Sociological Practice 199:

Sociology for Social Workers and Probation Officers Vivienne E. Cree, 2010-07-12 How does a social work student make the connection between sociological knowledge and day to day social work Sociology for Social Workers and Probation Officers provides an introduction to sociological ideas and research and places them firmly into the context of actual social work practice It encourages readers to develop critical awareness and reach their own judgements about the usefulness and implications of holding certain conceptual positions and shows how social work can be better informed and improved by doing so Fully revised and updated throughout this second edition examines sociology in relation to key areas of social work and probation practice and includes one new chapter Areas covered are Family Childhood Youth Community Care and Caring Health and Illness Crime Essential reading for all social work and probation studies students this text looks beyond individual and psychological explanations and solutions to develop a sociological knowledge base for social work practice A Sociology of Mystic Practices Dann Wigner, 2018-06-08 This book investigates the process of spiritual borrowing between the emergent church EC and the Christian mystical tradition From its inception the EC has displayed interest in mystic practices but the exact nature of this interest or how these practices are appropriated and reinterpreted in the EC context has not been researched My research shows that the emergent church is appropriating Christian mystic practices by investing these practices with their own theological content The practices themselves are changed to fit in their new context showing that EC belief shapes EC behavior My study adds a new case study perspective to the sociological examination of the process of spiritual borrowing especially through close inspection of how a spiritual practice changes to fit a new theological context Additionally my book contributes to the study of the complex relationship between belief and behavior *Assessment: Social Practice and Social Product* Ann Filer, 2002-11 In Assessment the writers take the reader beyond the obvious function of assessment and focus upon the roles it performs in the social structuring of society *Diverse Histories of American Sociology* Anthony Blasi, 2005-06-01 This volume presents views of American sociology from minority groups and important intellectual movements that did not merge into the mainstream Coinciding with the centenary of the American Sociological Association it provides little known background information to the development of the field A first section highlights tensions between impartial scientific sociology and scientific social reform A second section uncovers the experiences of female African American and Latino pioneers in the field as well as a sociologist from a religious minority A third section traces the organizational history of the field including gendered racial regional and outsider perspectives A final section focuses on several neglected trajectories With this volume American sociology can be seen in its full context **The Colonial Origins of Modern Social Thought** George Steinmetz, 2025-02-25 A new history of French social thought that connects postwar sociology to colonialism and empire In this provocative and original retelling of the history of French social thought George Steinmetz places the history and development of modern French sociology in the context of the French empire after World

War II Connecting the rise of all the social sciences with efforts by France and other imperial powers to consolidate control over their crisis ridden colonies Steinmetz argues that colonial research represented a crucial core of the renascent academic discipline of sociology especially between the late 1930s and the 1960s Sociologists who became favored partners of colonial governments were asked to apply their expertise to such social problems as detribalization urbanization poverty and labor migration This colonial orientation permeated all the major subfields of sociological research Steinmetz contends and is at the center of the work of four influential scholars Raymond Aron Jacques Berque Georges Balandier and Pierre Bourdieu In retelling this history Steinmetz develops and deploys a new methodological approach that combines attention to broadly contextual factors dynamics within the intellectual development of the social sciences and sociology in particular and close readings of sociological texts He moves gradually toward the postwar sociologists of colonialism and their writings beginning with the most macroscopic contexts which included the postwar reoccupation of the French empire and the turn to developmentalist policies and the resulting demand for new forms of social scientific expertise After exploring the colonial engagement of researchers in sociology and neighboring fields before and after 1945 he turns to detailed examinations of the work of Aron who created a sociology of empires Berque the leading historical sociologist of North Africa Balandier the founder of French Africanist sociology and Bourdieu whose renowned theoretical concepts were forged in war torn late colonial Algeria

Sociology for Social Work Lena Dominelli,1997-11-11 This major text addresses the relevance of sociological concepts to social work practice arguing that lack of understanding of the ways in which social work fits into society s structures and is informed by its relationship with these can lead to impoverished social work practice Written from an anti racist feminist perspective it both argues for social workers to engage in empowering forms of practice and provides students practitioners and educators with a new paradigm to draw on

A Sociology of Constitutions Chris Thornhill,2011-07-14 Using a methodology that both analyzes particular constitutional texts and theories and reconstructs their historical evolution Chris Thornhill examines the social role and legitimating status of constitutions from the first quasi constitutional documents of medieval Europe through the classical period of revolutionary constitutionalism to recent processes of constitutional transition A Sociology of Constitutions explores the reasons why modern societies require constitutions and constitutional norms and presents a distinctive socio normative analysis of the

Statistics Jay Weinstein, 2010-01-15 While Applying Social Statistics is about social statistics and includes all of the topics generally covered in similar texts it is first and foremost a book about how sociologists use statistics Its emphasis is on statistical reasoning in sociology and on showing how these principles can be applied to numerous problems in a wide variety of contexts to answer effectively the question what s it for A main learning objective is to help students understand how and why social statistics is used Yet Weinstein s style and substance recognize that it is of equal or even greater importance that they begin to learn how to apply these principles and techniques themselves

The Routledge Companion to Reinventing Management Education Chris Steyaert, Timon Beyes, Martin Parker, 2016-06-17 The position and role of the business school and its educational programmes have become increasingly prominent yet also questioned and contested What management education entails and how it is enacted has become a matter of profound concern in the field of higher education and more generally for the development of the organized world Drawing upon the humanities and social sciences The Routledge Companion to Reinventing Management Education imagines a different and better education offered to students of management entrepreneurship and organization studies It is an intervention into the debates on what is taught and how learning takes place demonstrating both the potential and the limits of what the humanities and social sciences can do for management education Divided into six sections the book traces the history and theory of management education

Feldman, Sheila B. Kamerman, 2001 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons surveys the major debates related to that decision and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945 He then provides a historical overview of the events in question beginning with the decision and program to build the atomic bomb Detailing the sequence of events leading to Japan's surrender he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders Finally Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents scholarly books and articles *Social Work* Vivienne E. Cree, 2013-10-31 What are the key ideas that underpin social work practice This inspiring Reader brings together some of the most significant ideas which have informed social work practice over the last forty years Exploring these fundamental ideas the book includes commentaries that allow the reader to understand the texts on their own terms as well as to be aware of their relations to each other and to the wider social work context An accessible introduction contextualises the reader summarising the main themes and highlighting key issues The book is then divided into three main sections each presenting key texts which have contributed to the development of the profession of social work social work knowledge and values social work skills and practice There is no settled view or easy consensus about what social work is and should be and the ideas reflected in this volume are themselves diverse and complex The contributions are drawn from a wide range of perspectives psychological sociological philosophical educational and political as well as perspectives which are grounded in the experiences of practitioners and those who use services This important resource is essential reading for all social work students **How Scientific Practices Matter** Joseph Rouse, 2002 How can we understand the world as a whole instead of separate natural and human realms Joseph T Rouse proposes an approach to this classic problem based on radical new conceptions of both

philosophical naturalism and scientific practice Rouse begins with a detailed critique of modern thought on naturalism from Neurath and Heidegger to Charles Taylor Thomas Kuhn and W V O Quine He identifies two constraints central to a philosophically robust naturalism it must impose no arbitrarily philosophical restrictions on science and it must shun even the most subtle appeals to mysterious or supernatural forces Thus a naturalistic approach requires philosophers to show that their preferred conception of nature is what scientific inquiry discloses and that their conception of scientific understanding is itself intelligible as part of the natural world Finally Rouse draws on feminist science studies and other recent work on causality and discourse to demonstrate the crucial role that closer attention to scientific practice can play in reclaiming naturalism A bold and ambitious book *How Scientific Practices Matter* seeks to provide a viable yet nontraditional defense of a naturalistic conception of philosophy and science Its daring proposals will spark much discussion and debate among philosophers historians and sociologists of science

On Practice and Institution Michael Lounsbury, Deborah A. Anderson, Paul Speer, 2021-01-12 The concepts of practice and institution are of longstanding importance across the social sciences that have been too disconnected Bringing together novel theoretical statements and empirical studies that bridge these social worlds these two volumes provide a major touchstone for scholars interested in the study of practice and institution
