A Benham, Ronald H. Heck, 2013-10-18 This comprehensive educational history of public schools in Hawai'i shows and analyzes how dominant cultural and educational policy have affected the education experiences of Native Hawaiians Drawing on institutional theory as a scholarly lens the authors focus on four historical cases representing over 150 years of contact with the West They carefully link historical events significant people educational policy and law to cultural and social consequences for Native Hawaiian children and youth The authors argue that since the early 1800s educational policy in Hawai'i emphasizing efficiency has resulted in institutional structures that have degenerated Hawaiian culture self image and sovereignty Native Hawaiians have often been denied equal access to quality schools and resulting increased economic and social status These policies were often overtly or covertly racist and reflected wider cultural views prevalent across the United States regarding the assimilation of groups into the American mainstream culture The case of education in Hawai'i is used to initiate a broader discussion of similar historical trends in assimilating children of different backgrounds into the American system of education The scholarly analysis presented in this book draws out historical political cultural and

organizational implications that can be employed to understand other Native and non Native contexts Given the increasing cultural diversity of the United States and the perceived failure of the American educational system in light of these changes this book provides an exceptionally appropriate starting point to begin a discussion about past present and future schooling for our nation s children Because it is written and comes from a Native perspective the value of the insider view is illuminated This underlying reminder of the Native eye is woven throughout the book in Ha awina No ono o the sharing of thoughts from the Native Hawaiian author With its primary focus on the education of native groups this book is an extraordinary and useful work for scholars thoughtful practitioners policymakers and those interested in Hawai i Hawaiian education and educational policy and theory

after 1918 between Germany and Czechoslovakia became an international showcase for modern state building nationalist agitation and local pragmatism after World War I in the 1930s and again after 1945 Caitlin Murdock uses wide ranging archival and published sources from Germany and the Czech Republic to tell a truly transnational story of how state regional and local historical actors created and eventually destroyed a cross border region Changing Places demonstrates the persistence of national fluidity ambiguity and ambivalence in Germany long after unification and even under fascism It shows how the 1938 Nazi annexation of the Czechoslovak Sudetenland became imaginable to local actors and political leaders alike At the same time it illustrates that the Czech German nationalist conflict and Hitler s Anschluss are only a small part of the larger more complex borderland story that continues to shape local identities and international politics today Caitlin E Murdock is Associate Professor of History at California State University Long Beach Jacket Credit Cover art courtesy of the author
