Proceedings, Emerging Issues Along Urban/Rural Interfaces: Linking Science and Society David N. Laband,2005 **Managerialism** T.

Klikauer,2013-09-05 Most people know what management is but often people have vague ideas about Managerialism This book introduces Managerialism and its ideology as a colonising project that has infiltrated nearly every eventuality of human society *Governance as a Trialogue: Government-Society-Science in Transition* Anthony R. Turton,Johanna Hanlie Hattingh,Gillian A. Maree,Dirk J. Roux,Marius Claassen,Wilma F. Strydom,2007-02-16 The last two decades have been marked by a dramatic increase in global attention to the concept of governance especially in relation to the effective and sustainable management of natural resources During this period issues of water governance have received particular attention for example in relation to the provision of reliable water supplies as a catalyst for poverty eradication Within the context of the Millennium Development Goals and against a backdrop of an increasing frequency of water crises ranging from widespread flooding to severe water scarcity it is essential that each country and particularly those countries that face development challenges should be in a position to ensure that access to water is available to those who need it most This issue has been highlighted by the Global Water Partnership which stated that the water crisis facing the world is in reality a crisis of governance The South African political environment has changed dramatically in recent years and the central concepts of social equity and the right to a healthy environment are now entrenched in the country's Constitution These concepts are supported by several new laws in particular the National Environmental Management Act and the National Water Act which in turn are based on the principles of sustainable development However despite the highly desirable attributes of these landmark pieces of legislation South African authorities are still struggling to implement the requirements of these Acts almost a decade after their promulgation *Corporate Social Responsibility* John O. Okpara,Samuel O. Idowu,2013-12-02 In today's global business environment it is no longer acceptable that a corporation does well simply by doing good It is expected With increasing pressures from stakeholders to improve the bottom line as well as to be good corporate citizens business leaders face tough decisions What social issues should we support What initiatives should we develop that will do the most good for the company as well as the cause Do we include social messages in our advertising encourage our employees to volunteer do we modify our business practices How do we integrate a new initiative into current strategies These and other challenges will continue to face future leaders This book provides thoughtful answers to these important questions and to many more The book offers suggestions on how to choose among major worthy causes and also how to measure the amount of good achieved both for the recipients and the companies themselves Of course all is not only about challenges there are loads of opportunities that go along with them but it's only responsible and sustainable leaders who would be able to spot these opportunities That is the future which awaits 21st century leaders *Humanity at Risk* Daniel Innerarity,Javier Solana,2013-10-24 *Humanity at Risk* compares diverse approaches to the theme of global threats using the tools of philosophy critical theory and political thought alongside more practical socio political observations By defining the idea of global risk more specifically Editors Innerarity and Solana and their contributors believe we can understand how

these risks should be evaluated predicted and managed within the framework of democratic societies The goal of this book is to highlight more precisely the necessity in the face of new global risks for new governance at a national European and global level
