## **Sociologists On Sociology:**

Sociologists on Sociology Bob Mullan, 1987      **Sociologists in Action** Kathleen Odell Korgen, Jonathan M. White, Shelley K. White, 2010-12-08 This book provides vivid examples of how sociologists are using sociological tools to make a positive impact on our society In each chapter four or five public sociologists will describe in vivid detail how they have used sociology to understand and influence the world around them The chapters will cover the key topics in sociology courses and the pieces will bring the subject matter of sociology to life for students giving them clear examples of the power and usefulness of sociology as they learn the course content The discussion questions and suggested additional readings and resources at the end of every chapter will provide students the opportunity to delve further into the topics covered and help create full and nuanced discussions grounded in the real world work of public sociologists      **Getting Sociology Right** Neil J. Smelser, 2014-04-12 Neil J Smelser one of the most important and influential American sociologists traces the discipline of sociology from 1969 through the early twenty first century By examining sociology as a vocation and building on the work of Talcott Parsons Smelser discusses his views on the discipline of sociology and how his perspective of the field has evolved in the postwar era      Sociologists in Action Kathleen Odell Korgen, 2013-03-14 Brings the subject matter of sociology to life for students Linking theory and practice this textbook explores how sociological knowledge is used in the community to fight for social change and justice      Sociologists on Sociology Robert Mullan, 2022-02-23 Originally published in 1987 this edition in 1996 *Sociologists on Sociology* is a unique and sometimes controversial account of the development disputes and the future of sociology as seen through the eyes of eleven of the world's leading sociologists at the time Consisting of interviews with Anthony Giddens Robert K Merton Howard Becker Peter Townsend Ralf Dahrendorf Peter Worsley Stuart Hall John Rex Michael Mann Laurie Taylor and Ann Oakley the book explores such crucial issues as the nature of deviance the scientific status of sociology the relationship of Marxism and sociology the contours of race and class feminism relevance of ethnomethodology and the procedures of participant observation The contributions of such figures as Goffman Mills Parsons Weber and Foucault are assessed and in clear and concise language the contributors discuss their own theoretical interests and empirical work in the field Students and practitioners of the social sciences will find the book a fascinating and a uniquely direct insight into the thoughts of sociology's leading figures and a remarkable cumulative assessment of the state of the discipline itself      **Journeys in Sociology** Rosalyn Benajmin Darling, Peter J. Stein, 2017-05 For most sociologists their life's work does not end with retirement Many professors and practitioners continue to teach publish or explore related activities after leaving academia They also connect with others in the field to lessen the isolation they sometimes feel outside the ivory tower or an applied work setting The editors and twenty contributors to the essential anthology *Journeys in Sociology* use a life course perspective to address the role of sociology in their lives The power of their personal experiences during the Great Depression World War II or the student protests and social movements in the 1960s and 70s magnify how

and why social change prompted these men and women to study sociology Moreover all of the contributors include a discussion of their activities in retirement From Bob Perrucci Tuck Green and Wendell Bell who write about issues of class to Debra Kaufman and Elinore Lurie who explain how gender played a role in their careers the diverse entries in *Journeys in Sociology* provide a fascinating look at both the influence of their lives on the discipline and the discipline on these sociologists lives Contributors include David J Armor Wendell Bell Glen H Elder Jr Henry W Fischer Janet Zollinger Giele Charles S Tuck Green Peter Mandel Hall Elizabeth Higginbotham Debra Renee Kaufman Corinne Kirchner Elinore E Lurie Gary T Marx Robert Perrucci Fred Pincus Thomas Scheff Arthur Shostak David Simon Natalie J Sokoloff Edward Tiryakian Joyce E Williams and the editors Published in collaboration with the American Sociological Association Opportunities in Retirement Network *The Education of Sociologists in the United States* Elbridge Sibley, 1963 *Sociology for Human Rights* David L. Brunsma, Keri E. Iyall Smith, Brian K. Gran, 2019-07-19 As sociologists deepen their examinations of human rights in their teaching research and thinking it is essential that such work is conducted in a manner that is both mindful and critical of the knowledge we are building upon in sociology and human rights As the authors of this volume reveal creating sociological knowledge that examines human rights for the expansion of human rights is something that sociologists are well equipped to undertake whether through the use of mathematics comparative historical analysis the study of emotions conversations or social psychology In these chapters you will find the roots of the study of human rights deep within sociological research and thinking as well as emerging techniques that will push the discipline as it seeks to expand understanding of human rights together with so many other aspects of the social condition *What's Wrong with Sociology?* Stephen Cole, 2018-04-17 Since the 1950s sociology has experienced a decline in prestige when compared with the other social sciences In some highly publicized cases some universities have retrenched their sociology departments others are contemplating either retrenchment or downsizing of their departments Although there are some practitioners of the discipline who believe that it has never been in better shape many sociologists have come to believe that there are very serious problems both in the cognitive and social organization of the discipline This book contains sixteen essays by sociologists who believe that their discipline faces very serious problems which must be overcome if the discipline is to survive and prosper The contributors were selected to represent diverse views and thus there is substantial disagreement among them over what the problems are that sociology faces and how they may be remedied In this highly provocative book readers are likely to find some essays they agree with and others they disagree with but all the essays present important problems faced by the discipline which must be addressed Although the authors of the sixteen essays do not agree on what is wrong with the discipline there are some themes which appear frequently In his introduction Cole summarizes and comments on these themes His introduction centers on the question of whether sociology is entirely socially constructed Is what we believe to be true about society constrained by empirical evidence or is it a result of our ideology power authority and other

social processes One theme which appears in many of the essays is that sociology has become too ideological and as a result has lost credibility among university administrators politicians and the general public Many of the essays also stress the view that there are very low levels of consensus in sociology and that it is hard to see evidence of progress Others criticize the discipline for not dealing with the really important social issues and see much of the work published as being parochial and trivial Questions are also raised about why the use of causal models has failed to generate solutions to most of the problems the discipline addresses Some authors believe that the discipline adheres to an overly rational model of human behavior and has failed to keep up with some of the advances introduced by post modernist theories This highly readable set of essays should be of interest to all those are concerned about the current state of sociology They will also be useful in introducing graduate students to some of the most important issues currently being debated in the field Stephen Cole is currently professor of sociology at the State University of New York at Stony Brook and professor of sociology at the University of Queensland Australia He is the author of *Making Science Between Nature and Society* and with Jonathan R Cole *Social Stratification in Science*     *The Sociologist as Consultant* Joyce M. Iutovich, Mark Iutovich, 1987-04-03 In this welcome guide sociologists who have successfully established consulting practices present practical examples of how to apply sociological knowledge and methodological procedures to real life situations In addition to offering detailed suggestions for training the contributors explore the many ways in which sociologists can help solve problems faced by business governmental organizations social agencies schools and churches The ups and downs of establishing a consulting practice are outlined and supplemented by first hand accounts of the contributors experiences     *A Journey of Discovering Sociology* Long Chen, 2020-08-13 This book gathers the author's interviews with twenty leading sociologists from various fields at nine different prestigious universities in the USA including their viewpoints anecdotes and experiences in the world of sociology Each chapter presents an interview with one sociologist covering their views on contemporary sociology their early university experiences teaching experiences experiences with publishing and their reflections on life as a sociologist Through the dialogues readers can learn about sociology as well as sociologists lives in a unique and insightful way just as the author did and embark on a journey of discovering sociology The book helps readers find their own answers to the two main questions explored What is sociology and What is a sociologist's life like     *The Public Sociology Debate* Ariane Hanemaayer, Christopher J. Schneider, 2014-05-10 In 2004 Michael Burawoy challenged sociologists to move beyond the ivory tower and into the realm of activism to engage in public discourses about what society could or should be His call to arms sparked intense debate among sociologists Which side would sociology take Would public sociology speak for all sociologists In this volume which opens with a foreword by Michael Burawoy leading Canadian sociologists continue the conversation by discussing not only how and why they should do sociology but also how ethical judgments influence sociological practice and the evaluation of research Most importantly they ask whether and under what circumstances sociologists should advocate for

social change Regardless of whether they focus on activism research theory or teaching the contributors offer insights into where the discipline is heading and why it matters to people inside and outside the university Practicing Social Science Devorah Kalekin-Fishman, 2016-12-01 How is the process of globalization effecting changes in the structure of knowledge in sociology This path breaking volume looks at the human dimension of developments in the discipline by compiling a set of interviews that exemplify the life and work of a sociologist today Their ideas and conceptualizations show to what extent a paradigm shift has taken root answering questions such as whether sociology still remains a differentiated relatively autonomous social science The chosen interviewees are about equally divided according to gender and have been selected from among professional sociologists in different parts of the globe with an emphasis on areas that are under represented in English publications such as East Asia Latin America and Africa Analysis focuses on changes which are becoming clear from the on going confrontation between traditional sociology which emerged as a project of modernity and the sociology practiced by sociologists who are called upon to adapt the discipline to the upheavals of the twenty first century **The**
