**Social Theory for a Changing Society** Pierre Bourdieu, James S Coleman, Zdzislaw Walaszek Coleman, 2021-06-02 There is in modern society a structural change that underlies many of the social changes with which the conference was concerned My argument here will be that this is a qualitative change in the way society is organized a change with many implications I will call this a change from primordial and spontaneous social organization to constructed social organization see Coleman 1990 Chapters 2 3 and 24 for an extended examination of this change The common definitions of these terms contain some hint of what I mean but I will describe the change more fully to ensure that it is clearly understood By primordial social organization I mean social organization that has its origins in the relationships established by childbirth Not all these relations are activated in all cultures but some subset of these relations forms the basis for all primitive and traditional social organization From these relations more complex structures unfold For example from these relations come families from families come clans from clans villages and from villages tribes ethnicities or societies

**Origins of Sociological Theory** Arris Dorsey &, 2018-11-30 The field of sociology itself and sociological theory by extension is

relatively new Both date back to the 18th and 19th centuries The drastic social changes of that period such as industrialization urbanization and the rise of democratic states caused particularly Western thinkers to become aware of society The oldest sociological theories deal with broad historical processes relating to these changes Since then sociological theories have come to encompass most aspects of society including communities organizations and relationships The basic insight of sociology is that human behaviour is largely shaped by the groups to which people belong and by the social interaction that takes place within those groups The main focus of sociology is the group not the individual This compendium offers selections that present special propositions specific concepts or examples of substantive theorizing rather than discussions of integrated systems The present attempt is made to describe the different aspects of sociological theory generally being explained by the social scientists and it is hoped that it will be of great use for all those concerned with sociology
