Social Polarization in Post-Industrial Metropolises John O'Loughlin, Jürgen Friedrichs, 2015-08-17 No detailed description available for Social Polarization in Post Industrial Metropolises The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding Henri Lefebvre and the Theory of the Production of Space Christian Schmid, 2022-11-29 Henri Lefebvre s was the major theorist of space and of the urban This is the definitive book on Lefebvre Shortlisted for the Deutscher Memorial Prize 2023 This book presents an encompassing detailed and thorough overview and reconstruction of Lefebvre s theory of space and of the urban Henri Lefebvre belongs to the generation of the great French intellectuals and philosophers together with his contemporaries Michel Foucault and Jean Paul Sartre His theory has experienced a remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life **Readings in Urban Theory** Susan S. McKendry, 2017-09-22 City greening has been heralded for contributing to environmental governance and critiqued for exacerbating displacement and inequality Bringing these two disparate analyses into conversation this book offers a comparative understanding of how tensions between growth environmental protection and social equity are playing out in practice Examining Chicago USA Birmingham UK and Vancouver Canada McKendry argues that city greening efforts were closely connected to processes of post industrial branding in the neoliberal economy While this brought some benefits concerns about the unequal distribution of these benefits and greening s limited environmental impact challenged its legitimacy In response city leaders have moved toward initiatives that strive to better address environmental effectiveness and social equity while still spurring growth Through an analysis that highlights how different varieties of liberal environmentalism are manifested in each case this book illustrates that cities though constrained by inconsistent political will and broader political and economic contexts are making contributions to more effective socially just environmental governance Both critical and hopeful McKendry s work will interest scholars of city greening environmental governance and comparative urban politics **Introducing Human Geographies, Second Edition** Paul Cloke, Philip Crang, Mark

Segregation in Comparative Perspective Kuniko Fujita, 2016-04-08 We know very little about variations in urban class and ethnic segregation among nations and even less about differences among cities in different regions of the world Spatial organization places and neighbourhoods matters significantly in some cities in reproducing class relations and ethno racial hierarchies but may be much less important in others The degree and the impact of segregation depend upon contextual diversity By emphasizing the importance of contextual diversity in the study of urban residential segregation the book questions currently popular urban theories such as global city neoliberal urbanism and gentrification These theories tend to dissociate cities from their national and regional context and thus ignore their history culture politics and institutions The aim of this book is to introduce the significantly different urban experiences in social and spatial segregation patterns and rationales which exist among the world's regions and to demonstrate that urban theory needs to draw systematically upon this wide range of experiences The cities selected Athens Beijing Budapest Copenhagen Hong Kong Madrid Paris S o Paulo Taipei and Tokyo were chosen in order to achieve geographical spread to maximise the diversity of types of socioeconomic regulation This volume is thus able to avoid the interpretative limitations and misconstructions resulting from universalizing the Anglo American experience International Encyclopedia of Human Geography , 2009-07-16 The International
