The Death Of The Army A Pre Mortem:

The Death of the Army Edward Lavoise King, 1972 *The death of the army* Edward L. King (A.B., M.D.), 1972
Armor, 1972 *Not a Gentleman's War* Milam, 2010-07-13 Wars are not fought by politicians and generals they are fought by soldiers Written by a combat veteran of the Vietnam War Not a Gentleman's War is about such soldiers a gritty against the grain defense of the much maligned junior officer Conventional wisdom holds that the junior officer in Vietnam was a no talent poorly trained unmotivated **ARI Technical Report**, 1977 *Dangerous Grounds* David L. Parsons, 2017-03-13 As the Vietnam War divided the nation a network of antiwar coffeehouses appeared in the towns and cities outside American military bases Owned and operated by civilian activists GI coffeehouses served as off base refuges for the growing number of active duty soldiers resisting the war In the first history of this network David L Parsons shows how antiwar GIs and civilians united to battle local authorities vigilante groups and the military establishment itself by building a dynamic peace movement within the armed forces Peopled with lively characters and set in the tense environs of base towns around the country this book complicates the often misunderstood relationship between the civilian antiwar movement U S soldiers and military officials during the Vietnam era Using a broad set of primary and secondary sources Parsons shows us a critical moment in the history of the Vietnam era antiwar movement when a chain of counterculture coffeehouses brought the war's turbulent politics directly to the American military's doorstep **Air University Review**, 1980 *Organizational Reaction to Social Deviance* Robert Joseph Stevenson, 2010 This study in criminology sociology and the US Military explores changes in the meaning and production of deviant populations in American military settings since 1941 It is designed to highlight the operation of an ethos of control as armed forces and society undergo historically unstable accommodation and conflict The author examines time series data on organizational reaction to deviance in military settings Bad Paper Discharges courts martial and administrative controls in light of central characteristics of military settings the social composition of officer and enlisted ranks force levels technological changes in war hardware and the distribution of risks faced by various kinds of soldiers Propositions from the deviance literature concerning 1 the constancy of punishment 2 the duration intensity and priority of sanctioning and 3 cohesion and stress are examined in military contexts to discern the changing social control climates therein Some sources of the shift are located in the role that risk plays in the system and the function of the officer corps as agents of social control In short the character of social institutions is knowable in part by studying the manner in which deviants therein are controlled stigmatized and expelled An extensive bibliography is provided
Confidence in battle, inspiration in peace Rodger R. Venzke, 1977 **No Sure Victory** Gregory A. Daddis, 2011-06-01 In *No Sure Victory* Army officer and historian Gregory Daddis looks deep into the Army's techniques for measuring military success in Vietnam and presents a much more complicated and disturbing account of the American misadventure in Indochina Daddis shows how the US Army adopted a massive and eventually unmanageable system of

measurements and formulas to track the progress of military operations that ranged from pacification efforts to search and destroy missions Concentrating more on data collection and less on data analysis these indiscriminate attempts to gauge success may actually have hindered the army's ability to evaluate the true outcome of the fight at hand a roadblock that Daddis believes significantly contributed to the many failures that American forces suffered in Vietnam Filled with incisive analysis and rich historical detail No Sure Victory is not only a valuable case study in unconventional warfare but a cautionary tale that offers important perspectives on how to measure performance in current and future armed conflict
