Peck,Norman A. Dolch,2000-10-30 This unique collection of case studies introduces readers to many of the common yet extraordinary social problems in contemporary American society Employing a symbolic interaction approach to the case studies the authors identify the origins of the problems define the issues and explore the outcomes and potential remedies The case studies themselves introduce readers to the very personal side of the problems as the emotions actions and perceptions of the subjects are revealed and analyzed The problems studied here are organized into three categories health related issues family issues and behavior beyond the boundaries and include many problems that often receive too little attention in the existing literature making this book an original and timely contribution Each of the three sections is preceded by a general review of the chapters to follow and offers readers a prelude to the exploration of human thought language and behavior captured and illustrated in the case studies In the first section of the book problems covered include suicide

anorexia nervosa alcohol and drug abuse and AIDS STDs The second section covers teenage mothers domestic violence divorce and poverty child support and deadbeat dads and homelessness The last section focuses on sexual harassment equal protection and racial exclusion prostitution career criminals mass murder and serial killers This book represents a fresh new approach and a welcome addition to the study of social problems in America today **Ie Soc Global Perspect**
