The Destruction Of Art Iconoclasm And Vandalism Since The French Revolution:

The Destruction of Art Dario Gamboni, 1997 The first comprehensive examination of modern iconoclasm The Destruction of Art looks at deliberate attacks against works of art in the nineteenth and twentieth centuries well illustrated Gamboni brings together a great deal of fascinating information The Independent Erudite and entertaining Gamboni's book is an excellent guide to the outrageous in art Glasgow Herald **The destruction of art**, 2007 **The Destruction of Art** Dario Gamboni, 2018 In January 2006 a man tried to break Marcel Duchamp's Fountain sculpture with a small hammer The sculpted foot of Michelangelo's David was damaged in 1991 by a purportedly mentally ill artist Each such incident confronts us with the unsettling dynamic between destruction and art In this book renowned art historian Dario Gamboni is the first to tackle this weighty issue in depth Starting with the sweeping obliteration of architecture and art under the Communist regimes of the Soviet Union and Eastern Bloc Gamboni investigates other instances of destruction around the globe uncovering a surprisingly widespread phenomenon As he demonstrates through analyses of nineteenth and twentieth century incidents in the United States and Europe a complex relationship exists between the evolution of modern art and a long history of iconoclasm Gamboni probes the concept of artists' rights the power of political protest and the ways in which iconoclasm offers a unique interpretation of society's relationship to art and material culture Compelling thought provoking and featuring more than one hundred and fifty illustrations The Destruction of Art forces us to rethink the ways in which we interact with art and its power to shock or subdue **The Oxford Handbook of Islamic Archaeology** Bethany Walker, Timothy Insoll, Corisande Fenwick, 2020-10-27 Born from the fields of Islamic art and architectural history the archaeological study of the Islamic societies is a relatively young discipline With its roots in the colonial periods of the late 19th and early 20th centuries its rapid development since the 1980s warrants a reevaluation of where the field stands today This Handbook represents for the first time a survey of Islamic archaeology on a global scale describing its disciplinary development and offering candid critiques of the state of the field today in the Central Islamic Lands the Islamic West Sub Saharan Africa and Asia The international contributors to the volume address such themes as the timing and process of Islamization the problems of periodization and regionalism in material culture cities and countryside cultural hybridity cultural and religious diversity natural resource management international trade in the later historical periods and migration Critical assessments of the ways in which archaeologists today engage with Islamic cultural heritage and local communities closes the volume highlighting the ethical issues related to studying living cultures and religions Richly illustrated with extensive citations it is the reference work on the debates that drive the field today *The Idea of Waste* John Scanlan, 2025-03-15 A compelling rumination on detritus as an essential meaningful yet often problematic facet of human existence This book starts with the premise that waste is inevitable in human society and ends with a meditation on its inevitability The Idea of Waste explores how we have grappled with both the material reality and the specter of this

shapeshifting phenomenon throughout history utilizing it dreaming of overcoming it yet never escaping it John Scanlan explores what waste is and why it seems to be intrinsic to human life at every turn in every age and epoch Finally he demonstrates how waste never disappears but rather only proliferates anew Scanlan s compelling narrative shows waste to be both an enduring material consequence of human activity and an idea or state of being "Striking Images, Iconoclasm Past and Present " Stacy Boldrick,2017-07-05 All cultures make and break images Striking Images Iconoclasm Past and Present explores how and why people have made and modified images and other cultural material from pre history into the 21st century With its impressive chronological sweep and disciplinary breadth this is the first book about iconoclasm the breaking of images and the transformation of broader sets of signs that includes contributions from archaeologists curators and museum conservators as well as historians of art literature and religious studies The chapters examine themes critical to the study of iconoclasm violence punishment memory intentionality ruins and relics and their survival The conclusion shows how cross disciplinary debate amongst the contributors informed Tate Britain s Art under Attack exhibition 2013 and addresses the challenges iconoclasm presents to the modern museum By juxtaposing objects and places usually considered in isolation Striking Images raises provocative questions about our understandings of cross cultural differences and the value of representational objects from the broken swords of pre historical bog graves to the Bamiyan Buddhas and contemporary art Are any such objects ever finished or are they simply subject to constant transformation In dialogue with each other the essays consider this question and expand the field of iconoclasm and cultural studies

The Routledge Handbook of Heritage Destruction José Antonio González Zarandona,Emma Cunliffe,Melathi Saldin,2023-08-10 The Routledge Handbook of Heritage Destruction presents a comprehensive view on the destruction of cultural heritage and offers insights into this multifaceted interdisciplinary phenomenon the methods scholars have used to study it and the results these various methods have produced By juxtaposing theoretical and legal frameworks and conceptual contexts alongside a wide distribution of geographical and temporal case studies this book throws light upon the risks and the realizations of art and heritage destruction Exploring the variety of forces that drive the destruction of heritage the volume also contains contributions that consider what forms heritage destruction takes and in which contexts and circumstances it manifests Contributors including local scholars also consider how these drivers and contexts change and what effect this has on heritage destruction and how we conceptualise it Overall the book establishes the importance of the need to study the destruction of art and cultural heritage within a wider framework that encompasses not only theory but also legal military social and ontological issues The Routledge Handbook of Heritage Destruction will contribute to the development of a more complete understanding and analysis of heritage destruction The Handbook will be useful to academics students and professionals with interest in heritage conservation and preservation history and art history archaeology anthropology philosophy and law

The Philistine Controversy Dave Beech,John Roberts,2002 Dave Beech and John Roberts develop

what they call a counter intuitive notion of the philistine with insights on cultural division and exclusion The Destruction of Memory Robert Bevan, 2007-04-20 Crumbled shells of mosques in Iraq the bombing of British cathedrals in World War II the fall of the World Trade Center towers on September 11 when architectural totems such as these are destroyed by conflicts and the ravages of war more than mere buildings are at stake The Destruction of Memory reveals the extent to which a nation weds itself to its landscape Robert Bevan argues that such destruction not only shatters a nation's culture and morale but is also a deliberate act of eradicating a culture's memory and ultimately its existence Bevan combs through world history to highlight a range of wars and conflicts in which the destruction of architecture was pivotal From Cortez's razing of Aztec cities to the carpet bombings of Dresden and Tokyo in World War II to the war in the former Yugoslavia The Destruction of Memory exposes the cultural war that rages behind architectural annihilation revealing that in this subliminal assault lies the complex aim of exterminating a people He provocatively argues for the fatally intertwined experience of genocide and cultural genocide ultimately proposing the elevation of cultural genocide to a crime punishable by international law In an age in which Frank Gehry I M Pei and Frank Lloyd Wright are revered and yet museums and temples of priceless value are destroyed in wars around the world Bevan challenges the notion of collateral damage arguing that it is in fact a deliberate act of war

Rhetoric and Renaissance Culture Heinrich F. Plett, 2008-08-22 Since Jacob Burckhardt's *Kultur der Renaissance in Italien* 1869 rhetoric as a significant cultural factor of the renaissance has largely been neglected The present study seeks to remedy this deficit regarding the arts by concentrating on literary theory and its aspects of imagination inventio genre dispositio of the genera style elocutio mnemonic architecture memoria and representation actio with illustrative examples taken from Shakespeare's works but also on the intermedial rhetoric of painting and music Particular attention is given to the rhetorical ideology of the Renaissance
