Wilhelm Dilthey: Selected Works, Volume VI Wilhelm Dilthey, 2019-11-12 This book completes a landmark six volume translation of the major writings of Wilhelm Dilthey 1833-1911 a philosopher and historian of culture who continues to have a significant influence on philosophy hermeneutics and the theory of the human sciences These volumes make available to English readers texts that represent the full range of Dilthey's work The works in this volume present Dilthey's most deeply held views about philosophy and how it can guide human practices **System of Ethics** 1890 argues that Humean sympathy motivates us only externally and must be replaced with the internally motivated fellow feeling of solidarity that respects others as ends in themselves **The Essence of Philosophy** 1907 demonstrates how philosophy has developed from its traditional metaphysical role to the epistemological and encyclopedic functions that ground and order the natural and human sciences The work also discloses an orientational function of philosophy that is explored further in **The Types of World View and Their Development** 1911 Philosophical world views are important in that they address the existential needs and riddles that grow out of life experience and are not solved by any of the sciences In addition the book features three other significant essays **Present Day Culture and Philosophy** 1898 concerns the challenges to philosophy posed by contemporary culture **Dream** 1903 is about the thinkers portrayed in Raphael's School of Athens and Dilthey's worries about them breaking up into three divergent groups Finally **The Problem of Religion** 1911 considers how religiosity can still inform lived experience in secular times

Family-Oriented Informed Consent Ruiping Fan, 2015-03-05 This volume addresses the proper character of patient informed consent to medical treatment and clinical research The goal is critically to explore the current individually oriented approach to informed consent which grew out of the dominant bioethics movement that arose in the United States in the 1970s In contrast to that individually oriented approach this volume explores the importance of family oriented approaches to informed consent for medical treatment and clinical research It draws on both East Asian moral resources as well as a critical response to the ways in which the practice of informed consent has developed in the United States
