management in today's growing exciting and challenging field Handbook of Social Work in Health and Aging Barbara Berkman, 2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care, aging, and social work in a single authoritative volume. These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization. As the baby boomers age, the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging, health care, and the resources available to best serve older adults and their families. The volume's 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and their families, new models for intervention in both community-based practice and institutional care, and knowledge of significant policy and research issues in health and aging. A truly monumental resource, this handbook represents the best research on health and aging available to social workers today.
