real world The approach outlined here is important to those who are interested in pursuing the working rules of law and morals that govern the distribution and exercise of power as well as the exercise of power that governs the development of these rules

Currents in Sociological Thought: Volume 2 Raymond Aron, 2018-10-03 This is the second of Raymond Aron's classic two volume survey of the sociological tradition arguably the definitive work of its kind Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century: Emile Durkheim who continued Auguste Comte's quest for a science of society and a scientific validation of morality; Vilfredo Pareto the Italian neo Machiavellian who emphasized the oligarchic or elitist character of all societies; and the German sociologist Max Weber who reflected critically on the prospects for human freedom in an age marked by bureaucratization and rationalization. Aron presents rich portraits of these three thinkers drawing out the enduring insights that remain in their work. At the same time he reflects critically on Durkheim's project for a science of society, Pareto's critique of humanitarianism and Weber's tragic pessimism. Above all the book is remarkable for demonstrating Aron's lifelong indebtedness to and divergence from the thought of Max Weber the sociologist par excellence in Aron's view. This Routledge Classics edition includes an introduction by Daniel J Mahoney and Brian C Anderson.
