The Defense:

The Defense Industrial Base Nayantara D. Hensel, 2016-03-03 The US and international defense industrial sectors have faced many challenges over the last twenty years including cycles of growth and shrinkage in defense budgets shifts in strategic defense priorities and macroeconomic volatility In the current environment the defense sector faces a combination of these challenges and must struggle with the need to maintain critical aspects of the defense industrial base as defense priorities change and as defense budgets reduce or plateau Moreover the defense sector in the US is interconnected both with defense sectors in other countries and with other industry sectors in the US and global economies As a result strategic decisions made in one defense sector impact the defense sectors of other countries as well as other areas of the economy Given her academic corporate and Department of Defense experience as a leading economist and policy maker Dr Nayantara Hensel is perfectly positioned to examine the interrelationship between these forces both historically and in the current environment and to assess the implications for the future global defense industrial base

The Will to Believe as a Basis for the Defense of Religious Faith Ettie Stettheimer, 1907

A comparison of the defense acquisition systems of France, Great Britain, Germany and the United States, *The Development of Defense Mechanisms* Phebe Cramer, 2012-12-06 The idea that the human mind that faculty of the intellect which we use to define and discern the truth might also be used to deceive itself is not new The classic orator Demosthenes warned of this possibility in 349 B C when he wrote that Nothing is more easy than to deceive one's self what a man wishes he generally believes to be true 1 Even Jean Jacques Rousseau who suggested the possibility of man as noble savage alerts us to this paradox when he writes Jamais la nature ne nous trompe c'est toujours nous qui nous trompons Nature never deceives us it is always we who deceive ourselves 2 But it was Sigmund Freud who placed this idea firmly into the field of psychopathology and then later into a general psychological theory According to Freud understanding the function of a defense mechanism means not only fathoming the origin of pathological symptoms but also comprehending a model of the mind that includes both conscious and unconscious mental processes From this initial focus on the general process of defense Freud and his followers went on to identify various forms this process might take with the result that today we have a list of 37 more than 37 defense mechanisms described in the literature
