Slow Emergencies:

Emergency Claire Laurier Decoteau, 2024-12-16 A forceful critique of how and why states failed to protect marginalized communities in their responses to the COVID 19 pandemic and the implications of ignoring the existing emergencies that exacerbated the pandemic's devastating effects The COVID 19 pandemic inaugurated a state of emergency unprecedented for most Americans Some could observe this emergency from the relative safety of their homes but those in marginalized communities without access to the same privileges were forced to risk their health and well being In Emergency sociologist Claire Laurier Decoteau documents and theorizes the emergencies of COVID 19 by looking at the experiences of Chicagoans and the policies that shaped their lives She describes the uneven racial impact of COVID 19 on Black and Latinx Chicagoans as a crisis within a crisis caused by a convergence of emergencies a state of emergency that protected white supremacy and wealth the slow emergencies racially marginalized populations have faced for decades due to the long term gutting of care infrastructure and deindustrialization and the sacrifice essential workers were asked to make to protect the United States economy As Decoteau shows the city's racial equity project used data to determine which communities would be given scarce resources but once positivity or death rates declined resources were retracted and redistributed elsewhere City officials thus attempted to manage these converging emergencies by manipulating epidemiological data and orchestrating systems for interpreting that data Decoteau makes clear that the emergencies precipitated by COVID 19 long predated the pandemic and that we will continue to live with their compounding crises if we do not tackle their structural underpinnings

States of Emergency and Human Rights Protection Monika Florczak-Wątor, Fruzsina Gárdos-Orosz, Jan Malíř, Max Steuer, 2024-02-13 Emergencies are ubiquitous in 21st century societal discourses From the rise of emergency pronouncements in the United States since 9 11 accompanied by the associated violations of fundamental rights through talks of crises in the EU in relation to the economy Putin's occupation of Crimea as recently amplified by the full scale invasion of Ukraine or refugees to the long neglected looming climate catastrophe emergency discourses have been catapulted to the centre of attention by the critical juncture of the COVID 19 pandemic This volume presents and compares the existing regulations and practices of emergencies and human rights protection in the Visegrad V4 countries As such the analysis covers Czech Republic Hungary Poland and Slovakia Although these European countries share a common historical experience and are now members of the EU and NATO they differ in some of their constitutional traditions and also in the dynamics of their political regimes Divided into three parts the first two comprehensively discuss the constitutional models of emergency and human rights protection in each of the V4 countries while the third part illustrates how these models and the general framework of rights protection materialised in the limitations of the selected human rights during the COVID 19 pandemic The volume provides a compass for more in depth comparative and interdisciplinary inquiries into the forms and practices of emergencies in one of the EU regions that faces illiberalisation and the consequences of the ongoing invasion of

Ukraine by the Russian Federation on its eastern borders It will be a valuable resource for academics researchers and policymakers working in the areas of Constitutional Law and Politics The Introduction Chapter 7 and Chapter 10 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons

Law, Climate Emergency and the Australian Megafires Nicole Rogers, 2021-09-09 This book addresses the ways in which the Black Summer megafires influenced the development of climate narratives throughout 2020 It analyses the global pandemic and its ensuing restrictions as a countervailing force in the production of such narratives Lives and properties were lost in the spring and summer of 2019 and 2020 when catastrophic bushfires burnt through millions of hectares of mainland Australia Nearly 3 billion native animals died And for millions of Australians and others worldwide it was through the Australian megafires that the global climate emergency became tangible and concrete no longer a comfortably deferred albeit problematic abstraction which could be consigned to future generations to deal with This book explores the legal and other implications of new

understandings of climate emergency arising from the fires and the emergence of a hierarchy of emergencies as the pandemic came to dominate global and domestic political discourses It examines narratives of culpability and legal avenues for seeking retribution from government and big fossil fuel emitters It also considers the impact of the fires on the burgeoning phenomenon of climate activism particularly in Australia and the ways in which pandemic restrictions curtailed such activism Finally the book reflects on the fires through the lenses offered by climate fiction and apocalyptic fiction more generally in order to consider how these shape and might shape our responses to them This important and timely book will appeal to environmental lawyers and socio legal theorists as well as other scholars and activists with interests in climate change and its impact It is recommended for anyone concerned about current and future climate disasters and the shortcomings in legal political and popular responses to the climate crisis
