The Role and Control of Weapons in the 1990s Frank Barnaby,2021-05-30 This book first published in 1992 examines defence issues as the twentieth century drew to a close With the end of the Cold War many of the threats to European security such as the threat of nuclear war disappeared New ones however were emerging The rise of nationalism the spread of weapons of mass destruction to politically unstable countries the increase in world population the debt crisis all

these contributed to security problems that needed to be resolved The book assesses the possibilities for future European defence and the role that the United States would play in it will it be prepared to stay in Europe under European leadership or must it dominate It also considers the capabilities offered by new military technology and the need for control of weapons of mass destruction

The Logic of Internationalism Kjell Goldmann,2002-11-01 Internationalism is the view that institution building and peaceful cooperation will make peace and security prevail in a system of independent states This book examines this controversial topic and discusses whether such a view is realistic or whether international relations are typically characterised by tension and war Kjell Goldmann seeks to examine the plausibility of internationalism under present day conditions A theory of internationalism is outlined and is shown to have two dimensions one coercive to enforce the rules and decisions of international institutions and one accommodative to avoid confrontation by means of mutual understanding and compromise Problematic features of the theory are then considered in detail the assumption that all international cooperation tends to inhibit war and the tension inherent in the joint pursuit of coercion and accommodation

Arms Control and Security: The Changing Role of Conventional Arms Control in Europe Kevin Wright,2017-11-01 This title was first published in 2000 The aim of this text is to explore conventional arms control in Europe The early chapters provide a primarily historical perspective looking at the context foundations main provisions and institutional structure of the main agreements The later chapters explore the continuing and likely future roles of the OSCE and NATO in the arms control process The final chapters examine more contemporary developments by looking at the Adapted CFE Treaty and Vienna Documents agreed at the OSCE Istanbul Summit in November 1998 and the challenges posed to existing arrangements by the changing and emergent security threats that potentially face Europe

The Naval Arms Trade Ian Anthony,1990 This book offers a sober appraisal of the world trade in naval weapon systems at a time when recent attacks on merchant shipping in the Persian Gulf have kept maritime security at the centre of global attention At the same time India outside the international non proliferation regime has become the first ever customer for a nuclear attack submarine In 1987 88 the most expensive and controversial arms sales were related to naval systems and yet while regional navies are busy increasing their firepower the traditional naval powers remain dependent on their sea borne trade In particular the book highlights critical areas in which trade in naval systems differs from the sale of land or air systems and it discusses the implications of these differences

Realism versus Global Arms Control and Disarmament Carmen Chas,2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship
