Community Studies Colin Bell, Howard Newby, 2021-10-17 Originally published in 1971 this was the first text on community studies which analysed the major empirical work in this field in a comparative perspective It is concerned both with the sociology of community and the sociology of community studies It takes both the findings of individual studies and the research process itself as significant sociological data in their own right and it asks continually how do we know what we know about communities Community Studies is then not only a contribution to that particular field but also to our understanding of the interaction between theory and method in sociology Studies are analysed from North and Latin America Britain and Western Europe and India Two central problems stratification and power are considered at greater length This book would prove to be an invaluable introduction not only for students of sociology but also for architects planners and all those who had an interest in the community at the time Its authors were and had been actively engaged in field research in this area

Mass Society Salvador Giner, 2013-10-22 Mass Society deals with the total outlook of human including modern politics culture social inequality community life and problems The book reviews the history of democracy and discontent The text analyzes the mob rule the disenchantment of progress and the history of democracy Modern sociological theory explains the opposition of two extreme societal models to describe the historical dynamics of mankind The book is an attempt to explain that a mass society outlook exists and has some inner coherence and distinctive quality The author argues that such outlook or theory is a prominent feature in the cultural imagination of man and that modern secular society cannot be understood without such theory The author then proceeds to identify majority with mass and the identification of human with mass

human This identification will lead to a community vision though the author argues the growth of a mass interpretation of society has a negative effect on the liberal theory of the individual The text can be interesting for political science majors sociologists psychologists and economists

Millhands & Preachers Liston Pope, Patrick. Pope, 1942-01-01 To explore the question of the church's role in Western economic systems Mr Pope presents a pioneering study of the actual role played by the church in the industrial community Gastonia North Carolina He has written a brilliant criticism of the relationship between the textile mills and the churches with broad implications for industry and church

The War Game Irving Horowitz, 2017-07-28 War gaming has become a characteristic feature of modern life From amateur clubs to professional academicians playing the war game in the company of military circles we have come up against the phenomenon of the robotization of human life Irving Louis Horowitz argues that those who protest the idea that war is a game do so on moral grounds that leave unanswered tough questions What is the alternative to playing the game What will become of us if we allow the opponent to become the better player in an all or nothing game of extinction Horowitz provides answers in a logical manner while focusing on facts and ethical alternatives to risky ethics The work is divided into three sections The New Civilian Militarists Thermonuclear Peace and Its Political Equivalents and General Theory of Conflict and Conflict Resolution Included are such topics as arms policies and games morals missiles and militarism and conflict consensus and cooperation Horowitz concludes that it is time to register the fact that the basic option to destructive uses of science is not traditional morality but better science a science of survival With a new introduction by Howard Schneiderman along with a major essay and other materials not included in the original edition this classic work is a worthy contribution to intellectual debate in the twenty first century and a must read for military strategists sociologists and historians

The Evolution of Alienation Lauren Langman, Devorah Kalekin-Fishman, 2006 The Evolution of Alienation Trauma Promise and the Millennium presents a collection of essays that examine the prevalence of alienation in the contemporary world Although the authors share a critical approach to society their views of alienation vary While some feel that alienation is inescapable under the conditions of late modernity others see that especially at this time there are opportunities to overcome alienation Testing their approaches the authors touch on highly diverse domains of life The book is divided into four sections each with a focus on how alienation is produced and perhaps overcome Part I presents theoretical approaches to shifting views of alienation Here the authors discuss how alienation is disclosed in social science in technology and in biological constructions of the human being Part II deals with political consequences of alienation The three chapters focus on how alienation can lead to fascist beliefs how it functions in the development of authoritarian personalities and how alienation is disclosed in teen age violence but also in the justice meted out to desperate teens without compassion Part III includes examinations of alienation in identity culture and religion Here researchers discuss how the alienating conditions of globalization create alienated identities that are carnivalized in shock music and in exploitative television shows The last chapter of this section sees in these developments

evidence of our inability or unwillingness as social scientists to deal with transcendental values Part IV focuses on phenomena from everyday life showing how alienation undermines the advantages of community and the intimacies of dialogue Although the very concern with alienation shows awareness of trauma there are throughout the book hints of promise in technology in loving and creative domesticity in activism and through grass roots initiatives in education Through an interest in the cosmos human being may yet discover the way out of alienating labyrinths

Selling Science Stephen E. Mawdsley,2016-08-01 Today when many parents seem reluctant to have their children vaccinated even with long proven medications the Salk vaccine trial which enrolled millions of healthy children to test an unproven medical intervention seems nothing short of astonishing In *Selling Science* medical historian Stephen E Mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children 55 000 healthy children revealing how this long forgotten incident cleared the path for Salk's later trial Mawdsley describes how in the early 1950s Dr William Hammon and the National Foundation for Infantile Paralysis launched a pioneering medical experiment on a previously untried scale Conducted on over 55 000 healthy children in Texas Utah Iowa and Nebraska this landmark study assessed the safety and effectiveness of a blood component gamma globulin to prevent paralytic polio The value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks but as Mawdsley points out compromise and coercion moved it forward And though the trial returned dubious results it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954 Indeed the concept conduct and outcome of the GG study were sold to health professionals medical researchers and the public at each stage At a time when most Americans trusted scientists their mutual encounter under the auspices of conquering disease was shaped by politics marketing and at times deception Drawing on oral history interviews medical journals newspapers meeting minutes and private institutional records *Selling Science* sheds light on the ethics of scientific conduct and on the power of marketing to shape public opinion about medical experimentation

Power and Privilege Gerhard E. Lenski,2013-04-01 *Power and Privilege* seeks to answer the central question of the field of social stratification Who gets what and why Using a dialectical view of the development of thought in the discipline Gerhard Lenski describes the outlines of an emerging synthesis of theories He shows that perspectives as diverse and contradictory as those of Marx Spencer Sumner Veblen Mosca Pareto Sorokin Parsons and Dahrendorf are parts of an evolving and systematic body of theory

The Brotherhood of Freemason Sisters Lilith Mahmud,2020-03-04 This stupendous ethnography of female Freemasonry in Italy reveals the fascinating paradox of elitism and exclusion experienced by female brothers Michael Herzfeld author of *Evicted from Eternity* From its cryptic images on the dollar bill to Dan Brown's *The Lost Symbol* the Freemasons have long been one of the most romanticized secret societies in the world But a simple fact escapes most depictions of this elite brotherhood there are also female members In this groundbreaking ethnography Lilith Mahmud takes readers inside Masonic lodges of contemporary

Italy where she observes the ritualistic and fraternal bonds forged among Freemason women Offering a tantalizing look behind lodge doors The Brotherhood of Freemason Sisters unveils a complex culture of discretion in which Freemasons reveal some truths and hide others Female initiates one of Freemasonry's best kept secrets are often upper class and highly educated yet avowedly antifeminist Their self cultivation through the Masonic path is an effort to embrace the deeply gendered ideals of fraternity In this lively investigation Mahmud unravels the contradictions at the heart of Freemasonry an organization responsible for many of the egalitarian concepts of the Enlightenment and yet one that has always been and in Italy still remains extremely exclusive The result is not only a thrilling look at a surprisingly influential world but a reevaluation of the modern values we now take for granted **Beyond Adversary Democracy** Jane J.

Mansbridge, 1983-06-15 Sociologists recurrently complain about how seldom it is that we produce books that combine serious theorizing about important issues of public policy with original and sensitive field research Several rounds of enthusiastic applause then are due Jane Mansbridge for having produced a dense and well written book whose subject is nothing less ambitious than the theory of democracy and its problems of equality solidarity and consensus *Beyond the Power Mystique* Robert Prus, 1999-02-25 Despite the considerable attention given to power by foundational sources such as Machiavelli Hobbs Weber Durkheim and Marx and those social theorists who have built on their works surprisingly little attention has been given to the study of power as an enacted feature of community life Locating power more directly within a symbolic interactionist framework *Beyond the Power Mystique* not only enables scholars to permeate much of the mystique shrouding power but explicitly viewing power as intersubjective accomplishment the material presented here fosters a research agenda that is highly attentive to the collectively articulated aspects of power relations Consideration is given to the ways in which power is brought into existence implemented experienced sustained objectified resisted dissipated and reconstituted in actual practice Addressing the full range of associations occurring in all human arenas from small group settings to large scale theaters of operations this volume provides a conceptually viable means of synthesizing so called macro and micro realms of power Prus considers people's definitions of and routings into situations of power as well as the dilemmas they face the strategies they assume and the limitations they encounter as they enter into interchanges with others on both more individualized and collectively coordinated bases and in both long term and more situated instances

Germania, USA Noel Iverson, 1967-02-10 Germania USA was first published in 1967 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions An unusual community in southern Minnesota New Ulm a town of about 12 000 inhabitants is the subject of this sociological study New Ulm was founded in 1856 by a group of German immigrants who came to the United States as refugees from the revolution of 1848 in Germany They were members of the Turnverein a society of liberal thinkers who were a political minority in Germany In founding New Ulm they established a utopian ethnic

community became the town's status elite and for a long time monopolized its economic, political, and cultural life. Professor Iverson analyzes four aspects of sociological change in the community: class, status, power, and assimilation. Each aspect is viewed according to the differences found between two generations of the upper status group, the Turners, and two corresponding generations of non-Turners. In addition to its substantive contribution to our knowledge of ethnic settlements, the study demonstrates a gain in methodological precision over many earlier studies of ethnic communities. Its chief methodological innovation is in the use of scales to verify and measure the changing structure of class, status, and power, and to gauge the extent of assimilation. The book is of interest not only to sociologists, especially those concerned with the study of community change, but also to political scientists interested in the study of community power structures. Also, the methodology will be instructive to those interested in the design of community studies.

Saving Society Bernard S. Phillips, David Christner, 2015-12-22. Why do many problems throughout the world seem to be getting worse? *Saving Society* argues that a dramatic change in our mode of thinking is required. The authors show how many of our fundamental assumptions lead to an overly bureaucratic approach, blocking solutions to many of our problems. They contrast our present emotional repression and conforming behaviour with a more liberated form of perception, thought, and emotional expression, which could allow us to break out of these bureaucratic routines. *Saving Society* shows how this alternative approach might lay the basis for more effective and democratic institutions.

Smallville Carl Milofsky, 2008. Familiar organizational theories often do not fit comfortably when applied to community-level associations or small local nonprofit organizations. In *Smallville*, Carl Milofsky empirically and theoretically studies the organizational dynamics involved in this common American model. Organizations functioning within a community are usually treated as separate units, but when they all exist in the same place and tend to be made up of the same people who are living out different aspects of their identities in various settings, a new analytical paradigm is required. Milofsky's study culminates in the formulation of an innovative way of understanding this phenomenon: an essential pioneering theory of transorganizations.
