Keister, Darby E. Southgate, 2012-01-23 Social stratification is the grouping of people based on income wealth political influence and other characteristics Widely recognized categories such as upper middle and lower class reflect the presence of social stratification in all societies Inequality refers to the inevitable disparities in people's positions in this structure The research presented in this book ranges from studies of income and wealth disparities to analyses of the nature of the class system This textbook reflects a hybrid approach to studying stratification It addresses the knowledge accumulated by stratification scholars and challenges students to apply this information to their social world The authors include a wide range of topics and provide current research to round out their discussions Each chapter includes a list of key concepts questions for thought suggested exercises and multimedia resources *Marketing Research* Naresh K. Malhotra, Daniel Nunan, David F. Birks, 2020 Naresh K Malhotra is the first named author on earlier editions Team Performance in Health Care Gloria D. Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the 20th century as the result of shifts in the nature and demands of health care and societal needs Examples include medical and surgical teams serving the military in World War II primary care teams staffing Community Health Centers created by President Johnson's War On Poverty and geriatric care teams established to serve the rapidly growing number of aging citizens Collaborative teamwork surfaced as a rational solution to health care needs but political and economic consensus to support widespread implementation was lacking The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams but such care was viewed as expensive so evaluation of its effectiveness became essential There were major problems in conducting such evaluation however First no clear theory guided the concept and practice of teamwork Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics communication organizational development and general systems Further few reliable validated instruments existed to evaluate team process function or effectiveness The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions 1975-78 and from the Veterans Affairs Interprofessional Team
