*Quantitative Methods in Social Science Research* Stephen Gorard, 2003-03-02 This clever scheme builds on Gorard's previous book *Quantitative Methods in Educational Research*. He has revised the original book in the light of experience and feedback and has reworked it so that it includes more social science examples. Four chapters are entirely new.

**Quantitative Methods in Educational Research** Stephen Gorard, 2010-07-01 This is a comprehensive guide to quantitative research rooted in the author's own teaching and research. In particular, it challenges both the student who does not do numbers and the student who does nothing but numbers and who therefore fails to interpret or challenge his/her results. The book shows how all educational researchers need to do quantitative research, even if only in the sense of reading other people's research findings. In fact, the book argues that the conventional distinction between primary and secondary research data is inadequate since there is enormous need/opportunity for conducting research through using and reinterpreting secondary data. This leads to one of the main selling points of the book: Gorard's idea of the idle researcher who makes valuable contributions to the research literature by using data gathered by other researchers. **Changing**

**Educational Landscapes** Dimitris Mattheou, 2010-04-08 Analyzing educational landscapes—the fundamental values, principles, and institutions of the sector—is a highly complex and demanding task for any researcher. Like shifting desert sands, these aspects of education are in a constant state of flux, changing according to the unpredictable economic, social, cultural, and geo-political circumstances of late modernity. Key aspects of the intricate, fluid, and multifarious contemporary setting can always escape the researcher's necessarily selective observation. The contributors to this book share the view that it is wise, therefore, to take note of other people's ideas, perceptions, and perspectives to compare notes and reflect critically on them. Thus, the papers presented here are a critical and comparative analysis of today's changing educational landscapes. They are an exploration of some of the forces and factors that induce these changes and also examine some of their most significant implications. The work takes a fresh look at received ideology and institutional practices and delineates the increasingly internationalized educational discourses and policies. Among other things, the book discusses the obsession with quality in education and the alternative perceptions of educational equality, the rising concern about the obstacles to truly multicultural education, and the debate about the epistemological foundations both of knowledge and knowledge production. Underlying all of the papers in the book is the author's intention to enhance our understanding of educational change in this era of transition and to further our appreciation of its multifaceted expressions across the world. *Schools, Markets and Choice Policies*

John Fitz, Stephen Gorard, Chris Taylor, 2003-12-16 Choice and selection are now cornerstones of education policies wherever these have been shaped by market economics. Now, as never before, schools can face uncertain futures because their survival is determined by external factors such as admission policies and parental preferences. Because of the link between schooling and housing and other public sector services, the implications of increasing choice extend well beyond education. Schools

Markets and Choice Policies brings together the findings of the most comprehensive research ever conducted into choice in secondary education and provides in depth context analysis and discussion In assessing the impact of choice policies not only upon the education system itself but also upon wider society it provides valuable insights into economic and social segregation A groundbreaking contribution to the debate on the role of choice and market economies in education this book is essential reading for anyone involved in determining or implementing education policy at all levels     The Social Face of the Euro Dirk van der Werf,2003     **General catalogue of publications 2001** European Commission,2001     **Vatican II** Melissa J.
