Celia Hindmarch

The Death Of Children:

On the Death of a Child Christine Hindmarch, 2016-07-06 The death of a child whether during or following birth through illness through accident or through suicide is one of the greatest challenges families carers friends and the health and social care professionals who support them can face This book provides professionals with practical advice resources for further support and reading and much needed reassurance that whatever contact they have with the bereaved and however inadequate they may feel to the task they can make a difference With revised material and an entirely new chapter reflecting recent developments in bereavement theory the third edition of this classic text offers unique insights for professionals with varying levels of experience From theory and narrative come practical ideas on what to say what to do how to behave how to stay humble in situations where the only real experts are the bereaved themselves and how professionals can look after themselves in what can be particularly traumatic and upsetting circumstances

Thoughts on the Death of Little Children Samuel Irenæus Prime, 1854 **On the Death of a Child** Celia Hindmarch, 2009 With revised material and entirely new chapters the third edition of this classic text offers unique guidelines for professionals of varying levels of experience This book provides professionals with both practical advice and much needed reassurance that they can make a difference

Never Too Young to Know Phyllis Rolfe Silverman, 1999-08-26 In spite of society's wish to protect and insulate children from death the experience of loss is unavoidable and there is surprisingly little guidance on how to help children cope with grief and bereavement **Never Too Young to Know Death in Children's Lives** is the first book to bring together diverse fields of study offering a practical as well as multifaceted theoretical approach to how children cope with death Using stories of children's own experiences supported by data from a large research study Silverman explains the wide range of effects of loss upon children and the challenges they face as they grieve Silverman presents grief as a normal part of the life cycle which results not only in pain and sadness but also in change and growth She further explains that children can and do cope effectively with loss and the changes it brings as long as they are taught to understand that death is a part of life and that they will be included appropriately in the family drama **Never Too Young To Know Death in Children's Lives** is divided into three parts The first section includes an overview and theoretical framework that examines the social historical developmental and familial forces that frame and focus children's lives as they experience loss The second section offers a detailed analysis of how children experience mourning different types of death including the death of siblings parents and friends and death due to illness suicide accidents and violence The final section includes an accessible guide to helping children cope with grief emphasizing the importance and the necessity of social support as children learn to adapt to their new lives **Never Too Young To Know Death in Children's Lives** is not only ideal for advanced undergraduate and graduate students learning about children but it is also useful for courses on death and dying and the family It is also an invaluable book for mental health practitioners clergy schoolteachers nurses pediatricians as well as the general reader interested in

learning how to deal with death in children's lives **Coping with the Death of a Child** Darin D. Schiffman, 2019-06-19
Coping with the Death of a Child shows clinicians how to integrate various therapeutic modalities and clinical approaches to grief therapy into one comprehensive model linked to positive change. This integrated model shows mental health professionals how to offer practical and emotional support to the bereaved using descriptions of treatments, care protocols and guidelines. Through this approach, practitioners can foster interpersonal support and growth among families even when grieving styles and timing differ between individuals. Clinicians and the families they treat will come away from the book with tools for recognizing distorted and pathogenic exchanges between family members for valuing the emotional elements of their individual experiences and for shifting toward solution-focused activities.

Global Perspectives on Death in Children's Literature Lesley D. Clement, Leyli Jamali, 2015-07-30
This volume visits death in children's literature from around the world, making a substantial contribution to the dialogue between the expanding fields of Childhood Studies, Children's Literature, and Death Studies. Considering both textual and pictorial representations of death, contributors focus on the topic of death in children's literature as a physical reality, a philosophical concept, a psychologically challenging adjustment, and/or a social construct. Essays covering literature from the US, Mexico, El Salvador, Guatemala, Canada, the UK, Sweden, Germany, Poland, Bulgaria, Brazil, Czechoslovakia, the Soviet Union, India, and Iran display a diverse range of theoretical and cultural perspectives. Carefully organized sections interrogate how classic texts have been adapted for the twenty-first century, how death has been politicized, ritualized, or metaphorized, and visual strategies for representing death and how death has been represented within the context of play. Asking how different cultures present the concept of death to children, this volume is the first to bring together a global range of perspective on death in children's literature and will be a valuable contribution to an array of disciplines.

Children's Disturbed Reactions to the Death of a Sibling, **After the Death of a Child** Ann K. Finkbeiner, 2012-12-11
For a parent, losing a child is the most devastating event that can occur. Most books on the subject focus on grieving and recovery, but as most parents agree, there is no recovery from such a loss. This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond. Through detailed profiles of parents, Ann Finkbeiner shows how new activities and changed relationships with their spouse, friends, and other children can all help parents preserve a bond with the lost child. Based on extensive interviews and grief research, Finkbeiner explains how parents have changed five to twenty-five years after the deaths of their children. The first half of the book discusses the short and long-term effects of the child's death on the parent's relationships with the outside world—that is, with their spouses, other children, friends, and relatives. The second half of the book details the effect on the parent's internal world: their continuing sense of guilt, their need to place the death in some larger context, and their inability, sometimes, to consistently do so. Their new set of priorities, the nature of their bond with the lost child, and the subtle and creative ways they have of continuing that bond. Finkbeiner's central point is not so much how

parents grieve for their children but how they love them Refusing to fall back on pop jargon about recovery or to offer easy solutions or standardized timelines Finkbeiner's is a genuine and moving search to come to terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived **Explaining Death to Children** Earl A.
