Reid, 1993 Using up to date statistical and econometric techniques this book discusses the role of small business enterprise in a mature market economy and evaluates the real behaviour of small firms in a contemporary competitive environment *Small Business Enterprise*, 1993 Small Business Enterprise Gavin C. Reid, 2009 This empirical analysis of a small firm database examines the role of the small business enterprise in a mature mixed market A database was created using over 40 000 data points gathered from 70 to 80 small business enterprises SBEs in Scotland from 1985 and 1988 The data is both qualitative and quantitative based on a questionnaire interview and a subsequent reinterview questionnaire and including enterprise profiles of the firms The study covers a range of research areas including cost sales and competition innovation and scale economies so that conclusions are numerous and wide ranging Results indicate that SBEs are characterized by a kinked demand curve price increases at economic booms self interest over ethical concerns and a focus on competitive as opposed to defensive strategies Consequently intra industry rivalry is a core construct of SBEs The research also shows strong evidence for short run scale economies Small firms can be large in terms of market power though cost controls tend to suffer when an SBE attempts to grow rapidly Finally SBEs have a sharp learning curve after inception so that experience of competition translates into competitive advantage The study concludes that the research on SBEs is significantly smaller and less mature than that of large firms and that this is best combated by analysis of such relational databases that combine and integrate evidence from a given population to be manipulated statistically in sophisticated ways CJC *CARICOM Single Market and Economy* Kenneth O.
