Portfolio Theory and Management H. Kent Baker, Greg Filbeck, 2013-01-07 Portfolio management is an ongoing process of constructing portfolios that balances an investor's objectives with the portfolio manager's expectations about the future This dynamic process provides the payoff for investors Portfolio management evaluates individual assets or investments by their contribution to the risk and return of an investor's portfolio rather than in isolation This is called the portfolio perspective Thus by constructing a diversified portfolio a portfolio manager can reduce risk for a given level of expected return compared to investing in an individual asset or security According to modern portfolio theory MPT investors who do not follow a portfolio perspective bear risk that is not rewarded with greater expected return Portfolio diversification works best when financial markets are operating normally compared to periods of market turmoil such as the 2007 2008 financial crisis During periods of turmoil correlations tend to increase thus reducing the benefits of diversification Portfolio management today emerges as a dynamic process which continues to evolve at a rapid pace The purpose of *Portfolio Theory and Management* is to take readers from the foundations of portfolio management with the contributions of financial pioneers up to the latest trends emerging within the context of special topics The book includes discussions of portfolio theory and management both before and after the 2007 2008 financial crisis This volume provides a critical reflection of what worked and what did not work viewed from the perspective

Corporate Social Responsibility and Corporate Finance in Japan Megumi Suto,Hitoshi Takehara,2018-05-24 This book explores the linkages between the evolution of corporate social responsibility CSR and corporate financing and governance in Japan since the late 2000s Since the 1990s increasing economic and financial globalization has steadily eroded the Japanese style of business based on relationships and influenced the awareness and practices of CSR that are unique to Japanese companies In Japan s two lost decades after the bubble economy the business model and corporate financing seem to have continued a gradual financial reform toward a more market oriented system CSR awareness and practices of Japanese companies have been influenced by social and environmental issues that global society and communities face Furthermore the Fukushima nuclear accident in 2011 triggered increasing attention paid to the responsibility of business toward society In this process major players in corporate governance and components of governance structure have continued to change The conventional view of Japanese corporate governance and corporate finance is too narrow to understand this field in Japan This book is based on empirical research to investigate how multifaceted CSR has aligned with business and finance and has influenced

the corporate governance structure of Japanese companies The findings and discussions in this book act as stepping stones in further research on the linkages between business and society and provide empirical evidence on changes in Japanese corporate finance and governance
