Macro Systems in the Social Environment Dennis D. Long, Marla C. Holle, 1997 This text focuses on the importance of organizations, communities, society, and global influences in assessing human behavior in the social environment. It challenges students to probe the larger social context when viewing the complexities of human development. Designed especially to address the call for greater infusion of macro level content into social work education, the book is ideal for courses on human behavior in the social environment and macro practice. To facilitate the integration of theory and content, the authors use different theoretical orientations to organize the chapters. These are followed by an analysis of developmental issues, a case example, a section in which macro level influences are highlighted, a reintegration of theory section, and suggested activities.

Organizational Change and Development in Human Service Organizations David Bargal, Hillel Schmid, 2012-11-12 Through change and development, human service organizations can promote the well-being of their clients more effectively. This important book describes and analyzes recent research on organizational change and development in the social and human services. It is particularly relevant in light of the significant changes in these organizations during the last decade and the lack of literature in the area. *Organizational Change and Development in Human Service Organizations* brings together the work of scholars who deal with social welfare administration and change in human services, combining research studies with theoretical approaches to change and development. It helps readers better understand the process of change and the role of the environment in creating change. Insightful chapters encourage practitioners, scholars, and students to plan change in organizations, utilize models of change and organizational development in real life, and evaluate change and its results and impacts. This much-needed book addresses a variety of topics, including the uses of force field analysis in assessing prospects for organizational change, planned change in voluntary and government social service agencies, interorganizational coordination of services to children in state custody, early stages in the creation of self-help organizations, organization and community transformation, organizational development in public social services, strategic and structural change in human service organizations, a developmental approach to program evaluation.
