Globalization of an Educational Idea Ingrid Miethe, Tim Kaiser, Tobias

Kriele, Alexandra Piepiorka, 2019-07-22 In this book authors showcase the worldwide spread of Workers Faculties as an example of both cooperation between socialist countries in education and globalization processes in the field of education Based on extensive research carried out in Cuban German Mozambican and Vietnamese archives as well as expert interviews it combines detailed case studies of educational transfers and policy implementation with a discussion of theoretical approaches to the study of globalization in and of education Research on Workers Faculties provides an especially interesting example for the study of educational transfer between socialist countries as well as for the interplay of such transfers with processes of globalisation for two reasons On one hand the first Workers Faculties were established already shortly after the October Revolution in Russia and Workers Faculties continue to exist in Cuba until today A study of these institutions therefore provides a dynamic perspective covering the whole period of the existence of the socialist camp On the other hand the spread of the Workers Faculty idea to four continents allows for an analysis that takes into account widely differing local contexts This book offers an analysis of general trends and particularities in the history of the global spread of the Workers Faculty idea and its implementation in local contexts Finally it discusses the results with a view towards theories of globalization in the field of education as well as of specificities of processes of socialist globalization

Wang,2016-09-13 Life outside the mobile phone is unbearable Lily 19 factory worker Described as the biggest migration in human history an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media It was here she witnessed a second migration taking place a movement from offline to online As Wang argues this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other where the online world now provides a home for the migrant workers who feel otherwise homeless Wang s fascinating study explores the full range of preconceptions commonly held about Chinese people their relationship with education with family with politics with home and argues why for this vast population it is time to reassess what we think we know about contemporary China and the evolving role of social media      **International**

**Handbook of Comparative Education** Robert Cowen,Andreas M. Kazamias,2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook      *Development, Power, and the Environment* Md Saidul Islam,2013-06-07 Unmasking the neoliberal paradox

this book provides a robust conceptual and theoretical synthesis of development power and the environment With seven case studies on global challenges such as under development food regime climate change dam building identity politics and security vulnerability the book offers a new framework of a double risk society for the Global South With apparent ecological and social limits to neoliberal globalization and development the current levels of consumption are unsustainable inequitable and inaccessible to the majority of humans Power has a great role to play in this global trajectory Though power is one of

most pervasive phenomena of human society it is probably one of the least understood concepts The growth of transnational corporations the dominance of world wide financial and political institutions and the extensive influence of media that are nearly monopolized by corporate interests are key factors shaping our global society today In the growing concentration of power in few hands what is apparent is a non apparent nature of power Understanding the interplay of power in the discourse of development is a crucial matter at a time when our planet is in peril both environmentally and socially This book addresses this current crucial need Mentoring, Methods, and Movements: Colloquium in Honor of Terence K. **Impure and Worldly Geography** Gavin Bowd, Daniel Clayton, 2019-02-13 Tropicality is a centuries old Western discourse that treats otherness and the exotic in binary us and them terms It has long been implicated in empire and its anxieties over difference However little attention has been paid to its twentieth century genealogy This book explores this neglected history through the work of Pierre Gourou one of the century s foremost purveyors of what anti colonial writer Aim C saire dubbed tropicalit It explores how Gourou s interpretations of the nature of the tropical world and its innate difference from the temperate world were built on the shifting sands of twentieth century history empire and freedom modernity and disenchantment war and revolution culture and civilisation and race and development The book addresses key questions about the location and power of knowledge by focusing on Gourou s cultivation of the tropics as a romanticised networked and affective domain The book probes what C saire described as Gourou s impure and worldly geography as a way of opening up interdisciplinary questions of geography
