The Destruction Of The Country House 1875 1975:

The Destruction of the Country House, 1875-1975 Roy C. Strong, 1974-01-01 **The Destruction of the Country House, 1875-1975** Roy C. Strong, 1974 *The Fall and Rise of the Stately Home* Peter Mandler, 1997-01-01 Challenging the prevailing view of a modern English culture besotted with its history and aristocracy Mandler portrays instead a continuously changing society where both intellectual and popular attitudes have only recently turned to admiration **The British Country House Revival** Ben Cowell, 2024 British country houses have experienced a renaissance since the early 1970s A new accord is needed today recognising the increasingly contested contribution of country houses to British cultural life Fifty years ago the future for country houses in Britain looked bleak The Victoria Albert Museum's exhibition *The Destruction of the Country House* which opened in October 1974 charted the loss of over a thousand country houses in the preceding century The makers of the exhibition warned that history could be about to repeat itself because of the threats besetting mansion properties principally from higher taxation Houses faced the prospect of having to be stripped of their collections and sold for use as offices hotels or hospitals with their parks and gardens turned into golf clubs Government might afford to save just a handful of the most significant of these places working in tandem with charities such as the National Trust The rest would be consigned to history This book traces the history of country houses in Britain from the *Destruction* exhibition to the present day The wave of country house losses anticipated in 1974 never actually happened Instead over the next five decades Britain's country houses experienced a renaissance Fiscal rules changed in the mid 1970s to make it easier for owners to hold on to their assets Economic improvements in the 1980s and 1990s allowed many houses and estates to develop profitable commercial businesses All of this was achieved only after dedicated campaigning from heritage organisations in support of the country house cause The book argues that a new accord is needed today to recognise and value the ongoing if increasingly contested contribution of country houses to British life and culture in the twenty first century *The British Country House in the Eighteenth Century* Christopher Christie, 2000 This work explores the British country house between 1700 1830 and looks at the lives of the noblemen and the servants who inhabited them Reference is made to the whole of the British Isles and there is a discussion of their political significance *Finding a Role?* Brian Harrison, 2011-09-09 In 1970 the cold war was still cold Northern Ireland's troubles were escalating the UK's relations with the EEC were unclear and corporatist approaches to the economy precariously persisted By 1990 Communism was crumbling world wide Thatcher's economic revolution had occurred terrorism in Northern Ireland was waning multi culturalism was in place family structures were changing fast and British political institutions had become controversial Seven analytic chapters pursue these changes and accumulate rich detail on changes in international relations landscape and townscape social framework family and welfare structures economic policies and realities intellect and culture politics and government The concluding chapter ranges chronologically even more widely to bring out the interaction of past and present then asks how

far the UK had by 1990 identified its world role Like Harrison's *Seeking a Role The United Kingdom 1951-1970* 2009 the immediately preceding volume in this series *Finding a Role* includes a full chronological table and an ample index of names and themes This the first thorough wide ranging and synoptic study of the UK so far published on this period has two overriding aims to show how British institutions evolved but also to illuminate changes in the British people their hopes and fears values and enjoyments failures and achievements It therefore equips its readers to understand events since 1990 and so to decide for themselves where the UK should now be going

Culture and Consensus (Routledge Revivals) Robert Hewison, 2015-06-11 *Culture and Consensus* first published in 1995 and a revised edition in 1997 explores the history of the relationship between politics and the arts in Britain since 1940 and shows how the search for a secure sense of English identity has been reflected in official and unofficial attitudes to the arts architecture landscape and other emblems of national significance Illustrating his argument with a series of detailed case histories Robert Hewison analyses how Britain's cultural life has reached its present enfeebled condition and suggests a way forward This book will be of interest to students of art and cultural studies

Across Space and Time Patrick Haughey, 2017-07-12 Modernity tends to be considered a mostly Western chronologically recent concept Looking at locations in Brazil Java India Georgia and Yugoslavia among others *Across Space and Time* provides architectural and cultural evidence that modernity has had an impact across the globe and for much longer than previously conceived This volume moves through space and time to illustrate the way global modernity has been negotiated through architecture urban planning design pedagogies preservation and art history in diverse locations around the world Bringing together emerging and established architecture and art history scholars each chapter focuses on a particular site where modernity was defined challenged or reinterpreted The contributors examine how architectures landscapes and design thinking influence and are influenced by conflicts between cultural economic technological and political forces By invoking well researched histories to ground their work in a post colonial critique they closely examine many prevailing myths of modernity Notable topics include emerging architectural history in the Indian subcontinent and the connection between climate change and architecture Ultimately *Across Space and Time* contributes to the ongoing critique of architecture and its history both as a discipline and within the academy The authors insist that architecture is more than a style It is a powerful expression of representational power that reveals how a society negotiates its progress

Historic House Museums in the United States and the United Kingdom Linda Young, 2016-12-13 *Historic House Museums in the United States and the United Kingdom A History* addresses the phenomenon of historic houses as a distinct species of museum Everyone understands the special nature of an art museum a national museum or a science museum but house museum nearly always requires clarification In the United States the term is almost synonymous with historic preservation in the United Kingdom it is simply unfamiliar the very idea being conflated with stately homes and the National Trust By analyzing the motivation of the founders and subsequent keepers of house museums Linda Young identifies a typology that

casts light on what house museums were intended to represent and their significance or lack thereof today This book examines heroes houses once inhabited by great persons e g Shakespeare s birthplace Washington s Mount Vernon artwork houses national identity as specially visible in house design style and technique e g Frank Lloyd Wright houses Modernist houses collectors houses a microcosm of collecting in situ domestic subsequently presented to the nation as the exemplars of taste e g Sir John Soane s Museum Isabella Stewart Gardner Museum English country houses the palaces of the aristocracy maintained thanks to primogeniture but threatened with redundancy and rescued as museums to be touted as the peak of English national culture English country houses the palaces of the aristocracy maintained for centuries thanks to primogeniture but threatened by redundancy and strangely rescued as museums now touted as the peak of English national culture Everyman woman s social history houses the modern demotic response to elite houses presented as social history but tinged with generic ancestor veneration e g tenement house museums in Glasgow and New York **Architecture of**
