Environment and Society Paul Robbins, John G. Hintz, Sarah A. Moore, 2011-09-26 *Environment and Society* A Critical Introduction is an overview of the diverse conceptual tools and traditions for thinking about explaining and addressing the environmental challenges we face in the contemporary world Provides an introduction to the environmental challenges we face in the contemporary world through foundational theoretical ideas illustrated with concrete everyday examples Utilizes compelling conversational language to expound on theory history and scientific topics making the text accessible to a diverse readership Draws upon contemporary theoretical understandings in nature society theory while demonstrating through practice and deployment Includes discussion of key historical events topical issues and policies as well as scientific concepts

Nature, Environment and Society Philip Sutton, 2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental problems This uniquely comprehensive guide traces the origins and development of environmental movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories *Nature Environment and Society* provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems

Society and the Environment Michael Carolan, 2018-05-15 *Society and the Environment* examines today's environmental controversies within a socio organizational context After outlining the contours of pragmatic environmentalism Carolan considers the pressures that exist where ecology and society collide such as population growth and its associated increased demands for food and energy He also investigates how various ecological issues such as climate change are affecting our very own personal health Finally he drills into the social structural dynamics including political economy and the international legal system that create ongoing momentum for environmental ills This interdisciplinary text features a three part structure in each chapter that covers fast facts about the issue at hand examines its wide ranging implications and offers balanced consideration of possible real world solutions New to this edition are Movement Matters boxes which showcase grassroots movements that have affected legislation Discussion questions and key terms enhance the text's usefulness making *Society and the Environment* the perfect learning tool for courses on environmental sociology

OECD Insights Sustainable Development Linking Economy, Society, Environment Strange Tracey, Bayley Anne, 2008-12-02 A succinct examination of the concept of sustainable development what it means how it is impacted by globalisation production and

consumption how it can be measured and what can be done to promote it **Society, Environment and Human Security in the Arctic Barents Region** Kamrul Hossain,Dorothee Cambou,2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments The threats arising out of these pressures result in human security challenges This book analyses the formation and promotion of societal security within the context of the Arctic Barents Region It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today The study explores human security dimensions such as environmental security economic security health food water energy communities political security and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future In doing so the book develops a comprehensive analysis of vulnerabilities challenges and needs in the Barents Region and provides recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities This book will be a valuable tool for academics policy makers and students interested in environmental and human security sustainable development environmental studies and the Arctic and Barents Region in particular Environment and Society Erika

Cudworth,2005-08-04 At the start of the twenty first century it can be argued that human societies have a greater impact on the environment than ever before We have always been dependent upon and interacted with the natural environment However the dramatic social changes of the past three centuries have altered the form of our relationship with non human nature to the extent that some would see people planet relations as in a situation of crisis Environment and Society provides a comprehensive and critical account of the ways in which we can think about the relationship between human societies and the environments with which they interact It argues that human societies are ecologically embedded and that environments are often socially embedded and constituted It makes the different theoretical positions and empirical studies accessible to students and includes chapter outlines and summaries annotated further reading boxed case studies and discussion points

Energy, Society and Environment David Elliott,2004-03 Uses global case studies to examine technological solutions to energy related environmental problems and suggests that social economic and political solutions may be needed to avoid serious future environmental damage Linking Science and Technology to Society's Environmental Goals Policy

Division,Policy and Global Affairs,National Research Council,1996-12-05 Where should the United States focus its long term efforts to improve the nation s environment What are the nation s most important environmental issues What role should science and technology play in addressing these issues Linking Science and Technology to Society s Environmental Goals provides the current thinking and answers to these questions Based on input from a range of experts and interested individuals including representatives of industry government academia environmental organizations and Native American communities this book urges policymakers to Use social science and risk assessment to guide decisionmaking Monitor

environmental changes in a more thorough consistent and coordinated manner Reduce the adverse impact of chemicals on the environment Move away from the use of fossil fuels Adopt an environmental approach to engineering that reduces the use of natural resources Substantially increase our understanding of the relationship between population and consumption This book will be of special interest to policymakers in government and industry environmental scientists engineers and advocates and faculty students and researchers **Environment and Society** Magnus Boström, Debra J.

Davidson, 2018-06-13 This book offers a critical analysis of core concepts that have influenced contemporary conversations about environment society relations in academic political and civil circles Considering these conceptualizations are currently shaping responses to environmental crises in fundamental ways critical reflections on concepts such as the Anthropocene metabolism risk resilience environmental governance environmental justice and others are well warranted Contributors to this volume working across a multitude of areas within environmental social science scrutinize underlying worldviews and assumptions asking a common set of key questions What are the different concepts able to explain How do they take into account society environment relations What social cultural or geo political biases and blinders are inherent What actions or practices do the concepts inspire The transdisciplinary engagement and reflexivity regarding concepts of environment society relations represented in these chapters is needed in all spheres of society in academia policy and practice not the least to confront current tendencies of anti reflexivity and denialism **Society and Its Environment** Egbert
