For too long Belgium remained an unexplored terrain by comparative political scientists Belgium's politics were best known through the writings of Arend Lijphart who considered it a model case of consociationalism Over the past ten to fifteen years the analysis of consociationalism has been complemented by a more detailed coverage of Belgium's spectacular transformation process from a unitary into a federal state moving rapidly now to disintegration Likewise several peculiar aspects of Belgian politics such as the record fragmentation of its party system have been covered in edited volumes or international journals However given the complexity of the Belgian configuration of political institutions and actors any inclusion of particular aspects of the Belgian case in comparative work calls for an in depth and integrated understanding of the broader political system This is the first book which provides such an analysis It brings together a team of 19 political scientists and sociologists who aim to explain the dynamics and incentives of institutional change and seek to analyze the intricate interplay between the main institutional components of the Belgian body politic The sociological political and institutional determinants and the consequences of the federalisation process of Belgium is the central theme that links each of the individual chapters This book will be essential reading for students who want to understand the politics of Belgium and for anyone with a strong interest in West European Politics comparative politics and comparative federalism This book was published as a special issue of West European Politics

analysing differences and similarities in the development of housing systems in West European countries One of the key issues is the practicability of this framework in future policy making Especially Kemeny s theory on rental markets appears to offer a valuable framework to evaluate policy strategies Therefore the book is not only relevant to academics but also to policy makers **Foreign Publications Accessions List** ,1973 **Appendix (Synopsis, Bibliographies, Tables)** Peter

Outside the United States the idea of a consumer housing subsidy is a highly developed concept Housing allowances shelter allowances rent allowances or rent rebates as they are called have been paid out on a larger scale for longer periods of time on an entitlement basis with a much greater variety of rationales than in the United States As the United States moves ahead with its demonstration program it is timely to examine and evaluate foreign experiences with the consumer housing approach E Jay Howenstine addresses common questions that have puzzled many policymakers How do consumer housing subsidies work For tenants Homeowners Builders And government officials Gathered here is the definitive experience of the countries that have employed them From Australia to the United Kingdom here is the reality gleaned from a dozen countries and brought to bear on the United States Both the virtues and the limitations of the approach are presented in detail for everyone interested in housing This study is divided into three major parts First Howenstine reviews the historical background and analyzes housing allowance strategies that foreign governments have adopted A second part examines in detail the major principles and elements with which governments have fashioned their systems The third part examines the impact of housing allowance systems and weighs them in the light of the original objectives Conclusions are also drawn about foreign experiences Should financial assistance to low income families be in the form of consumer housing subsidies or producer housing subsidies or some synthesis of the two systems Should the housing allowance be maintained as a separate housing policy or should it be integrated into a general income maintenance policy This book addresses an increasingly prominent portion of the housing market
