Eric A. Kreuter

The Design Of Existence Emanation From Source To Creation:

The Design of Existence Wilson Van Dusen, 2001 A guidebook to the mystical experience like no other Viewing external reality from a multi dimensional perspective Van Dusen imposes that vision on our internal reality He sets out to explore the inner landscape in detail using the writings of 18th century visonary Emanuel Swedenborg as a template and comparing them to works in of other spiritual traditions especially Hinduism and Buddhism For both Swedenborg and Van Dusen our interior realm reflects the external cosmos Each of us carries in our nature and character a cosmological design This inner outer correspondence makes possible a mystical sense of oneness Includes contemplative and meditative exercises for daily use

Therapeutic Keys to Self-Actualization in Homer's Demeter Lindy McMullin, 2019-01-15 This book is the result of a study that investigated the effects that myth in sacred text may have on personal professional and transpersonal development To ensure maximum impact in terms of imagery enhancing properties Homer s Hymn to Demeter was read accompanied by lyre music in a therapeutic setting and the resulting experiences examined The author a clinician as well as researcher succeeds in extracting personal epiphanies that have the potential to change perceptions and contribute to a healing process This book is a courageous and novel attempt to integrate ancient wisdom with modern scientific inquiry that honours all levels states and structures of consciousness within both the researcher and the study s participants It documents the deep inner preparatory work the author undertook prior to executing the study to situate herself in the historical context and prepare her psyche at a fundamental level to as authentically as possible receive the data perceptions and experiences from participants Skill and creativity are also apparent with regard to the nuanced sophisticated manner of data collection and analysis not only with words but with accompanying drawings that depict the data in a unique manner that illuminates the many ways of knowing and expressing understanding Moreover the inclusion of a glossary helps navigate the reader through a delightfully rich and full experience Throughout the text the focus of the inquiry investigating the application of ancient Greek myth and music in personal professional and transpersonal development is reinforced This work portrays a deep respect for the many ways of knowing inherent in the human species calling for a revision of sacred script and its benefits in education and psychology This book is sure to appeal to scholars clinicians and educators as well as the educated lay reader

Victim Vulnerability Eric Anton Kreuter, 2006 An examination of the psychological literature on victimisation shows disproportionately that that we know more about the predator than we do the victim Moreover almost all the literature on the victim is presented from either a reductionistic or cognitive behavioural point of view This book examines the psychology of a victim of repeated criminal acts from the existential humanistic perspective The method used is the single case study The subject currently age 51 a pilot was the victim of identity theft extortion and duress These crimes some of which are treated under federal law as violent by their nature or effect resulted in a large unrecoverable financial loss suspension of the pilot s medical certification required to operate aircraft abrupt termination of his chosen career a

continuing governmental record of being delusional despite overwhelming proof to the contrary lasting emotional and physical distress as well as other consequences Meanwhile the predator has harmed dozens of individuals forming a diverse cohort A life history of the subject is presented as a context for the specific chronology of events defining his victimisation which is followed by an existential interpretation Interviews and archival data including written and audio forms of documentation have been incorporated into the study Seven criteria were selected from existential humanistic psychology that have been applied in the exploration of the behaviour and personality of the victim 1 the interior life world of the person 2 self actualisation needs vs adjustment to social norms 3 meaning through suffering 4 being in the face of non being 5 attitudes toward death and annihilation 6 dreams visions and mythic experience and 7 existential use of the void The study found characteristics of the psyche of a particular victim that may have made him vulnerable These characteristics include being overly trusting being under the influence of a hero rescuer archetype and being overly reliant on instruments due to training as a pilot Mainstream psychology has ignored this dimension which is needed to understand the total person

Fostering Resilience for Loss and Irrelevance Eric A. Kreuter, 2012-12-12 The compensating construct of resiliency itself has not been compared to the problem of loss of relevancy Therefore there is an open corridor for the enlightened therapist career coach or mentor to appropriately guide a troubled person with targeted challenges to transform themselves into a newly thriving being This book explores the topic in detail with references to the literature where prior theory can be applied to advance this topic further Anecdotal evidence supporting the authors perspective is presented including several brief case studies of individuals who have thrived following cessation of their prior careers The Journal of Transpersonal Psychology, 2002 **Forthcoming Books** Rose Arny, 2001 **Origin(s) of Design in Nature** Liz Swan, Richard Gordon, Joseph Seckbach, 2012-08-27 Origin s of Design in Nature is a collection of over 40 articles from prominent researchers in the life physical and social sciences medicine and the philosophy of science that all address the philosophical and scientific question of how design emerged in the natural world The volume offers a large variety of perspectives on the design debate including progressive accounts from artificial life embryology complexity cosmology theology and the philosophy of biology This book is volume 23 of the series Cellular Origin Life in Extreme Habitats and Astrobiology www.springer.com series 5775

American Book Publishing Record, 2001 *Jonathan Edwards's Vision of Reality* John J. Bombaro, 2011-10-19 Since the publication of Sang Hyun Lee's revolutionary commentary The Philosophical Theology of Jonathan Edwards scholars have considered the possibilities of understanding Jonathan Edwards's thought in terms of dispositional laws forces and habits While some scholars reject the notion of a dispositional ontology in Edwards others have taken the concept of disposition in his thought beyond the usage the Northampton minister ever indicated especially with respect to soteriological considerations The preacher of Sinners in the Hands of an Angry God is made to be an inclusivist if not a crypto universalist Jonathan Edwards's Vision of Reality substantiates that Edwards in an effort to combat deistic and materialistic

Enlightenment paradigms employs dispositions in his philosophy but that his radical theocentrism and Calvinistic particularism established its boundaries within his apologetical reconsideration of spatiotemporal and metaphysical reality Within his spiritual vision of reality Edwards leaves no stone unturned history and even the reprobate find inherent value and a positive functional role not only in God s program of self glorification but as manifestations of divine being the damned are deformities in God The logic of Edwards s theocentric vision of reality pushes his ideas to the limits of acceptable Reformed orthodoxy and sometimes beyond those limits
