

Smokers also impose health care costs on nonsmokers.

- Smokers usually incur higher health care costs.
 - ◆ But nonsmokers die prematurely from passive smoking, smoking-related fires.
- The total external costs of cigarette smoking are estimated to be 15¢ per pack. (Manning et al., 1991)

Societal Costs Of Cigarette Fires:

Federal Register ,2008-03 **The Economics of Smoking** Robert D. Tollison,Richard E. Wagner,2012-12-06

Cigarettes are under political attack at all levels of government in the United States From Washington D C to state capitals to local governments proposals abound to increase the cigarette excise tax to impose smoking bans to prevent cigarette advertising to restrict the sale of cigarettes through vending machines to cut off the export of cigarettes to earmark the cigarette excise tax for health programs to divest the stock of cigarette companies and so on And all of these are purportedly being advocated in the name of health Undergirding and abetting the health argument is an economic argument that claims to place a value of up to 100 billion per year on the alleged health costs of smoking to the American economy which is more than 3 per pack of cigarettes smoked As our title suggests our interest lies in the economics of smoking and not in the health issues surrounding smoking We are professional economists and not medical scientists We will focus on what if any economic consequences arise for nonsmokers when smokers smoke For purposes of our discussion we simply accept the premise that smoking damages health and proceed with our analysis Since we have not studied the issue ourselves we have no way of knowing whether such a premise is true But it really does not matter for getting the economics of smoking right The important point resides in who pays for whatever to smoking **Societal Costs of Cigarette Fires** ,1993 **Fire Safe**

Energy and Commerce. Subcommittee on Health and the Environment,1994 The Price of Smoking Frank A. Sloan,Jan Ostermann,Christopher Conover,Donald H. Taylor,Gabriel Picone,2006-08-11 What does a pack of cigarettes cost a smoker the smoker s family and society This longitudinal study on the private and social costs of smoking calculates that the cost of smoking to a 24 year old woman smoker is 86 000 over a lifetime for a 24 year old male smoker the cost is 183 000 The total social cost of smoking over a lifetime including both private costs to the smoker and costs imposed on others including second hand smoke and costs of Medicare Medicaid and Social Security comes to 106 000 for a woman and 220 000 for a man The cost per pack over a lifetime of smoking almost 40 00 The first study to quantify the cost of smoking in this way or in such depth this accessible book not only adds a weapon to the arsenal of antismoking messages but also provides a framework for assessment that can be applied to other health behaviors The findings on the effects of smoking on Medicare and Medicaid will be surprising and perhaps controversial for the authors estimate the costs to be much lower than the damage awards being paid to 46 states as a result of the 1998 Master Settlement Agreement Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 1993: American Battle Monuments Commission United States. Slama,2012-12-06 Over 1 100 delegates from a hundred countries attended the 9th World Conference onTobaccoandHealth Afterfivedaysofdebate severalimportantresolutionswereadopted unanimously and will be landmarks in the fight against tobacco This great success is due to three facts which emerged from the discussions 1 Itappears clearlynowthattherisksassociated

with tobacco are much greater than previously assumed. Out of two regular smokers one will die from a tobacco related disease.
2 Reducing tobacco consumption can be achieved but the data collected in several countries show that it requires a global strategy. This strategy was much debated during the conference.
The resolutions adopted emphasize the agreement of the delegates on the main points: Action to fight the growing epidemic of tobacco attributable disease and death involves convincing the general public, the medical community and decision makers of the need to act for tobacco control. The most efficient tools for helping individuals never to start or successfully to stop using tobacco should be developed. Effective tobacco control endeavors are required to counteract the actions of the powerful and influential tobacco manufacturers. With the help and under the aegis of WHO, DICC, IUATLD, ISFC, IOCD and IUHPE, an international alliance for health and against tobacco should unite all those who are engaged in this fight.
