*International Social Survey Programme 1984-2009* Max Haller,Roger Jowell,Tom W Smith,2009-09-11 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe Starting in 1984 with five nations it now encompasses forty five nations spread over five continents each administering an identical annual survey to a random sample of their population Analyses of the data or descriptions of the methodology already appear in over 3 000 publications This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents nations and over time Subjects range from inequality and the role of the state ethnic national and global identities the changing relevance of religion beliefs and practices gender roles family values and work orientations household and society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research **The Moral Economy of Class** Stefan Svallfors,2006 A comparative study of political attitudes across social classes examining what accounts for such differences in opinion and determining whether these differences change over time

**Political Protest in Contemporary Africa** Lisa Mueller,2018-06-28 From spray painted slogans in Senegal to student uprisings in South Africa twenty first century Africa has seen an explosion of protests and social movements But why Protests flourish amidst an emerging middle class whose members desire political influence and possess the money education and political autonomy to effectively launch movements for democratic renewal In contrast with pro democracy protest leaders rank and file protesters live at a subsistence level and are motivated by material concerns over any grievance against a ruling regime Through extensive field research Lisa Mueller shows that middle class political grievances help explain the timing of protests while lower class material grievances explain the participation By adapting a class based analysis to African cases where class is often assumed to be irrelevant Lisa Mueller

provides a rigorous yet accessible explanation for why sub Saharan Africa erupted in unrest at a time of apparent economic prosperity

**New Critical Writings in Political Sociology** Alan Scott, 2024-11-01 The articles collected together in this volume are concerned with why and how people get involved in politics whether through formal mechanisms such as voting through some of the more informal means and settings of social movement networks and political protest or through engagement in public debate But just as important is the question of why people do not get involved in politics What social conditions ideas and values facilitate or discourage political activity How is it that some people are systematically disempowered in democratic societies in comparison with others What social forms offer the most promise for extending and deepening democracy This volume brings together the most seminal papers which together form a record of how political sociologists since the 1970s have framed questions about the range and limits of democratic political engagement and developed concepts and methodologies in order to research the answers to those questions

**The Shape of Social Inequality** David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller's many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller's programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification

**International Social Science Journal** , 2008

**The Politics of the Elite** Modesto Gayo, María Luisa Méndez, 2023-11-24 This book is a study of class formation at the top of the social hierarchies during the turbulent and changing early twenty first century Contrary to perceptions that privileged individuals exist according to little more than market and economic logics the book provides evidence that they are by no means absent from politics and civic engagement Adopting a focus on reproduction distinction and politics it delves into the complex relationship between cohesion and fragmentation that exists within the most privileged groups formed over the course of the contemporary neoliberal period By knitting a dialogue between spatial analysis multiple correspondence analysis and in depth interviews the book provides insights into the intricate relations between institutions and political subjectivities and the role of space and mothering in the political socialisation of Chile's most privileged families The result is a dense description of a social class fragmented by subtle ideological lines based upon economic inheritance

socialisation within homogeneous family environments paths into the labour market and social and political activities This book will constitute a much needed research resource for academics students and professionals in areas such as elite studies social stratification inequality social reproduction accumulation political socialisation and contemporary conservative progressive views      **Social Mobility in Industrial Society** Seymour Lipset, 2018-04-27 In a careful analysis of the existing literature the authors marshal an imposing array of evidence in support of their major argument that social mobility is an integral and continuing aspect of the process of industrialization This classic volume continues to be a basic reference source in the field of occupational mobility      **Ibss: Political Science: 1987** British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences      *Social Inequalities in Comparative Perspective* Fiona Devine, Mary C. **In an Age of Experts** Steven

Brint,2020-06-30 Since the 1960s the number of highly educated professionals in America has grown dramatically During this time scholars and journalists have described the group as exercising increasing influence over cultural values and public affairs The rise of this putative new class has been greeted with idealistic hope or ideological suspicion on both the right and the left In an Age of Experts challenges these characterizations showing that claims about the distinctive politics and values of the professional stratum have been overstated and that the political preferences of professionals are much more closely linked to those of business owners and executives than has been commonly assumed
