Foundation: The Sociological Imagination

First, a story from Malcolm Gladwell's book *Outliers*
Roseto Valfortore, Italy

- What Wolf slowly realized was that the secret of Roseto wasn't diet or exercise or genes or the region where Roseto was situated. It had to be the Roseto itself. As Bruhn (sociologist!!) and Wolf walked around the town, they began to realize why. They looked at how the Rosetans visited each other, stopping to chat with each other in Italian on the street, or cooking for each other in their backyards. They learned about the extended family clans that underlay the town's social structure. They saw how many homes had three generations living under one roof, and how much respect grandparents commanded. They went to Mass at Our Lady of Mt. Excerpt from The Outlines of Sociology Here is my Principles of Sociology cut down a third rearranged rephrased and equipped for the class room Still I advise teachers who have been using Principles as a text not to discard it for this book It is fuller and as for the exercises they can be had of the publisher in pamphlet form and placed in the hands Of each student Outlines of Sociology is provided in order to meet the demand for a shorter text for the use of those who cannot devote as much as a semester to the subject My thirty two years of trying to impart Sociology to university students have resulted in a technique which teachers of this book may like to know about Now that my system of Sociology is to be had between covers I do not lecture I lead discussions My class is broken up into sections not to exceed twenty five members Each student has his appointed seat and a glance over the section enables me to record absences on the seating chart before me At the beginning Of the course every student is supplied with an assignment sheet to be pasted inside the back cover of his text which shows exactly what will be required Of him for every session in the semester After ten or twelve minutes of sharp quizzing here is where the quiz questions come in we take up the exercises If those per taining to the assigned lesson exceed five in number the student answers only alternate exercises those sitting in Odd number seats answering odd number exercises and those sitting in even number seats answer ing even number exercises The student is expected to have wrestled with the exercises in advance and to bring with him written solutions His paper is not to be handed in but is there as evidence that the student has given enough consideration to the problems to formulate and write down answers When after reading out an exercise I call upon Reed or Daly for an answer he is not to improvise but to read his written answer If he has nothing in black and white he says unprepared even if a bright idea is on his tongue s tip After a few answers have been considered the question is thrown open to general discussion and then the impromptu ideas get their innings About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Introduction to the Science of Sociology (Illustrated)** Robert Park, Ernest W. sociological principles explained by the authors This textbook s mission is to detail every fundamental tenet of the sociology as a discipline This is an all encompassing guidebook which both introduces and demystifies the science of sociology for the curious reader or student The entire first chapter is devoted to explaining the relationship of sociology with various other disciplines and the theories of society which give rise to its most distinctive traits and approaches This model of explanation is sustained throughout the entire text each chapter focuses on a particular field of sociological interest beginning with questions about humans and their nature How people behave and interact with one another in everyday society and whether such behaviors are altruistic or individualistic law abiding or otherwise is discussed Park and Burgess are informed by theories such as Darwin s theory of evolution and utilise these to supplement their explanations The notions of how humans work together compete or act alone and in groups of various sizes be it on the scale of a partnership a family an ethnic or local grouping or on a nationwide basis is also covered How people build their societies and to what degree their endeavors result an accepting attitude and assimilation of outsiders is investigated Later in the book the notion of centralized control over the wider society comes to the fore By what means such control is exerted and the historical responses of various methods are looked at in detail Finally there is an examination of how humans may behave collectively as in a crowd or united in a purpose or ideal and the various machinations through which human society progresses and prospers In the manner of a good textbook there are a selection of questions and problems situated at the conclusion of every chapter These enable the reader to keenly review their own understanding of the explained principles Furthermore the unabridged chapters each have a bibliography appended so that the reader may if desired independently research the myriad sources drawn upon by Park and Burgess
